

Leave Requests/Process

Standard Operating Procedure (SOP) for Walmart Support | RTA

Vacation/Sick Leave

Standard Operating Procedure (SOP) for Walmart Support

| Vacation and Sick Leave Process

Purpose/ Scope

This SOP establishes the standardized process for the application, approval, usage, accrual, and recording of Vacation Leave (VL). It ensures consistent implementation of company policy while balancing employee benefits and operational requirements. This SOP applies to all eligible employees and to RTA, supervisors and managers involved in Vacation Leave processing.

Definition of Terms

Vacation Leave (VL) – A company-initiated benefit granting eligible employees paid time off based on accrued leave credits.

Half-Day Leave – A company-initiated benefit equivalent to **four (4) or five (5) continuous hours**, depending on work schedule, chargeable against available sick leave or vacation leave credits.

Critical Workdays – Specific dates where leave approval is subject to stricter review due to operational impact.

Sick Leave (SL) - Time off granted to an employee due to illness or medical reasons.

Terminal Leave – Use of accrued VL credits prior to separation from employment.

Roles & Responsibilities

List the key roles involved.

Employee

- File VL application within prescribed timelines
- Ensure completeness and accuracy of request

Support/Senior TL/Managers

- Validate exceptions and Approve VL requests of managerial/supervisory employees

RTA

- Review and approve/disapprove VL requests
-

Vacation Leave Eligibility & Entitlement

- Regular employees who have completed **at least twelve (12) continuous months** of service are entitled to **one hundred (100) hours of paid Vacation Leave annually**.
 - For new hires, VL accrues starting from the hiring date and may be used **upon regularization**.
 - Employees with **perfect attendance and zero tardiness** for the entire calendar year are granted an additional **twenty (20) hours VL credits** for the succeeding year. These credits are **non-convertible to cash** if unused.
-

Procedure (Steps)

Step 1: Filing of Leave Application

- The employee must file a Vacation/Sick Leave application through the [Zoho Leave Application Form](#).
 - A. Filing a Vacation Leave Request**
 - Agents must **file their VL request in Zoho**.
 - The agent must consider filing in accordance with the [criteria](#).
 - B. Filing a Sick Leave Request**
 - Agents must **file their SL request in Zoho immediately after returning** from an absence.
 - If the SL request covers **less than 2 days**, no additional documents are required.
 - C. Documentation Requirements for Extended Absences**
 - If the absence is **2 days or more**, agents are required to submit:
 - A **medical certificate** from a licensed doctor.
 - A **fit-to-work validation** confirming their ability to resume duties.

Step 2: Review Employee Request

- The RTA reviews the request based on staffing and operational needs. This is in accordance with the availability of slots on that date and also if the filed date under the date-range.

Criteria for Vacation Leave Approval;

- 1. Filed requests must be submitted **at least thirty (30) in advance or seven (7) calendar days prior to the intended leave date.***
 - 2. There must be an available slot for that day for it to be approved.*
- Managerial or Supervisorial employees must secure approval from **Top Management (STL/OM)**
 - Leave applications without proper approval shall be considered **disapproved, unauthorized, or AWOL.**

Step 3: Approving of Employee Request

Access Leave Request.

The screenshot shows the ECETrack HR system interface. The top navigation bar includes tabs for Request Portal, My Attendance, People (Payslips), and Leave Request (highlighted). Below the navigation bar, there are notification badges for Log Disputes (64), OTs (93), Leave Requests (662), Payroll Discrepancies (34), Movement Notifs (1), and LOA Notifications (6). The main content area is divided into two columns. The left column contains a 'Time Log' section with a welcome message for Salcedo Joriz, a date of Feb 25, 2025, and a scheduled time of 10:00 EST. It also shows a clock icon and a time display of 1h 57m 59s. The right column contains a 'New Break Form' section with a 'Break Type' dropdown menu and buttons for Start, End, Refresh, and View Break Logs. At the bottom, there is a 'My Tools' section with various utility links.

Step 3.1.

In the **Zoho Leave Request Portal**, locate the **left-side navigation panel**.

1. Find the tab labeled **“View”** and **click on it**.
2. From the dropdown menu, select **“Leaves for Approval”**.
3. This section will display a **list of all pending leave requests** submitted by employees.

ECE Attendance Leaves For Approval ^{*}

SORTING Date [▲] SEARCH Name does not contain "Joriz" Date After "12/31/2024"

☐	Approve	Disapprove	Employee ID	Name	Site	Account	Team
☐ Albert (7)							
☐	Approve	Disapprove	ECE005530	France James Remedios Cadizal	Manila	Albert	
☐	Approve	Disapprove	ECE001792	Joana Marie Derotas Cortes	Manila	Albert	Pocholo B.
☐	Approve	Disapprove	ECE005473	Jireh Mae Pons	Manila	Albert	
☐	Approve	Disapprove	ECE003361	Christine Jean Condez Moncal	Dumaguete	Albert	Ops
☐	Approve	Disapprove	ECE005538	Rubyllynne Galapia Maglana	Manila	Albert	

Note: If you cannot view a certain program/account, please reach out to your RTA leader to request for the access/approver's view of the program/account.

Step 3.2.

In the **Leaves for Approval** section, you will see the following details:

- a. **Employee Name**
- b. **Type of Leave (Sick Leave, Vacation Leave, Bereavement Leave, etc.)**
- c. **Date Range of the Leave**
- d. **Leave Reason (if provided by the employee)**
- e. **Current Status (Pending, Approved, or Disapproved)**

Click on an employee's request to view additional details.

If necessary, cross-check the employee's attendance records in **Zoho Time Logs** to verify leave eligibility.

Step 3.3.

1. To Approve a Leave Request:

- Click the **"Approve"** button next to the request if the request is compliant to the **criteria** above.
- The system will automatically update the leave status to **"Approved"** and notify the employee.

2. To Disapprove a Leave Request:

- Click the **"Disapprove"** button.
- A **pop-up window** will appear, prompting you to enter the reason for disapproval.
- Type in a **clear and specific reason** (e.g., "Your request falls within the filing date range", "There are no remaining slots available" or "Schedule conflict").
- Click **"Confirm"** to finalize the disapproval.
- The employee will receive an **automated notification** regarding the disapproval along with the reason provided.

Leave Utilization

- Approved VL is deducted from the employee's available VL credits.
- Employees under **suspension** are not allowed to apply or use VL credits.

Special Vacation Leave Scenarios

● Birthday Leave Request

- Support Employees are eligible for Birthday Leave. This leave follows the same request process as regular leave; however, it may only be filed for any one day within the employee's birth month. Birthday Leave is limited to one (1) day only.

● Emergency Vacation Leave

- Employees may be granted **spontaneous leave** subject to approval by the Operations Team and higher authority. This leave follows the regular

filing process but may be approved even if standard criteria are not fully met, typically for urgent situations such as medical emergencies affecting the employee or their immediate family, with required approval and supporting documentation.

- **Voluntary Time-off Leave filing**
 - This follows the same process as regular leave filing but applies to Voluntary Time-Off (VTO). VTO is unpaid and will be deducted from the cutoff date of the leave. It may only be requested if the employee has no available leave credits, and it requires approval from the Operations Team.

Year-End and Carryover Rules

- All VL credits for the current year must be used **on or before the end of the first quarter of the succeeding year**.
- Unused VL beyond this period shall be converted into cash.

Separation and Proration

- For outgoing employees, VL accrual is **prorated based on active employment**.
- Any VL taken in excess of prorated credits shall be **deducted from final pay**.
- For separated or terminated employees for just or authorized cause, VL is **not convertible to cash**.

Reprocessing Previously Denied Leave Requests

Here is the guide for reprocessing previously denied leave requests. Please review and follow the steps accordingly: [Guided Standard Operating Procedure for Reprocessing Previously Denied Leave Requests](#).

Exceptions & Escalation

- VL applications without proper approval are considered unauthorized.
- Employees under suspension are ineligible to use VL credits.
- Management decisions related to VL scheduling are final and binding.

Bereavement Leave

Standard Operating Procedure (SOP) for Walmart Support | Bereavement Process

Purpose/ Scope

This SOP defines the standardized process for requesting, validating, approving, and recording Bereavement Leave. It applies to all employees, regardless of employment status, and to HR personnel and RTAs responsible for approving and processing Bereavement Leave requests in Zoho. The SOP ensures timely employee support while maintaining accurate documentation and compliance with company policy.

Roles & Responsibilities

List the key roles involved.

Employee

- Notify HR Department of bereavement
- Submit required documents
- File leave request within the prescribed period

Immediate Supervisor / Team Lead

- Acknowledge employee absence
- Support coordination with HR Department if needed

Human Resources Department (HRD)

- Validate documents
- Approve and record Bereavement Leave

RTA

- Approves request on Zoho based on the approval of Ops and HR
-

Procedure (Steps)

Step 1: Employee Notification

- The employee must inform HRD and/or their immediate supervisor **as soon as reasonably possible** regarding the bereavement.

- Notification may be done via email, or other company-approved communication channels.

Step 2: Submission of Bereavement Leave Request

- The employee completes and submits the [Zoho Leave Application Form](#).
- The requested leave may cover **up to three (3) working days**.
- Filing all the documents needed in Zoho

Step 3: Submission of Supporting Documents

- The employee submits the following documents to HRD via Email:
 - Copy of the death certificate
 - Proof of relationship with the deceased (if required)

Step 4: HRD Review and Validation

- HRD reviews the request form and validates the submitted documents.
- HRD confirms eligibility based on the definition of an immediate family member.
- HRD then approves the Bereavement leave thru email and so for the RTA to approve it in Zoho

Step 5: Approval and Recording

- Once validated, HRD approves the Bereavement Leave.
- The leave is recorded as **Bereavement Leave**, separate from vacation and sick leave credits.

Review Employee Request

- The RTA reviews the request based upon prior approval of the HRD.

Criteria;

1. Requests must be approved by the HRD via email.

2. The request is acknowledged by the operations team.

- Managerial or Supervisorial employees must secure approval from **Top Management** (STL/OM)
- Leave applications without proper approval shall be considered **disapproved, unauthorized, or AWOL**.

A. Approving of Employee Request

Access Leave Request.

The screenshot shows the ECETrack HR system interface. The top navigation bar includes tabs for 'Request Portal', 'My Attendance', 'People (Payslips)', 'Leave Request' (highlighted with a red box), and 'ECE HR'. Below the navigation bar, there are several sections: 'Time Log' (displaying a welcome message for Salcedo Joriz, the date 25 Feb 2025, and a scheduled time of 10:00 EST, with a large green button showing '1h 57m 59s'), 'New Break Form' (with a 'Break Type' dropdown menu and buttons for 'Start', 'End', 'Refresh', and 'View Break Logs'), and 'My Tools' (with icons for 'Update Profile', 'Zoho Support Ticket', 'IT Helpdesk', 'RTA/WFM Ticketing', 'HR Requests', 'ACHIEVE Ticketing', and 'PAYROLL Ticketing'). A red arrow points from the 'Leave Request' tab to the 'Time Log' section.

B. In the Zoho Leave Request Portal, locate the left-side navigation panel.

- Find the tab labeled **“View”** and **click on it**.
- From the dropdown menu, select **“Leaves for Approval”**.
- This section will display a **list of all pending leave requests** submitted by employees.

Employee ID	Name	Site	Account	Team
ECE005530	France James Remedios Cadizal	Manila	Albert	
ECE001792	Joana Marie Derotas Cortes	Manila	Albert	Pocholo B.
ECE005473	Jireh Mae Pons	Manila	Albert	
ECE003361	Christine Jean Condez Moncal	Dumaguete	Albert	Ops
ECE005538	Rubylynne Galapia Maglana	Manila	Albert	

Note: If you cannot view a certain program/account, please reach out to your RTA leader to request for the access/approver's view of the program/account.

C. In the Leaves for Approval section, you will see the following details:

- Employee Name**
- Type of Leave (Sick Leave, Vacation Leave, Bereavement Leave, etc.)**
- Date Range of the Leave**
- Leave Reason (if provided by the employee)**
- Current Status (Pending, Approved, or Disapproved)**

Click on an employee's request to view additional details.

If necessary, cross-check the employee's attendance records in **Zoho Time Logs** to verify leave eligibility.

D. Approval of the request

1. To Approve a Leave Request:

- Click the **"Approve"** button next to the request if the request is compliant to the **criteria** above.

- The system will automatically update the leave status to **"Approved"** and notify the employee.
 - 2. **To Disapprove a Leave Request:**
 - Click the **"Disapprove"** button.
 - A **pop-up window** will appear, prompting you to enter the reason for disapproval.
 - Type in a **clear and specific reason** (e.g., "Your request falls within the filing date range", "There are no remaining slots available" or "Schedule conflict").
 - Click **"Confirm"** to finalize the disapproval.
 - The employee will receive an **automated notification** regarding the disapproval along with the reason provided.
-

Exceptions & Escalation

- Failure to submit required documents may result in the leave being reclassified according to company leave policies.
-

Please click "SUBMIT" button on the Leave Request Form after uploading your Supporting Document/s.

Upload

Step 5: Submit the Request

- Once the document is uploaded, click Submit.
- Your Bereavement Leave request will be officially filed.

Step 6: Leave Retraction (If Needed)

- Go to My Records > My Attendance.
- Click Retract Leave and inform an RTA to review and approve the retraction.

Notes / Tips:

- Ensure documents are clear and complete before uploading.

- Incorrect or missing documents will delay or result in denial of the request.

5. Exceptions & Escalation

Issue	Action	Escalate To
Incorrect document uploaded	Retract and refile the request	RTA Team
Request auto-denied	Verify document and refile	RTA Team
Retraction not approved	Follow up via proper channel	RTA / Supervisor

Solo Parent Leave

Standard Operating Procedure (SOP) for Walmart Support

| Solo Parent Leave Process

Purpose / Scope

This SOP establishes the standardized process for the application, approval, validation, and recording of **Parental Leave (Solo Parent Leave)**. It ensures compliance with applicable laws and company policy while providing eligible solo parent employees time off to perform parental duties that require their physical presence. This applies to all eligible solo parent employees and to RTA, HRD, supervisors, managers, and payroll personnel involved in leave processing.

Definition of Terms

Parental Leave (Solo Parent Leave) – A leave benefit of **up to seven (7) working days per year** granted to an eligible solo parent employee to enable the performance of parental duties and responsibilities where physical presence is required.

Solo Parent – Any individual who is solely responsible for the care and upbringing of a child or children and falls under the categories defined in Section 5 of this SOP.

Roles & Responsibilities

Role	Responsibility
Employee (Solo Parent)	• Inform HRD and Support Team of solo parent eligibility • Submit Parental Leave application and documents • Report any change in eligibility status
Immediate Supervisor	• Review and approve/disapprove leave requests
Human Resources Department (HRD)/ Real Time Analyst	• Validate eligibility and documents • Maintain records of Solo Parent status

Tools / Forms Required

- Zoho Leave Application Form (Parental Leave option)
 - Valid Solo Parent Eligibility Identification Card issued by DSWD
 - Supporting documents, if applicable
-

Eligibility Criteria

Employment Requirement

- Parental Leave of not more than **seven (7) working days per year** shall be granted to any solo parent employee who has rendered **at least six (6) months of service**.

Definition of Solo Parent

A solo parent includes, but is not limited to, the following:

- A woman who gives birth as a result of rape or other crimes against chastity, provided the mother keeps and raises the child;
- A parent left solo due to the **death of a spouse**;
- A parent left solo due to the **detention or imprisonment of a spouse** for at least one (1) year;
- A parent left solo due to **physical and/or mental incapacity of the spouse**, as certified by a public medical practitioner;
- A parent left solo due to **legal separation or de facto separation** from spouse for at least one (1) year, provided custody of the child is awarded to the employee;
- A parent left solo due to **nullity or annulment of marriage**, as decreed by a court or church, provided custody of the child is awarded to the employee;
- A parent left solo due to **abandonment by the spouse** for at least one (1) year;
- An unmarried mother or father who chooses to keep and rear the child;
- A duly licensed foster parent or court-appointed legal guardian who solely provides parental care;
- Any family member who assumes responsibility as head of the family due to death, abandonment, disappearance, or prolonged absence of the parents or solo parent.

Proof of Eligibility

- Employees must possess a valid **Solo Parent Eligibility Identification Card** issued by the **Department of Social Welfare and Development (DSWD)**.
 - HRD and RTA must be formally informed once eligibility is granted.
-

Procedure (Steps)

Step 1: Declaration of Solo Parent Status

- The employee informs HRD and RTA of solo parent eligibility and submits a copy of the valid DSWD-issued Solo Parent ID.

Step 2: Filing of Parental Leave Application

- Employee submits Parental Leave request via the Zoho Leave Application Form.
- Requests must follow standard leave filing timelines unless otherwise approved by Management.

Step 3: Supervisor Review and Approval

- Immediate Supervisor reviews the request based on operational needs and approves or disapproves the leave.

Step 4: HRD and RTA Validation

- HRD and RTA verifies eligibility, remaining Parental Leave balance, and document validity.

Step 5: Recording and Payroll Coordination

- Approved Parental Leave is recorded as **paid leave**.
 - Payroll ensures the leave is not converted to cash and is properly reflected in attendance records.
-

Change in Eligibility Status

- Any change in the employee's status or circumstance that removes solo parent responsibility must be **immediately reported to HRD and RTA**

- Failure to disclose such changes may result in **corrective action up to and including termination**, depending on the circumstances.
 - Upon loss of eligibility, Parental Leave benefits shall cease.
-

Special Rules / Exceptions

- Parental Leave is **not convertible to cash** and cannot be carried over.
 - Unused Parental Leave credits are forfeited at year-end.
 - Management reserves the right to validate eligibility at any time.
-

Records / Outputs

- Approved Parental Leave Applications
- Copy of DSWD-issued Solo Parent ID
- Updated employee leave records

Your Guide to Solo Parent Leave

How to Apply for Your Leave

Apply via Zoho 7 Days in Advance

You must attach a copy of your Solo Parent ID to your application.

Emergency Leave is Possible Without Prior Notice

Approval and proper justification are required for emergency cases.

What Qualifies as an Emergency?

A child's
hospitalization

medical
emergencies

or natural disasters
affecting their
welfare.

Key Rules & Conditions

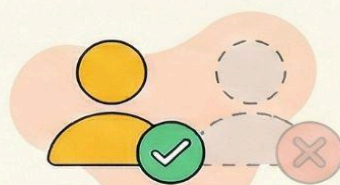

7 Paid Working Days Per Year

This leave is granted annually to eligible solo parents.

Use It or Lose It

Leave is non-cumulative and cannot be converted to cash if unused.

Eligibility Depends on Your Status

If you are no longer a solo parent, you become ineligible for this benefit.

Retraction Process

Standard Operating Procedure (SOP) for Walmart Support | Retraction Process

Purpose / Scope

This SOP provides employees with clear instructions on how to properly request a **retraction** using the Zoho. It ensures accurate workforce planning, avoids scheduling conflicts, and prevents unauthorized schedule changes. This applies to all employees who need to retract an **already submitted and approved leave request**.

Definition of Terms

Leave Retraction – A request submitted by an employee to cancel or withdraw a previously filed leave request that has not yet been taken.

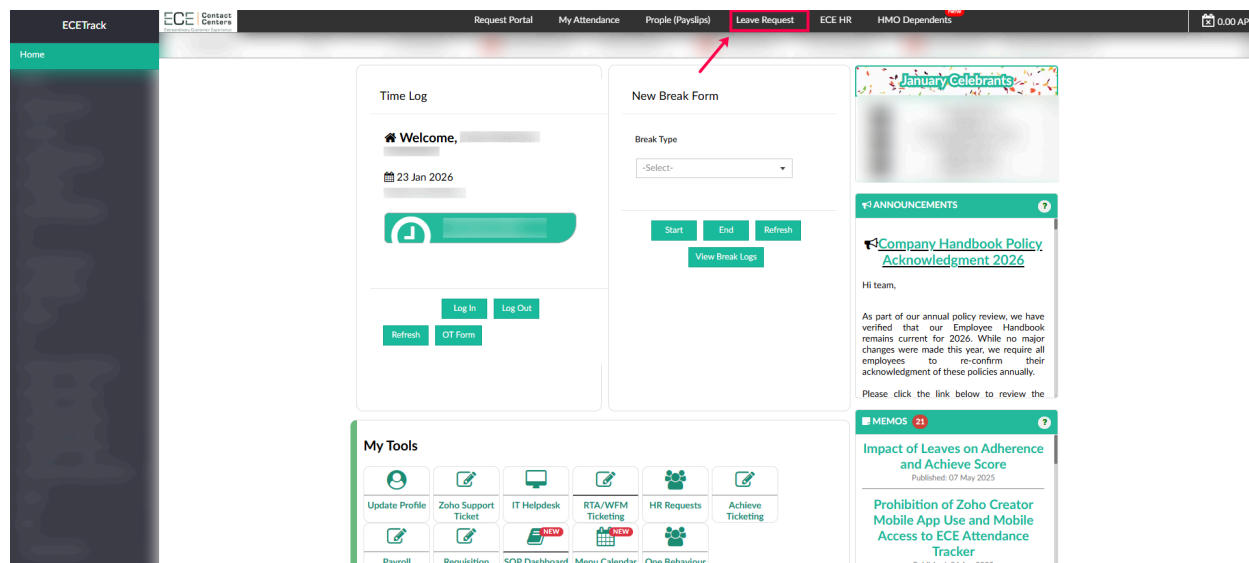

Zoho Leave System – The company-approved platform used for filing, approving, and managing leave requests.

Employee Responsibilities

Employees requesting leave retraction must:

- Submit the retraction request promptly and correctly
 - Ensure the leave has **not yet been taken**
 - Monitor the request status for approval or denial
 - Continue to follow the original approved schedule until the retraction is approved
-

Procedure – How to Submit a Leave Retraction Request

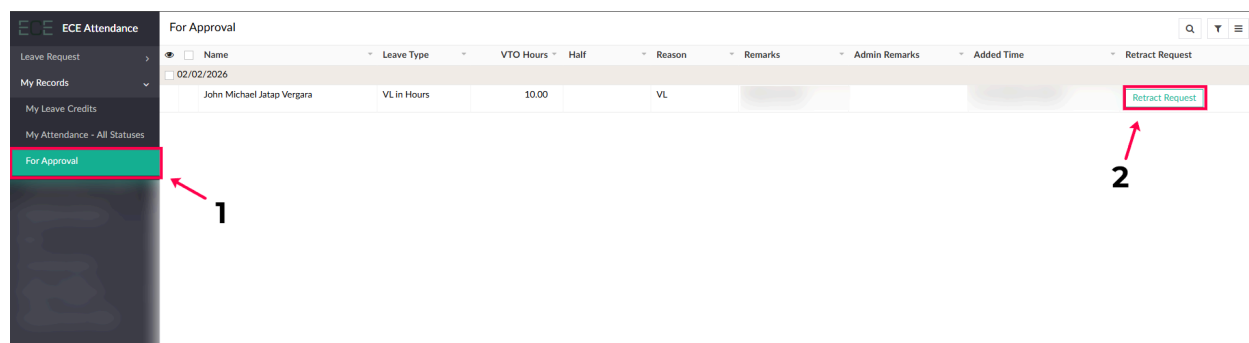

- Open a supported web browser (Google Chrome, Mozilla Firefox, or Microsoft Edge).
- Navigate to the **ECETTrack / Zoho Leave System** using the company-provided URL.
- Log in using your company credentials.

Step 1: Locate Your Leave Request

- Go to the **Leave Requests** or **My Leaves** section.
- Identify the leave request you want to retract.

Step 2: Submit the Leave Retraction

- Select the option to **Retract**, **Cancel**, or **Withdraw** the leave (depending on system labeling).
- Provide a clear and valid reason for the retraction (e.g., change in plans, operational need).
- Submit the retraction request.

Step 3: Wait for Approval Decision

- Once the retraction request has been submitted in the Zoho, the employee should notify the available RTA for them to review the request.
 - Do **not** assume the retraction is approved until you receive system confirmation.
-

Important Rules and Reminders

- Leave retractions are **subject to approval** and are not automatic.
 - Retraction only applies 24 hours before the filed date of leave.
 - Retraction requests may be **denied** if:
 - The leave has already been taken
 - Workforce coverage will be negatively impacted
 - There are scheduling conflicts
 - Employees must continue to follow the **original approved leave schedule** until the retraction is officially approved.
 - Unauthorized schedule changes without approved retraction may result in **attendance or payroll issues**.
-

Notifications and Status Updates

- Once a decision is made:
 - Approved retractions will automatically remove the leave from records.
 - Denied retractions will include a reason for denial.
 - Employees will receive **automated notifications** via the Zoho system.
-

Technical Issues and Support

- If you experience technical issues accessing the Zoho Leave System:
 - Report the issue immediately to the **IT Support Team**.
 - Inform your Immediate Supervisor if the issue affects your schedule.

Lactation Breaks Guidelines

Standard Operating Procedure (SOP) for Walmart Support | Lactation Break Process

Purpose / Scope

This SOP outlines the process for availing lactation breaks for breastfeeding employees. It applies to eligible nursing mothers and covers entitlement, proper usage, documentation, and compliance with company policy and labor regulations.

Roles & Responsibilities

Role	Responsibility
Employee	Avail lactation breaks responsibly, follow scheduling guidelines, and complete required documentation.
Company Nurse	Validate lactation breaks and sign the Lactation Form.
RTA / Operations Team	Monitor adherence to break limits and ensure proper recording.

Tools / Requirements

- Lactation Form
-

Procedure (Steps)

Step 1: Determine Lactation Break Eligibility

- Breastfeeding employees are entitled to 5 minutes of lactation break per working hour.
- Accumulated break time is as follows:
 - 8-hour shift: 40 minutes

- 10-hour shift: 50 minutes

Step 2: Schedule Lactation Breaks

- Lactation breaks must be taken within the clinic or at home for Work-from-Home (WFH) employees to ensure a safe and comfortable environment.
- The total lactation break time must not be taken all at once and should be divided into 2–3 milk expression sessions.

Step 3: Record Lactation Breaks

- Complete the Lactation Form accurately for each lactation break taken.
- Ensure the form is validated and signed by the Company Nurse for documentation and compliance.

Step 4: Observe Time Limits and Duration

- Lactation breaks may be availed for up to six (6) months from eligibility.

- Exceeding the allowed lactation break time will be considered an overbreak and the excess time will be deducted from salary.

Notes / Tips:

- Proper scheduling helps avoid workflow disruption.
- Always ensure documentation is complete and validated on the same day.

Exceptions & Escalation

Issue	Action	Escalate To
Exceeded allowed lactation time	Review break usage and record overbreak	RTA / Operations Team
Missing or unsigned Lactation Form	Coordinate validation immediately	Company Nurse
Clinic access issues	Report and seek guidance	Operations Team

Quality Check / Expected Result

- Lactation breaks are taken within the allowed time and location.
- The lactation form is properly completed and signed by the Company Nurse.
- No unauthorized overbreaks are recorded, ensuring compliance with policy.

Lactation Breaks

— Quick-Reference Guide —

Who is Eligible?

Breastfeeding Employees (Up to 6 Months)

Break Time Entitlement

- 8-Hour Shift  **40** Minutes Total
-  **50** Minutes Total

Taking the Break

- Use the Company Clinic
- Split into 2–3 Sessions

Record the Break

1. Fill Out Lactation Form
2. Get Nurse's Signature

Overbreak = Time Deducted from Salary

Incomplete Forms = Not Credited

Need Help?

Stay Compliant & Save Time!

Overtime (OT) Request/Process

Standard Operating Procedure (SOP) for Walmart Support | Overtime Request Process

Purpose/Scope

To define the standard process for requesting, approving, and documenting overtime work to ensure operational needs are met while maintaining compliance with company policies. This applies to all supports and agents.

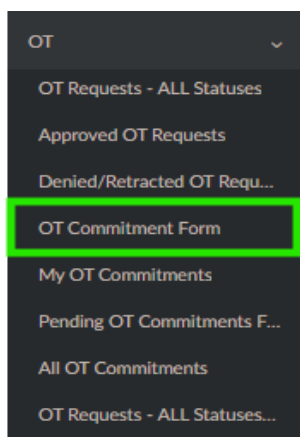

Definitions

- **Pre-Shift OT** – Overtime rendered before the agent's scheduled shift start.
- **Post-Shift OT** – Overtime rendered after the agent's scheduled shift end.
- **OT Commitment Form** – Required form confirming the agent's availability and agreement to render OT.

General Guidelines

(RDOT, Pre-Shift & Post-Shift)

1. Pre-Approval: All overtime must be requested and approved before the work is performed, except in emergency cases.
2. Deadlines: Requests must be submitted within 24 hours of the overtime worked if pre-approval was verbal.
3. Rendering overtime without prior approval is not allowed.
4. OT requests may be denied due to staffing sufficiency, budget limits, or performance considerations.
5. Approval is subject to operational demand.

Procedure Steps

Step 1: Filling an OT Confirmation Form

Login: Access your **Zoho OT Commitment Form**, an Overtime (OT) Commitment Form is typically used to document an employee's agreement to work extra hours, ensuring compliance with labor laws.

Login to Zoho Creator/ECETTrack. On the navigation bar, go to OT Tab. Then, select OT Commitment Form.

Note: The OT Commitment Form must be fully completed prior to the scheduled RDOT shift date.

Step 2: Fill up the necessary information

Employee details (Name, Lunch, Site, Account, ID) are sometimes auto-populated by the system.

Fill Details:

- Date: Select the date the OT will occur.
- Time Limit: Specify the number of hours (2 hours).
- Start Time: The time OT is scheduled to begin.
- End Time: Auto-calculated based on Start Time + Time Limit; not editable

The screenshot displays the ECETTrack OT Commitment Form. On the left is a dark sidebar with navigation links: Home, Views, Special View Tab, View Only, Payroll Adjustments, APS Reports, New APS Dashboard, OT (selected), OT Requests - ALL Statuses, Approved OT Requests, Denied/Retracted OT Requ..., OT Commitment Form (highlighted), My OT Commitments, Pending OT Commitments F..., All OT Commitments, and OT Requests - ALL Statuses.... The main content area is titled 'OT Commitment Form' and contains several input fields: 'Name' (with a dropdown arrow), 'Date of committed OT' (with a calendar icon), 'Time Limit' (with a '-Select-' dropdown), 'Start Time' (with a clock icon), 'End Time' (with a clock icon), and 'Notes/Remarks' (a large text area). Below these fields is a green box with the text 'I understand that by submitting this form, I am confirming my OT commitment.' followed by a checkbox labeled 'I Agree'. At the bottom right are 'Submit' and 'Reset' buttons.

to prevent errors.

- Notes/Remarks: Briefly state the project or task requiring extra time (urgent deliverable, system downtime recovery, etc.).

- Agreement Checkbox: Employee must tick this to acknowledge that OT is voluntary and subject to RTA approval.
- Submit: Click Submit.

Step 3: View Your Filed OT Requests

- After submission, go to the My OT Commitments tab.
- Here, you can track the status of your request:
 - Pending: Awaiting RTA review.
 - Approved: OT is confirmed.
 - Disapproved: OT request has been declined.

Step 4: Coordination with WFM / RTA

- Coordinate with WFM/RTA for:
 - Final validation
 - OT plotting in the system
- Ensure agents are informed of final approval status.

Rest Day Overtime (RDOT) Request

RDOT (Rest Day Overtime): Overtime rendered on an agent's officially scheduled rest day, subject to prior approval.

Step 1: Access the official RDOT Request Form/System (Zoho).

Step 2: Specific Details: Fill up the necessary fields.

OT Form

You may now file multiple requests for the same shift applicable to OTs not rendered continuously (i.e. Pre-Shift and Post-Shifts).

Name:

Date:

OT Type: ☐ Regular ☒ Rest Day

Lunch:

Scheduled Start Time:

Scheduled End Time:

No. of Hours:

OB:

☐ Client-Mandated - If you are on OT to cover for another agent, please do NOT tick the box.

Please add in your rates the time of coverage in EST. Example: 13:00 to 15:00

Note:

Please submit OT Form and your manager will approve it.

- A. Name: Sometimes auto-populated by the system.
- B. Date: Select the correct Shift Date.
- C. Overtime Type: Select "Rest Day" from the dropdown (if configured).
- D. Timing: Enter the "Start time" (23:00 PM) and "End time" (10:00 AM).

- E. Number of Hours: This will auto-calculate based on the Start Time and Time Limit.
- F. Reason: Detail the specific task or reason for rendering OT (System deployment required before staff arrival or Pre-meeting prep for international clients).

Step 3: Submit: Click Submit.

Pre-shift Overtime (OT) Request

Pre-shift Overtime refers to any work performed prior to the employee's officially scheduled shift start time.

Example: Starting at 7:00 AM when the shift starts at 9:00 AM

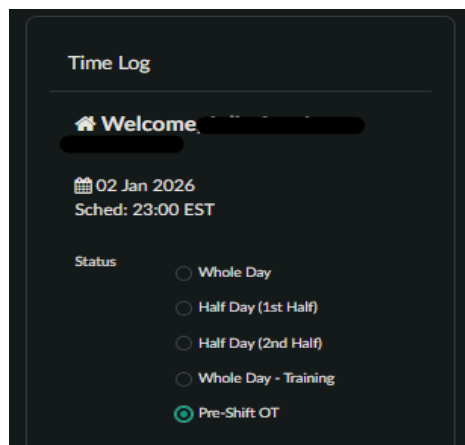

Policy Rules

- Prior Approval: All pre-shift OT must be submitted and approved at least 12 hours before the start of the early work.
- Productive Work: Employees must be at their workstations and actively working during this period; "commute time" or "early arrival for personal reasons" does not qualify.
- Grace Period: Early clock-ins of less than 15 minutes are generally considered "incidental" and do not require a formal OT request unless specifically instructed.

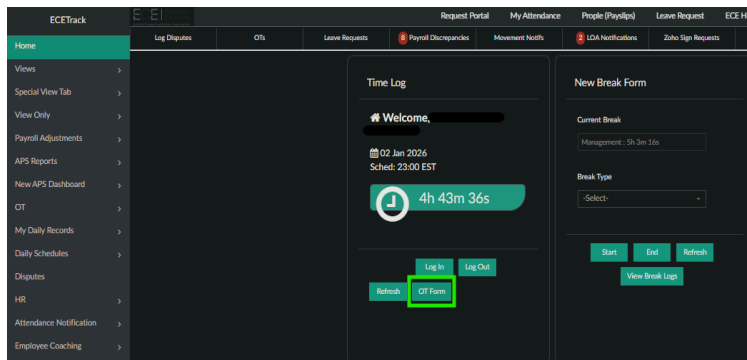

Procedure Steps

Submission

1. Open Zoho Tracker: **Log-in** and select **"Pre-shift"** from the dropdown. You may submit your Pre-Shift OT request after completing your shift.

2. Request Entry: Select **"Home"** on your ZohoTrack Homepage, and then **> OT Form**.

3. Specific Details: Fill up the necessary fields.

A. Name: Sometimes auto-populated by the system.

B. Date: Select the correct Shift Date.

C. Overtime Type: Select "Regular" and "Pre-Shift" from the dropdown (if configured).

D. Timing: Enter the "Start time" (07:00 AM) and "End time" (09:00 AM).

E. Number of Hours: This will auto-calculate based on the Start Time and Time Limit.

F. Reason: Detail the specific task or reason for rendering OT (System deployment required before staff arrival or Pre-meeting prep for international clients).

4. Submit: Click **Submit**.

● Overtime Execution

- Employees render overtime only during the approved schedule.
- Any deviation must be immediately reported to the TL or WFM.

● Documentation and Audit

- All approved OT requests must be properly documented.
- Records are subject to audit and compliance review.

- **Non-Compliance**

- Unauthorized or unapproved overtime may result in non-payment and/or disciplinary action.
- Repeated violations may be escalated to Operations or HR.

Revision and Review

- This SOP is subject to periodic review and updates based on operational or policy changes.

Post-shift Overtime (OT) Request

Post-shift Overtime is defined as authorized work performed immediately following the end of an employee's scheduled shift.

Example: Working until 7:00 PM when the shift ends at 5:00 PM.

General Policy

- Authorization: Employees should ideally receive verbal or written (Chat/Email) clearance from their supervisor before staying late.
- Minimum Duration: Only post-shift work exceeding 30 minutes or an hour qualifies for an OT request.
- Filing Deadline: Requests must be filed in Zoho by the end of the day following the OT work.

Procedure Steps

1. Open Zoho Tracker: Log-in and select “Whole Day” from the dropdown. You may submit your Post-Shift OT request after completing your shift.

The screenshot displays the ECETrack Zoho Tracker interface. On the left is a sidebar menu with options like Home, Views, Special View Tab, View Only, Payroll Adjustments, APS Reports, New APS Dashboard, OT, My Daily Records, Daily Schedules, Disputes, HR, Attendance Notification, and Employee Coaching. The main content area is divided into two panels. The left panel, titled 'Time Log', shows a welcome message, the date '02 Jan 2026', and the scheduled time '23:00 EST'. It features a large green clock icon displaying '4h 43m 36s' and buttons for 'Log In', 'Log Out', 'Refresh', and 'OT Form' (which is highlighted with a green box). The right panel, titled 'New Break Form', includes a 'Current Break' field showing 'Management : 5h 3m 16s', a 'Break Type' dropdown menu, and buttons for 'Start', 'End', 'Refresh', and 'View Break Logs'. At the top of the interface, there are navigation tabs for 'Request Portal', 'My Attendance', 'People (Payslips)', 'Leave Request', and 'ECE HR', along with status indicators for 'Log Disputes', 'OTs', 'Leave Requests', 'Payroll Discrepancies', 'Movement Notifs', 'LOA Notifications', and 'Zoho Sign Requests'.

2. Request Entry: Select “Home” on your ZohoTrack Homepage, and then > OT Form.

3. Specific Details: Fill up the necessary fields.
- A. Name: Sometimes auto-populated by the system.
 - B. Date: Select the correct Shift Date.
 - C. Overtime Type: Select "Regular" and "Post-Shift" from the dropdown (if configured).
 - D. Timing: Enter the "Start time" (05:00 PM) and "End time" (07:00 PM).
 - E. Number of Hours: This will auto-calculate based on the Start Time and Time Limit.
 - F. Reason: Detail the specific task or reason for rendering OT (Delayed server migration or Unscheduled client emergency call).

4. Submit: Click **Submit**.

● Cancellation or Changes

- If you can no longer render approved OT, inform your TL immediately.
- Changes to approved OT require re-approval.

● Non-Compliance

- Unapproved overtime may not be paid.
- Repeated violations may result in disciplinary action.

Support

- For questions or concerns about overtime requests, please contact your Team Lead or WFM/RTA on shift.
-

Schedule Change Request

Standard Operating Procedure (SOP) for Walmart Support | Schedule Change Request

Purpose/Scope

To define the standard process for requesting, reviewing, approving, and documenting schedule changes while ensuring operational coverage and compliance with company policies. This SOP applies to all employees.

Types of Schedule Changes Covered

- Shift time change
- Swap of working days or rest days
- Temporary or permanent schedule adjustment
- One-time schedule modification due to operational or personal reasons

Guidelines

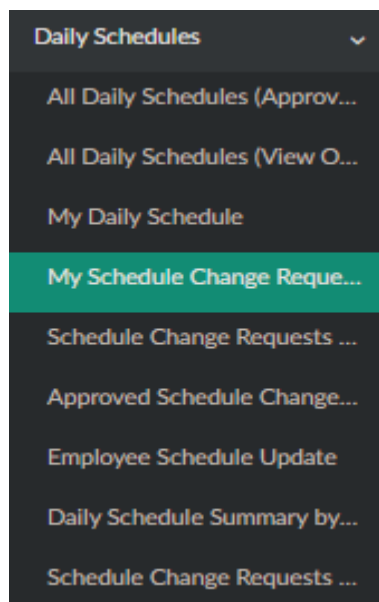

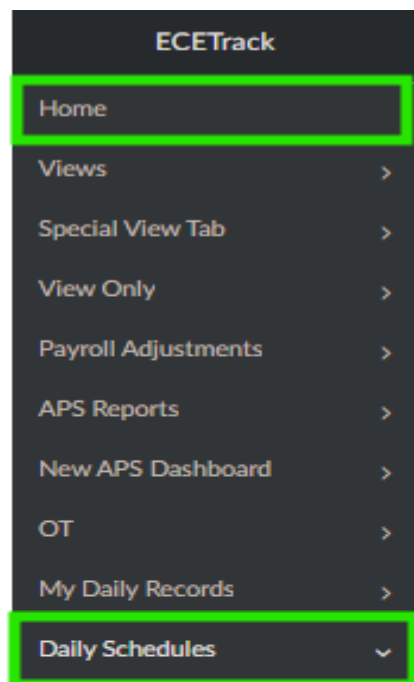

- All schedule change requests must be filed in advance.
- Schedule changes are subject to approval based on staffing needs.
- Do not follow a new schedule unless it is officially approved and communicated.

How to File a Schedule Change Request?

Submit Schedule Change Request

1. Access the official Schedule Change Request Form/System (Zoho/ECETrack).

Navigate to **Daily Schedules**, then click the **My Schedule Change Request** tab.

>>> Once you are in your My Schedule Change Request Page, Click the green plus sign on your upper right hand corner.

My Schedule Change Requests

Q

+

ID	Retract	Status	Employee	From	To	WHPD	Schedule Start	Schedule End	Requested WHPD	Requested Schedule Start	Requested Schedule End	Reason Note
1479919000311922145	Retract	Approved	[REDACTED]	03 Jan 2026	17 Jan 2026	10.00	23:00	10:00	10	23:00	10:00	Update schedule

2. Complete all required details:

- Full name
- Requested new date schedule (FROM and TO)
- Working Hours per Day (8 or 10)
- New time Schedule (START and END) make sure to follow what is in the Transition Workbook.
- Reason Note: You may add/use screenshot (imgur)
- Rest Day: Just check the correct days according to the transition Workbook.
-

3. Attach any required supporting documents, if applicable.
4. Submit the request within the prescribed timeline.

The screenshot shows the 'ECETTrack' interface for a 'Schedule Change Request'. On the left is a sidebar with navigation links: Home, Views, Special View Tab, View Only, Payroll Adjustments, APS Reports, New APS Dashboard, OT, My Daily Records, Daily Schedules (expanded), All Daily Schedules (Approv...), All Daily Schedules (View O...), My Daily Schedule, My Schedule Change Reque..., and Schedule Change Requests ... The main form area contains the following fields and options:

- Employee:** A dropdown menu with a clear button (x).
- Account:** A dropdown menu showing 'Walmart' with a clear button (x).
- Reason Note:** A large text area for providing details.
- Rest Day:** A series of checkboxes for Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, and Saturday.
- From/To:** Two date pickers labeled 'From' and 'To' in 'dd MMM yyyy' format.
- Working Hours per Day:** A dropdown menu currently set to '0'.
- Schedule Start/End:** Two time pickers both set to '00:00'.
- Mark this Day as Rest Day:** A checkbox.
- Part-Timer:** A checkbox.
- Submit/Reset:** Two buttons at the bottom right of the form.

Wait for Approval

- Continue following your current schedule until approval is confirmed.
- Monitor Zoho or official channels for updates.

Follow Approved Schedule

- Once approved, strictly follow the new schedule.
- Any deviation must be reported immediately to your TL.

Coordination with WFM / RTA

- Endorse approved requests to WFM / RTA for validation and plotting.
- Coordinate with WFM/RTA to confirm final schedule changes.

Compliance and Monitoring

- Unauthorized schedule changes are not allowed.

- Non-compliance may result in attendance points or disciplinary action.
 - All schedule changes are subject to audit.
-

Support

For questions or clarifications:

- Agents should contact their Team Lead
 - TLs should coordinate with WFM / RTA on shift
-

Attendance Notification

Standard Operating Procedure (SOP) for Walmart Support

| Submitting an Attendance Notification

[Step-by-step Guide for Submitting of Attendance Notification](#)

Purpose

To define the standard process for submitting, reviewing, and documenting attendance-related notifications in Zoho to ensure accurate tracking, proper escalation, and compliance with company attendance policies. This SOP applies to all employees.

Attendance Notifications Covered

- Late login
- Early logout
- Absence / No show
- System or connectivity issues
- Emergency attendance concerns

Guidelines

1. Attendance notifications must be submitted in Zoho on the same day of occurrence.
2. Notifications must include complete and accurate details.
3. Failure to submit a proper notification may result in attendance points or disciplinary action.

Responsibilities

- Employees must notify their immediate supervisor or the designated attendance reporting channel (Batphone, email, or any approved method).
- Immediate supervisors/RTAs must log any reported attendance notifications into the Zoho Attendance Notification Form if the employee fails to do so.

How to Submit Attendance Notification in Zoho

Employee Notification

- Employees must inform their immediate supervisor/RTA or use Batphone as soon as they become aware that they will be late or absent.
- Notifications must be made at least 2 hours before and 2 hours after that s/he will be out of work.
- If an employee fails to notify, it will be considered a No Call No Show (NCNS), which may lead to disciplinary action.

D. No-Call, No-Show

An employee who fails to observe the notification procedure in section C above and who fails to inform their Supervisor of their tardiness or absence from work at least two (2) hours before and two (2) hours after the start of their shift shall be considered to be on No-Call, No-Show (NCNS), hence absent, and will be dealt with accordingly.

Step 1: Access Zoho Attendance Notification Form

All notifications must be recorded in the Zoho Attendance Notification Form by either the employee or the immediate supervisor/RTA if the employee is unable to do so.

A. Log in to Zoho Creator / Zoho Attendance Tool.

B. Select Attendance Notification Form.

Important Announcement: Zoho Attendance Notifications

To maintain accuracy in attendance tracking and ensure proper documentation, all attendance-related notifications must be **logged in Zoho Attendance Notifications**. This includes any notifications sent by an agent or employee through **Batphone** or relayed via their **immediate supervisor** (SMS, social media, or call).

Why is this Important?

- ✓ **Ensures accurate attendance records** – Proper logging allows us to track attendance efficiently and minimize discrepancies.
- ✓ **Streamlines workforce management** – Real-time updates help RTAs and Ops in managing schedules, replacements, and productivity.
- ✓ **Prevents unlogged attendance issues** – Reduces instances where an agent's notification is missed due to lack of proper documentation.

Action Steps:

- 1 All notifications must be recorded in Zoho Attendance Notifications** – Whether the employee informs through Batphone or via their **immediate supervisor**, make sure the details are logged.
- 2 RTAs should be informed and aligned** – RTAs play a crucial role in monitoring attendance, so ensure they are updated with any notifications received.

By following this process, we ensure transparency, efficiency, and accountability in attendance management. Let's work together to maintain smooth operations.

Thank you for your cooperation!

- Required details to be filled out:
 - Employee Name
 - Channel of Notification (Batphone, Direct Message, Email, Supervisor Report, etc.)
 - Type of Notification (Absent or Late)
 - Reason for Absence or Tardiness (Personal, Medical, Emergency, etc.)
 - Expected Return Date (if applicable)
 - Additional Notes/Reasons (Supporting Documents, Expected Delays, etc.)

Agent Responsibilities After Submission

- Continue following instructions from TL or Operations.
- Respond promptly to any follow-up or clarification requests.
- Ensure future compliance with attendance policies.

Escalation and Coordination

- Escalate attendance issues to Operations (Immediate Support/TL/STL/OM) / Workforce Management Team (WFM/RTA), if required.
- Coordinate with RTA/WFM for plotting and documentation.

Compliance and Monitoring

- Incomplete or late submissions may be tagged as unexcused.
- All attendance records are subject to audit.
- Repeated violations may result in disciplinary action.

WFM / RTA Ticket

Standard Operating Procedure (SOP) for Walmart Support | WFM/RTA tickets Process

Purpose/ Scope

The purpose of this SOP is to establish a standardized and organized process for requesting, creating, and handling **any RTA-related requests** through WFM/RTA tickets. This includes, but is not limited to:

- Offline activities (coaching, training, team huddles)
- Lunch movement requests
- Schedule change requests
- Schedule swaps
- Bidding-related requests
- Any other workforce or real-time support requests managed by RTA

This SOP ensures proper documentation, accuracy, and cleanliness of ticket requests, allowing the RTA team to efficiently review, validate, and take action using Zoho.

This SOP applies to all support staff who are required to submit WFM/RTA-related requests and to the RTA team responsible for monitoring and processing these requests.

Roles & Responsibilities

List the key roles involved.

Role	Responsibility
Support / TL	• Submit accurate and timely ticket requests • Ensure complete details and supporting documents are provided • Follow timelines stated in this SOP

- RTA (Real-Time Analyst)
- Review and validate submitted tickets
 - Coordinate and update schedules accordingly
 - Resolve or escalate issues as needed
-

Tools / Requirements

[Zoho Ticketing System](#)

Procedure (Steps)

Step 1: Identify the Type of RTA Request

Support must first identify the nature of the request, such as:

- Offline activity (coaching, training, team huddle)
- Lunch movement
- Schedule request or adjustment
- Schedule swap
- Bids-related request
- Other RTA-related concerns

Step 2: Ticket Request Timing **ADD SCREENSHOTS**

- All RTA-related requests must be submitted **at least one (1) hour before** the intended effective time.
- For planned activities (e.g., coaching, training, lunch movement), advance notice is required.

Example:

- If the request affects the schedule at **1:30 PM**, the ticket must be submitted **on or before 12:00 PM**.

Step 3: Create the Ticket in Zoho

To create a ticket, proceed to the [RTA/WFM Ticketing System](#). When creating the ticket, ensure the following details are clearly provided:

RTA/WFM Ticketing System

Requester's Details

Employee: Jomari Urfe Ponpon Garces ✕ Site: Dumaguete ✕

ECE ID: ECE007941

Request

Date of Request: 31-Jan-2026 Categories: -Select- Upload Documents:

Account: -Select- Topic: (e.g., Offline Activity, Data Request, Bro)

Due Date: dd-MM-yyyy Description: Reason: Specify the activity (e.g., "Weekly Coaching," "Team Huddle," "System Issue").
Affected Staff: List the Name(s) of the Agent(s).
Timeframe: Start and End time of the activity.
eg. 00:00 - 01:00

Document 1: Select File Document 2: Select File Document 3: Select File Document 4: Select File

Submit **Reset**

Type of RTA request (e.g., Lunch Movement, Schedule Swap, Coaching)

- **Date and exact time affected**
- **Duration** or impact timeframe
- **Reason or justification** for the request
- **Name of requester** and team
- Any approvals required (if applicable)

Step 4: Attach Supporting Documents (If Applicable)

Attach screenshots or proof for requests or issues such as:

- Internet connectivity problems
- Zoho system or tool errors
- Approved schedule changes or swaps

Step 5: Submit and Monitor Ticket

- Submit the ticket through Zoho.
- Monitor the ticket status for updates or questions from RTA.
- Respond promptly if additional clarification or documentation is requested.

Step 6: RTA Review and Action

- RTA reviews the ticket for completeness and compliance with guidelines.
 - RTA approves, denies, or adjusts the request based on operational needs.
 - Any action taken is documented in the Zoho ticket.
-

Notes / Tips

- *Incomplete or late ticket submissions may result in delays or denial of the request.*
 - *Always double-check time and date accuracy before submitting.*
 - *Use clear and professional language when describing the request.*
-

Exceptions & Escalation

- If issues occur (e.g., inability to submit a ticket, Zoho downtime, internet issues), support may directly contact any available RTA.
- Escalation is allowed **only when** supporting documents (e.g., screenshots of errors or connectivity issues) are provided.
- Repeated non-compliance may be escalated to the Team Lead or Operation Manager.

Quality Check / Expected Result

To confirm the task was completed correctly:

- The ticket was submitted within the required timeframe.
- All required fields and details are complete and accurate.
- Supporting documents are attached when applicable.
- RTA acknowledgment or approval is recorded in Zoho.

Expected Result:

- Offline activity is properly documented and reflected in workforce scheduling or REST Tool

Workforce Logs

Standard Operating Procedure (SOP) for Walmart Support

| Workforce RTA Logs (Site-Wide, Account-Wide, Employee-Specific)

Purpose / Scope

- This SOP defines the standardized process for documenting, tracking, and escalating operational anomalies through the Workforce RTA Logs. It ensures visibility, accountability, and timely response to service-level risks, employee compliance issues, and technical disruptions.
 - This SOP applies to all Workforce RTAs responsible for real-time monitoring and intraday management across all sites and accounts.
-

Roles & Responsibilities

Role	Responsibility
RTA	Identify issues, log incidents, attach evidence, and escalate when required.
Team Leader (TL)	Act on employee-specific logs (coaching, NTE/NOD)
Senior TL (STL)	Ensure resolution and compliance
Operations Manager (OM)	Address site-wide/account-wide risks
IT / WFM	Resolve technical or system-related issues

Tools / Requirements

- Zoho Creator – ECETrack Workforce RTA Logs
 - Company email
 - Monitoring tools (InContact, ServiceNow, Latte)
 - Supporting evidence (screenshots, AUX reports, chat logs)
-

Types of RTA Logs

Each entry in the RTA Logs must be categorized according to the scale of the impact:

1. **Site-Wide**
Used when the situation affects the entire site or a large population across multiple accounts.
Example: Regional power outage or building-level internet disruption.
2. **Account-Wide**
For issues specific to a program or client account.
Example: A tool outage affecting only the XYZ client account or SLA drops on ABC program.
3. **Employee (Specific)**
Used for incidents involving a specific team member.
Example: Agent caught sleeping or an internet issue at a home-based workstation.

Categories and Sub-Categories

Main Category	Sub-Category	Description
Service Level & Volume Management	SLA Escalation – P1 (85%)	SLA dips below 85% for more than 15 minutes.
	SLA Escalation – P0 (60%)	SLA dips below 60% in any 15-minute interval.
	High Abandonment Rate	ABN rate exceeds threshold per account standards.
	Understaffing Alert	Real-time headcount drops below required levels.
	Overstaffing Alert	Headcount significantly exceeds intraday requirement.
	Queue Surge / Low Queue Alert	Sudden rise or drop in volume that's not forecasted.
Agent Behavior & Compliance	Post Abandonment	Agent logs out or disconnects while on a live contact.
	Sleeping	Agent inactive and unresponsive during live monitoring.

	Unauthorized Use of Cellphone	Agent caught using phone during shift.
	Unscheduled Break / Idle Time	Taking breaks beyond allowed or no active state for prolonged period.
	Extended Non-Productive AUX	Staying in non-productive states too long (e.g., Break, Meeting).
	Accessing Non-Working Related Sites	Visiting websites that are not related to your job or work responsibilities during working hours or while using company equipment or networks.
	Possible Protraction / Work Delay	Delay caused by internal or external blockers.
Technical & Infrastructure Issues	Power Outage	Complete loss of electricity affecting agent(s).
	Internet Outage	Agent unable to connect due to connectivity issues.
	Tools Outage	Specific systems or platforms are down (e.g., Salesforce, Zendesk).
	Latency Issues	Application lagging or slowing down productivity.
	Headset / Device Failure	Hardware problems (broken mouse, headset, keyboard).
Process & Work Disruptions	Possible Protraction / Work Delay	Delay caused by internal or external blockers.
	Workforce System Downtime	Zoho, Genesys, WFM tools become inaccessible or malfunction.
	System Maintenance Impact	Known/planned maintenance that interrupts work hours.

Procedure (Steps)

Step 1: Identify the Situation

Monitor intraday performance and agent behavior.

Proceed when:

- SLA or ABN thresholds are breached
- Behavioral/compliance violations occur
- Technical or infrastructure issues impact operations

Step 2: Select the Log Type

Go to this link: [Zoho Workforce RTA Logs](#)

Choose the correct scope:

- Site-Wide – Entire site or multiple accounts ([Step-by-step filling guide](#))
- Account-Wide – Specific program ([Step-by-step filling guide](#))
- Employee-Specific – Individual employee ([Step-by-step filling guide](#))

Step 3: Complete the Log Form

Fill in all required fields:

- **Date and Time of the Incident** – When the issue occurred.
- **Site and/or Account Affected** – Clearly indicate where the issue happened.
- **Type of Log** – Confirm it is Site-Wide or Account-Wide.
- **Category / Sub-Category** – Based on the nature of the incident.
- **Detailed Description** – Briefly describe the situation, how it was discovered, what was observed, and any relevant context.
- **Action Taken by RTA or Operations** – Note any immediate steps, communication, escalation, or resolution attempts.
- **Status** – Choose one:
 - **Resolved** – if fully addressed
 - **Ongoing** – if still being monitored or partially resolved
 - **Escalated** – if forwarded to IT, Ops, or Management for action

IMPORTANT NOTES:

- *Site-Wide / Account-Wide: Status field is mandatory*
- *Employee-Specific: Recommendation field is required*

Step 4: Attach Evidence (if applicable)

Upload:

- Screenshots
- System/AUX logs
- Chat transcripts

Step 5: Submit and Monitor

- Submit the entry
- Continue monitoring
- Update the same log until fully resolved

Step 6: Operations Action

For employee-specific logs:

- TL/OM receives notification
- Actions taken via:
 - NTE/NOD button
 - Coaching button
- RTA validates completion (column updates to Yes)

Exceptions & Escalation

Issue	Action	Escalate To
SLA P0 / Tool outage	Immediate logging & call-out	OM / IT
Repeated agent violations	Log + evidence	TL / STL
No action after 5 days	Follow-up & document	Manager

Quality Check / Expected Result

- Correct log type selected
- Complete and accurate details
- Evidence attached when applicable
- Status updated and closed properly

Records / Outputs

- Workforce RTA Log entry
- Email notifications

- NTE/NOD or Coaching records

3 Complete the Log Form

Fill in all required fields:

- 1 **Date and Time of the incident**
- 1 **Site and/or Account Affected**
- 1 **Type of Log:** – (Onfrant step-by-step guide)
- 1 **Category / Sub-Category** – Detailed Chavlos2
- 1 **Detailed Description** – (pticfy deacrise the situation, heav a exee distoveret, what wids IDI, and any selet and context.
- 1 **Action Taken by RTA or Operations**

IMPORTANT NOTES:

- Site-Wide / Account-Wide: Status field is mandatory
- Employee-Specific: Recommendation field is required

4 Attach Evidence (if applicable)

Upload:

- 1 Screenshots
- 1 System/AUX logs
- 1 Chat transcripts

5 Submit and Monitor

- ✓ Submit the entry
- ✓ Continue monitoring
- ✓ Update the same log until fully resolved

IMPORTANT NOTES:

- Site-Wide / Account-Wide: Status field is mandatory

6 Operations Action

For employee-specific logs:

- TL/OM receives notification

NTE/NOD button

Coaching button

- ✓ RTA validates completion (column updates to Yes)

 Employee-Specific

Standard Operating Procedure (SOP) for Walmart Support |How to Log Workforce RTA Logs (Employee-Specific)

Step 1: Access the [Workforce RTA Log System](#)

- Open your preferred web browser.
- Go to the designated [Workforce RTA Log Form](#).

Step 2: Select Type of Log

- Choose **"Employee-Specific"** as the type of log entry.

Workforce RTA Logs

Select from the following: ☐ Site Wide ☐ Account Wide ☒ Employees

Site	-Select-	Operations Manager	-Select-
Account	-Select-	Senior Team Leader	-Select-
Employee	-Select-	Team Leader	-Select-

Submit

Reset

Step 3: Identify the Employee

- Select the **Employee's Name** from the dropdown or input field.
- Select the **Site and Account** where the employee is assigned.

Step 4: Choose the Appropriate Category and Sub-Category

Under **Agent Behavior & Compliance**, select the relevant sub-category:

- **Post Abandonment** – Agent disconnected/logged out during active contact.
- **Sleeping** – Agent inactive and unresponsive.
- **Unauthorized Use of Cellphone** – Agent caught using a phone while on duty.
- **Unscheduled Break/Idle Time** – Agent took excessive or unscheduled breaks.
- **Extended Non-Productive AUX** – Agent stayed too long in non-productive states, including:
 - Prolonged After Call Work (ACW)
 - Prolonged Average Handle Time (AHT)
 - Unauthorized usage of offline AUX
 - Logging out without approval
 - Any of the above that negatively affected the SLA

Step 5: Fill in the Incident Details

Provide the following information:

- **Date and Time of the Incident** – When it happened.
- **Category/Sub-Category** – Based on the agent's behavior.
- **Detailed Description** – Include what was observed or reported, how it was confirmed (screenshots, chat logs, etc.), and any relevant patterns of behavior.

Step 6: Upload Supporting Documents

- Upload any evidence to support the log:
 - **Screenshots**
 - **Chat or system logs**
 - **AUX reports**
- **Recommendation:** Attach an **NTE/NOD** recommendation or **coaching documentation** if applicable.

Step 7: Submit the Log Entry

- Double-check all fields.
- Click **Submit** or **Save** to log the report.

Step 8: Monitoring and Operations Action

- Once submitted, the **Operations Team (TL, STL, Managers)** will receive an automated **email notification** about the RTA log.
- The **Ops Team must respond** by issuing an:
 - NTE (Notice to Explain) or NOD (Notice of Disciplinary Action)
 - Logging a coaching session

Once submitted, the Operations Team (TL, STL, Managers) will receive an email alert with the report.

Within the email/system, they can:

Click “NTE/NOD” to issue a disciplinary citation.

Click “Coaching” to log a coaching form.

All Workforce Logs											
	NTE/NOD	Coaching	Recommendat...	NTE/NOD Sent	Coaching Sent	NTE/NOD S...	Coached	Category	Sub-Categories	Site	Account
☐ Site Wide	NTE/NOD	Coaching		NTE/NOD Sent	Coaching Sent	No	No	Technical & Infrastructure Issues	Power Outage	Manila	RTA
☐ Employees	NTE/NOD	Coaching	NTE/NOD	NTE/NOD Sent	Coaching Sent	No	No	Agent Behavior & Compliance	Extended Non Productive AUX	Manila	RTA
											Salcedo Joriz Cometa Cruz

Accountability:

- ❖ The Immediate Supervisor (e.g., TL) is solely responsible for ensuring the incident is addressed.
- ❖ If the immediate supervisor is unavailable, responsibility follows the hierarchy (STL, then Manager).
- ❖ The Immediate Supervisor is expected to act within 5 calendar days from the date the RTA log was submitted.
- ❖ Failure to act within 5 days will result in the Immediate Supervisor being held accountable and cited for **negligence**.
- **RTAs will monitor** if the action has been completed and document the follow-up on the same entry if needed.

Who Contacted, When, How Used

F. Monitor & Resolve Issue

Follow up until issue is resolved.

Update RTA Logs:

Action Taken
Resolution Time
Final Outcome

Site/Account Wide-Specific

Step 2: Select the Log Type

- Choose either:
 - **Site-Wide** – if the issue affects an entire site or multiple accounts.
 - **Account-Wide** – if the issue is isolated to a specific account or program.
-

Step 3: Identify the Affected Entity

- For **Site-Wide**: Select the specific **site name** from the dropdown.
 - For **Account-Wide**: Select the **account name** or **program** affected.
-

Step 4: Choose the Correct Category and Sub-Category

- Use the predefined categories:
 - Service Level & Volume Management
 - Agent Behavior & Compliance
 - Technical & Infrastructure Issues
 - Process & Work Disruptions
 - Then select the **appropriate sub-category** that best describes the situation.
-

Step 5: Provide Incident Details

Fill in the required fields with the following:

- **Date and Time of the Incident** – When the issue occurred.
- **Site and/or Account Affected** – Clearly indicate where the issue happened.
- **Type of Log** – Confirm it is Site-Wide or Account-Wide.
- **Category / Sub-Category** – Based on the nature of the incident.
- **Detailed Description** – Briefly describe the situation, how it was discovered, what was observed, and any relevant context.
- **Action Taken by RTA or Operations** – Note any immediate steps, communication, escalation, or resolution attempts.
- **Status** – Choose one:
 - **Resolved** – if fully addressed
 - **Ongoing** – if still being monitored or partially resolved
 - **Escalated** – if forwarded to IT, Ops, or Management for action

Step 6: Submit and Monitor

- Click **Submit** or **Save** once all fields are filled out.
- **Continue monitoring** the situation even after logging.
- If the issue persists or changes status, **update the same log entry** with the new developments until fully resolved.

Employee Movement

Standard Operating Procedure (SOP) for Walmart Support |Employee Movement Processing

Purpose / Scope

This SOP outlines how Workforce RTAs process employee movements such as promotions, demotions, account transfers, floating status, and leadership changes through Zoho HR Movement Forms. Applies to all Workforce RTAs handling movement requests from Operations.

Roles & Responsibilities

Role	Responsibility
Operations Team	Submit WFM ticket with complete details
RTA	Validate request and submit HR Movement Form
Workforce Manager	Validate exceptions and urgent cases
HR	Final processing and records update

Tools / Requirements

- WFM Ticketing System
 - Zoho HR Movement Form
 - Supporting documents (approval emails, memos)
-

Procedure (Steps)

Step 1: Receive WFM Ticket

Operations submits ticket with:

- Employee name & ID
- Movement type
- Effective date
- Supporting documents

RTA/WFM Ticketing System

Requester's Details

Employee: John Michael Jatap Vergara x Site: Manila x
ECE ID: ECE005825

Request

Date of Request: 04-Jan-2026
Account: Walmart x
Due Date: 04-Jan-2026
There are 57 Tasks due on the selected Target Date

Categories: Movement Form x
Topic: Movement Request
Description: Employee name & ID: 00001 Juan Dela Cruz
Movement type: Change of Account/Change of Team/Change of Position
Effective date: Most urgent time

Upload Documents:
Document 1: Select File
Document 2: Select File
Document 3: Select File
Document 4: Select File
*If needed:

Submit Reset

All highlighted fields are required.

Step 2: Validate Request

RTA reviews tickets for accuracy.

- If incomplete → return to Operations
- If invalid → escalate to Workforce Manager/RTA Team Lead

Step 3: Submit HR Movement Form

Input validated details into Zoho. [Guided Standard Operating Procedure \(SOP\) for HR Movement Notification Form](#)

Remember:

- The account should always be **Walmart**.
- If the employee belongs to another account, coordinate with the RTA of that account to ensure a smooth transition.
- Always coordinate with the Scheduler/Staffing POC.

Special Scenarios

- Change of Account: Receiving program RTA processes
- Floating/BENCH: Previous account RTA processes
- Bulk Movements: Consolidated ticket required/Only for mass changes

Step 4: Follow-Up & Closure

- Monitor processing
 - Update WFM ticket
 - Close ticket once completed
-

Exceptions & Escalation

Issue	Action	Escalate To
Incomplete ticket	Request correction	Operations
Urgent movement	Priority handling	Workforce Manager
Payroll discrepancy	Coordinate correction	Discrepancy POC

Quality Check / Expected Result

- Correct movement reflected in system
 - Accurate effective date
 - Ticket properly closed
-

Records / Outputs

- HR Movement Form
 - Updated employee records
 - Closed WFM ticket
-

FOR SUPPORT VIEW

Resignation/Termination

Standard Operating Procedure (SOP) for Walmart Support

|Resignation & Termination Processing

Purpose / Scope

This SOP ensures accurate, compliant, and timely processing of **employee resignations and terminations** through Zoho, coordinating with HR and Operations. Applies to all Workforce RTAs.

Roles & Responsibilities

Role	Responsibility
Operations	Acknowledge resignation / initiate termination
RTA	File resignation/termination in Zoho
HR	Final validation, exit processing
Employee	Submit formal resignation letter

Tools / Requirements

- Zoho Resignation/Termination Form
 - Official resignation letter
 - APS records, ACHIEVE scores
-

Procedure (Steps)

Step 1: Notification

- Employee submits resignation letter (Email)
- Workforce RTA & HR must be CC'd
- Verbal resignations are **not accepted**

Step 2: Validate Details

Confirm:

- Last working day
- Reason
- Personal email & contact number
- APS points & ACHIEVE scores
- Rehire eligibility

Step 3: File in Zoho

- Access **HR** → **Resignation/Termination Form**
- Complete all required fields
- Submit for HR processing

Step 4: Confirmation & Record Keeping

- Send screenshot of submission to HR & Operations
- Monitor approval status
- **Update BH Roster** (Agent List, Daily team assignment and all agent active list tabs)
- Reply to Email for confirmation

Exceptions & Escalation

Issue	Action	Escalate To
No resignation letter	Document & proceed	HR
Disputed dates	Verify before filing	HR / Ops

AWOL cases

Process as termination HR

Quality Check / Expected Result

- Accurate resignation/termination date
 - Complete employee details
 - HR acknowledgment received
-

Records / Outputs

- Zoho resignation/termination entry
 - Email confirmations
 - HR exit documentation
-

 Standard Operating Procedure (SOP) for Workforce Real-Time Analyst (RTA)_020...

 Dispute

Standard Operating Procedure (SOP) for Walmart Support

|Disputing

[Step-by-step Guide on how to file dispute](#)

Purpose

This SOP defines the proper handling, validation, and approval of employee disputes related to **break taggings** and **log-in/log-out records**. It ensures accurate timekeeping, fair resolution, and compliance with scheduling and attendance policies.

This SOP applies to:

- All employees submitting time-related disputes
- RTAs acting as **dispute approvers**
- Team Leads providing supporting confirmation when necessary

As an **RTA**, your role is to act as the **approver and validator** of disputes. Approval is not automatic and must be based on strict verification.

RTAs are responsible for ensuring that:

- Submitted proofs are **valid, clear, and timestamped**
- All dispute details are **accurate and aligned with proof**
- Approved time adjustments correctly reflect the employee's actual work time

Types of Disputes

A. Break Disputes

Definition:

Break disputes relate to **specific taggings**, such as:

- Breaks
- Meetings
- Coachings
- Other offline activities

Purpose:

To confirm that the employee:

- Returned on time from the activity
- Properly resumed work
- Was incorrectly tagged or affected by a system issue

Key Objective:

Ensure that productivity and task tracking are accurate.

B. Time Log Disputes

Definition:

Disputes filed when an employee's actual log-in or log-out time was **not properly captured** by Zoho.

Purpose:

To correct:

- Missing log-ins or log-outs
- Errors caused by tool or connectivity issues

Dispute Filing Requirements

All disputes **must include timestamped proof** showing that the employee:

- Was present and working
- Returned from break or activity on time
- Logged in or logged out as scheduled
- Filed within **5 Days**

Disputes without proof should not be approved.

A. Hierarchy of Acceptable Proofs

RTAs must evaluate proof using the following priority order:

1. **IC (In-Contact) Stamps**
 - Highest and most reliable proof

2. Messages Showing Availability or Return

- Chat messages confirming the employee is back

i. Issue Tracker

- Must include visible timestamps

3. Screenshot of Issue Encountered

- Login errors, tool issues, system downtime
- Date and time must be visible

4. Team Lead Vouch

- Confirmation from the employee's Team Lead
- Used **only if higher-priority proofs are unavailable**

B. RTA Validation Checklist (Mandatory)

Before approving any dispute, the RTA must verify **all** of the following:

- ✓ **Date** matches the disputed shift date
- ✓ **Scheduled start and end of shift** are correct
- ✓ **Working hours per day** are accurate
- ✓ **Log status** (Whole Day, Half Day, etc.) is appropriate
- ✓ **Time In and Time Out** exactly match the proof provided
- ✓ **Reason selected** aligns with the proof and explanation
- ✓ **Filed within 5 days** of disputed date

⚠ Time In or Time Out must NOT be adjusted unless it exactly matches the timestamp shown in the proof.

C. Approval Guidelines

A dispute may be **approved** only if:

- Proof is valid and follows the proof hierarchy
- All form fields are accurate and consistent
- Time adjustments are justified by the evidence

A dispute should be **rejected or returned** if:

- Proof is missing, unclear, or inconsistent
- Timestamps do not match the requested adjustment
- Details (schedule, hours, log status) are incorrect, unless adjustable.
- Filed more than 5 days after. (Redirect employee to Lemuel Ching)

RTAs should add notes when clarification or justification is required.

D. Documentation and Accountability

- Approved disputes must include:
 - Correct reason selection
 - Admin or RTA notes if applicable
 - Dispute records must be maintained for audit and tracking
 - Repeated disputes from the same employee may be escalated
-

Important Reminders

- RTAs act as **gatekeepers**, not endorsers
- Proof quality outweighs explanations
- IC stamps take precedence over all other proofs
- Team Lead vouch is a **last-resort validation**, not a default
- Accuracy is critical—approved disputes directly affect payroll and reporting

Error Checking

Standard Operating Procedure (SOP) for Walmart Support |Error Checking on Zoho

Purpose

To ensure that all **Zoho time log records accurately reflect employee attendance, work hours, and leave status**. Error checking allows RTAs to identify discrepancies caused by system issues, missing data, or incorrect tagging, and to take the necessary corrective actions.

What Is Error Checking

Error checking is a validation process where RTAs review Zoho records to confirm that:

- Login and logout times are accurate
- Working Hours Per Day (WHPD) are properly recorded
- Leave, OT, and absence tagging are correct
- Weekly and daily work hours are computed correctly

If discrepancies are found, RTAs initiate the appropriate correction or escalation.

Key Principles of Error Codes

A key principle of Error Checking is that an **Error Code does not automatically confirm an error**. The code only flags a potential discrepancy. The RTA's mandatory role is to **manually review the log entry** associated with the code to validate the data and confirm if a correction is genuinely needed. RTAs must check every log that the code pertains to, regardless of initial error presence.

How Error Codes Work

- The **Error Checking column** in Zoho displays a **number**
- Each number corresponds to a **specific attendance or logging issue**

Error Code Reference and Explanation

0 – No Error

- Record is correct
- No action required

1 – Absent (No Login)

- Note column = Absent (No Login)
- Login column is empty
- Absent column = 0

Action:

Validate if the employee was truly absent or if there is a missing login record.

2 – Missing Logout

- Login column is not empty
- Logout column is empty

Action:

Verify logout proof and update logout time if valid.

3 – Missing Schedule and WHPD

- Start Schedule = 0
- End Schedule = 0
- WHPD = 0
- Login column is not empty

Action:

Likely a scheduling or system issue. Validate schedule and correct WHPD.

4 – Approved Full-Day Leave

- With approved full-day leave
- Login column is empty
- Absent column > 0

Action:

No correction needed if leave is valid.

5 – Short Login Duration

- Login column is not empty
- Login hours < 1 hour

Action:

Check if this is a partial log, system issue, or incorrect tagging.

6 – Incorrect Status with Absence

- Status is not Half Day (1st or 2nd)
- Login column is not empty
- Absent column > 0

Action:

Validate whether status should be Half Day or corrected absence.

7 – Agent-Specific Rule

- Applies only to **Jenife Tubac Garcia**

Action:

Follow special handling rules provided for this agent.

8 – Insufficient Login Hours (Whole Day / Training / Pre-Shift OT)

- Status = Whole Day OR Whole Day – Training OR Pre-Shift OT
- Login hours < required minimum

Minimum Login Requirement:

- WHPD = 8 → Login ≥ 6 hours
- WHPD = 10 → Login ≥ 7 hours

Action:

Validate logs and adjust status or hours if needed.

9 – Half Day with Missing Logout

- Status = Half Day (1st or 2nd)
- Login column is not empty
- Logout column is empty
- No HD leave filed

Action:

Verify logout proof or update status accordingly.

10 – Missing Login with WHPD

- Login column is empty
- WHPD > 0
- No approved full-day leave
- Absent column = 0

Action:

Confirm if this is a system error or true no-login case.

10 - WHPD vs. Sick Leave Reconciliation

- When SL $\neq$ WHPD $\rightarrow$ "Over-filed" or under-filed.
- SL and WHPD do not match (e.g., SL 10 hrs for 8-hr shift).

Action:

Deny/Return SL request if incorrect and/or Manually adjust SL or WHPD if urgent and authorized.

11 – Missing Login with Absence

- Login column is empty
- WHPD > 0
- No approved full-day leave
- Absent column $\neq$ WHPD

Action:

Check if absence should match WHPD or if correction is needed.

12 – Missing Login and Notes

- Login column is empty
- WHPD > 0

- No approved full-day leave
- Absent column = 0
- Note column is empty

Action:

Require clarification or proof before correction.

13 – Missing Status and Login

- No approved full-day leave
- Status column is not null
- Login column is null
- HD Leave $\neq$ 2

Action:

Validate leave or login details and correct record.

14 – Approved VTO

- With approved full-day leave
- Leave type = VTO

Action:

No correction needed if approval is valid.

15 – MedLOA Case

- Login column is not empty
- Leave type = MedLOA

Action:

Escalate or validate according to MedLOA policy.

16 – Absent with Late or Undertime

- Absent = WHPD
- Late or Undertime $>$ 0
- Login column is empty
- Note contains "ABSENT"

Action:

Validate if tagging is correct or requires adjustment.

17 – Absence with Supporting Issues

- Absent > 0
- WHPD > 0
- Clinic OR Lost Power OR Lost Internet > 0

Action:

Validate proof and ensure proper dispute handling.

18 – Half Day Login Hour Validation

- Status = HD (1st or 2nd)
- Approved HD leave
- Login hours = Half WHPD + 2 hours

Minimum Login Requirement:

- WHPD = 8 → Login ≥ 6 hours
- WHPD = 10 → Login ≥ 7 hours

Action:

Flag if login hours are below the required threshold.

19 – Conflicting Status with Login

- Note column = Absent (No Login)
- Login and Logout columns are not empty
- Status = Pre-Shift OT OR Whole Day OR Whole Day – Training

Action:

Correct note or status to align with actual login activity.

20 – Break Logs on Day Off

- Break logs exist
- Note contains “DAY OFF”
- Login column is empty

Action:

Validate if this is an incorrect break tag or scheduling error.

APS Scrubbings

Standard Operating Procedure (SOP) for Walmart Support

|APS Scrubbing SOP

Purpose/Scope

This SOP outlines the step-by-step process for APS (Attendance Pointing System) Scrubbing using Zoho, ensuring accurate attendance records, proper point application, and compliance with company policies. This process applies to all team leads, workforce, or designated personnel responsible for reviewing, validating, and correcting attendance records in Zoho.

Roles and Responsibilities

Agent – Ensures proper logging in/out and files necessary attendance-related requests.

Team Lead – Conducts initial review and validation of attendance records.

Workforce – Performs final validation and approves corrections when required.

APS Scrubbing Step-by-Step Process

Step 1: Access Zoho

- Log in to Zoho
- Navigate to APS Reports
- Click APS Report (Admin)

Step 1.1

- For easy monitoring, [View Zoho Timelogs Checker Dashboard](#).
- Refresh data.
- Promptly modify the date range for dates desired.

Step 2: Select the Scrubbing Period

- Identify the date to be scrubbed.
- Filter attendance records by:

- * Date (Date range; From start date to yesterday's date)
- * Account ("walmart")
- * New APS is greater than 0

APS Report (Admin) * ▼ Save Changes Remove Changes

SEARCH Account contains "Walmart" ⊗ Date between "01 Jan 2026" and "31 Jan 2026" ⊗ New APS is greater than "0" ⊗

Comprehensive guide of APS Guidelines, please refer to [ECE Memorandum Standardized Attendance Pointing System 2023](#)

Step 3: Review Attendance Records

a. Check each employee's record for the following:

- Missing login or logout
- Late login or early logout
- Absence or no log-in detected
- NCNS
- Incomplete or incorrect punches

b. Cross-check records with:

- Approved leave requests
- Filed tickets and/or approved VL/SL and approved disputes (VL, SL, OT, coaching, meeting, clinic, etc.)

Note: Suspension will not accrue APS points. (As per Infraction of Company Rules - Attendance Pointing System 2023 | Guidelines)

Step 4: Validate Supporting Documentation

a. Confirm if the employee has submitted:

- Attendance correction request
- Approved leave request
- Meeting, coaching, or clinic ticket

b. Ensure all documents are:

- Properly approved
- Filed within the timely filing period

Step 5: Apply or Remove APS Points

a. Based on validation, determine if APS points should be:

- * Applied (no valid justification or missing documentation)
- * Removed or Adjusted (valid and approved documentation present)

b. Update the APS points in Zoho accordingly.

Step 6: Update Attendance Status in Zoho

a. Correct the attendance status/time logs (e.g., Present, Absent, Leave, NCNS, Late)

b. Add clear and detailed remarks (e.g., Reason for adjustment)

Step 7: Final Review and Save

a. Double-check all updates for accuracy.

b. Save changes in Zoho.

c. Ensure the record reflects the correct APS points and attendance status.

Quality Check and Compliance

- APS scrubbing must be documented in Zoho.
- No changes should be made without valid proof and approval.
- Ensure consistency with company attendance and disciplinary policies.

 Break Logs (HD, UT, LATE, Lost Power/Internet)

Standard Operating Procedure (SOP) for Walmart Support |Break Logs

Purpose / Scope

This SOP defines the standardized process for logging break auxiliaries (Auxes) in Zoho related to **power outages, internet loss, and system issues**. It ensures accurate timekeeping, payroll correctness, and consistent handling of incidents for both **office-based** and **work-from-home (WFH)** employees.

Zoho has 3 available break auxes for situations where there are Power outages, internet outage or system issue.

Break

Employee * Lemuel De Leon Ching x

System Error

Lost Power

Lost Internet

Submit Reset

System Error : Tool issue within the PC unit (client or ECE regardless). Non deductible.

Lost Power : Power / Electricity outage causing non-productive hours.

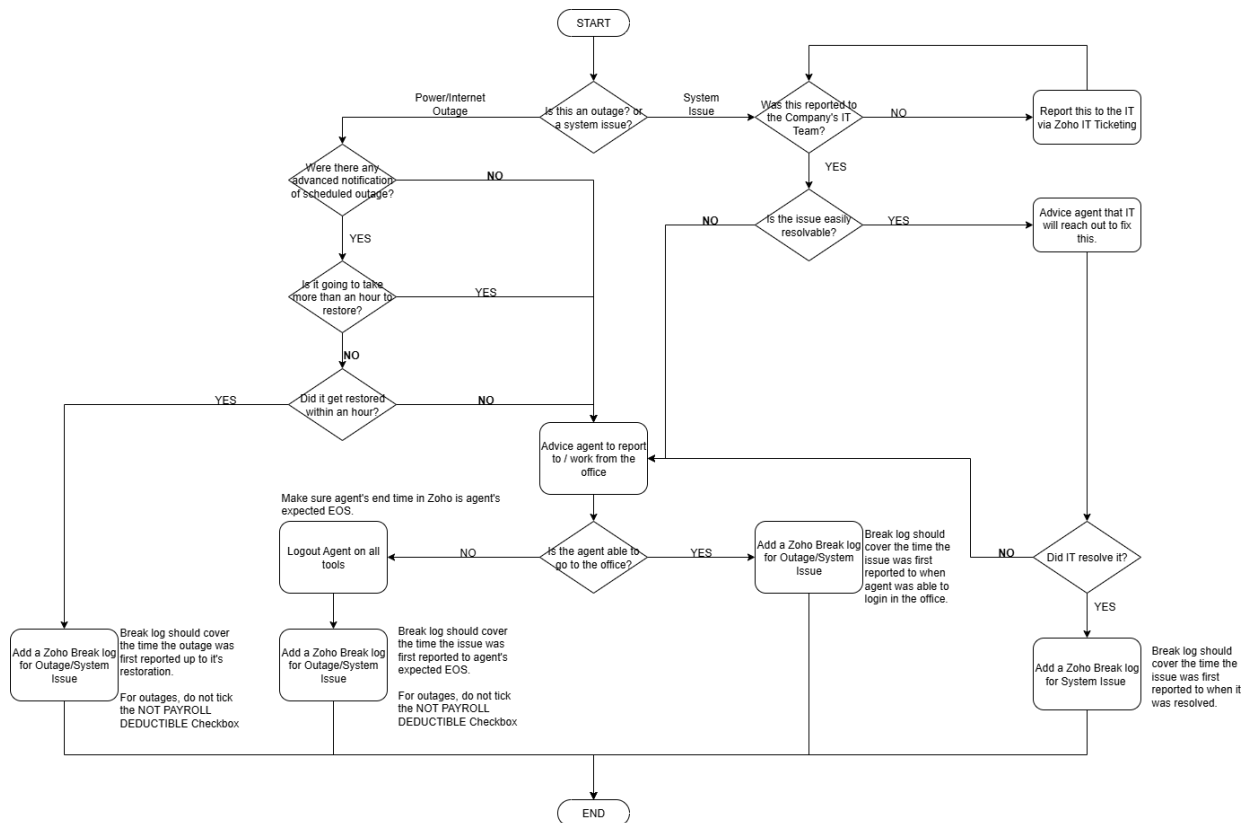

Lost Internet : Internet connectivity outage causing non-productive hours.

Office Based Employees

For all office based employees with any issues with regards to power outage or internet outage, we'll automatically add a break log for the respective outage. Take note that none of these logs will be deductible from the employees payroll so **MAKE SURE TO TICK** the **Not Payroll Deductible Checkbox**.

Work From Home Based Employees

For all work from home employees with any issues with regards to power outage or internet outage, we'll follow the flowchart outlined below:

Outages TL;DR:

- If the outage cannot be resolved within an hour, have the agent report to the office.
- If an agent can report, then add outage logs from the time the issue started to the time the agent got to the office. Make sure to not tick the NOT PAYROLL DEDUCTIBLE box as this should be docked from their pay.
- If the agent cannot report to the office, then logout agent and add outage logs from start of issue to end of shift. Make sure to not tick the NOT PAYROLL DEDUCTIBLE box as this should be docked from their pay.
- If outage is resolved within an hour, add outage logs from start of issue to end of issue.

Issue TL;DR:

- If issue is resolvable by the IT, then add issue logs from start of issue to end of issue
- If the issue is not resolvable, have the agent report to the office.
- If an agent can report, then add system issue logs from the time the issue started to the time agent got to the office.
- If the agent cannot report to the office, then logout agent and add system issue logs from start of issue to end of shift.

Suspension

Standard Operating Procedure (SOP) for Walmart Support |Suspension

All employee suspensions must be properly documented and plotted by the Workforce Real-Time Adherence (RTA) team to ensure:

- Accurate staffing projections
- Prevention of unauthorized system access
- Prevention of leave filings during suspension periods

Suspensions may occur due to:

- Attendance Pointing System (APS) violations
- Other employee handbook violations
- Preventive suspensions

Suspension Due to Handbook Violations & Preventive Suspension

1. Suspension Due to Handbook Violations and Preventive Suspension

1. Operations Team Request:

- The Operations team must file a **Workforce Management (WFM)** ticket selecting the category **“Suspension Request”** and indicating:
 - Employee name and details
 - Violation or reason for suspension
 - Recommended suspension dates
 - Any relevant documentation (e.g., NOD, screenshots, or case notes)

The screenshot displays the 'Request Portal' for the 'RTA/WFM Ticketing System'. The left sidebar lists various request categories, with 'RTA/WFM Ticketing System' highlighted. The main form area is titled 'Requester's Details' and includes fields for 'Employee' (Salcedo Joriz Cometa Cruz), 'Site' (Manila), and 'ECC ID' (ECE000022). Below this, the 'Request' section contains fields for 'Date of Request' (27-Feb-2025), 'Account' (Select), 'Due Date' (dd-MMM-yyyy), 'Categories' (a dropdown menu with 'Suspension Request' selected and highlighted by a red box), 'Topic' (Select), and 'Description'. To the right of the 'Request' section is the 'RTA Details' section, which includes 'RTAs on Duty' (Select) and 'Status' (Select). At the bottom of the form are 'Submit' and 'Reset' buttons. On the far right, there is a section for 'Upload Documents' with four document slots, each with a 'Select File' button.

2. Coordination with RTA:

- The Operations team must coordinate with the assigned RTA for the program.
- The RTA will evaluate the proposed suspension dates based on staffing availability.
- Adjustments may be recommended to minimize staffing impact while ensuring compliance with disciplinary action timelines.

3. Filing the Suspension in Zoho:

- The RTA will input the approved suspension details into the [Zoho Leave Request \(Suspension\) Form](#) (NOT the standard Leave Request Form).
- The suspension must be properly labeled with the reason and approved dates.
- The RTA must confirm the final plotted suspension with the Operations team.

Employee * -Select-

Remaining VL

Remaining SL

From * MM/dd/yyyy

To * MM/dd/yyyy

Status * -Select-

Reason * VTO

Suspension

Remarks

Submit Upload Supporting Document Reset

4. Preventing Unauthorized Work During Suspension:

- Once filed, the suspension details must be logged to prevent the affected employee from:
 - Logging into the system on the suspension date
 - Filing **Sick Leave (SL)** or **Vacation Leave (VL)** during the suspension period
 - If the employee attempts to log in or file leave, the RTA must notify the Operations team immediately for corrective action.
-

2. Suspension Due to Attendance Pointing System (APS)

1. Receipt of NOD for Suspension:

- The **APS Point of Contact (POC)** creates the **Notice of Decision (NOD) for Suspension** for an employee due to APS violations.
- The APS POC must coordinate with the assigned RTA and Operations team to determine the appropriate suspension date.

2. Scheduling Suspension Dates:

- The RTA will evaluate the staffing impact and work with the Operations team to select the best dates for suspension.
- Adjustments can be made to avoid staffing shortages while ensuring compliance with the APS disciplinary process.

3. Filing in Zoho:

- Once a date is confirmed, the **APS POC** must log the suspension in the **Zoho Leave Request (Suspension) Form**, ensuring all required details are included.
- The reason for suspension must be clearly labeled as **APS Suspension** to differentiate it from other disciplinary suspensions.

4. Ensuring Compliance:

- The RTA must cross-check employee schedules to ensure no conflicting leave requests exist.
- If an employee attempts to file leave or log in on their suspension date, the RTA must escalate the issue to the Operations team for intervention.

3. Situational Events and Mitigation Plans

Scenario 1: Employee Attempts to Work on a Suspension Date

Issue: Employee logs in despite suspension.

Mitigation:

- RTA flags the login activity immediately.
- Notify Operations team.
- If intentional → Escalate to HR for further disciplinary action.
- If system-related → Engage IT/Programming to correct access controls.

Scenario 2: Employee Files Leave on a Suspension Date

Issue: Employee files SL/VL to avoid suspension.

Mitigation:

- RTA rejects any leave request overlapping the suspension.
- Operations reminds employee:
 - Suspension days are mandatory
 - Suspension days cannot be converted to leave days.

Scenario 3: Suspension Conflicts with Critical Staffing Needs

Issue: Suspension coincides with high call volume or peak period.

Mitigation:

- RTA recommends alternate dates with lower demand.
 - If adjustment is not possible:
 - Implement temporary staffing or coverage measures.
-

Scenario 4: Operations Fails to Submit Suspension Request

Issue: Violation confirmed, but no WFM ticket submitted.

Mitigation:

- RTA proactively follows up with Operations.
 - If delay is critical:
 - Escalate to the Workforce Manager or HR Director to ensure compliance.
-

4. Final Confirmation and Documentation

- RTA confirms final suspension dates with Operations once plotted.
 - All suspension records must be retained for audit purposes.
 - HR must be informed of any discrepancies or violations of process.
-

5. Reference

 Standard Operating Procedure (SOP) for Workforce Real-Time Analyst (RTA)_020...

The Employee Suspension Process: A Step-by-Step Guide

Standardized guide for Operations, Workforce RTAs, and APS POCs to process, document, and manage employee suspensions, minimizing operational impact.

Suspension for Handbook Violations & Preventive Suspension

Operations Team Submits a Request

Operations files a 'Suspension Request' via the WFM ticketing system, including details, reason, dates, and documents.

RTA Coordinates Suspension Dates

Assigned RTA evaluates dates against staffing availability, coordinating adjustments with Operations to minimize impact.

RTA Files the Suspension in Zoho
RTA inputs final approved details into the Zoho 'Leave Request (Suspension)' Form.

RTA Monitors for Unauthorized Activity
System prevents login/leave. RTA monitors and reports any attempts to Operations.

Suspension for Attendance Pointing System (APS) Violations

APS POC Initiates the Process

APS Point of Contact coordinates with RTA and Operations to determine a suspension date after creating a Notice of Decision (NOD).

RTA Evaluates Staffing Impact

RTA analyzes staffing needs and collaborates with Operations to select dates, avoiding critical shortages.

APS POC Files the Suspension in Zoho
APS POC logs the suspension in the Zoho 'Leave Request (Suspension)' Form, clearly labeling it 'APS Suspension'.

RTA Ensures Compliance

RTA cross-checks the schedule for conflicts and escalates any attempts by the employee to log in or file leave.

Handling Common Issues & Mitigation

WF REST Attendance Aux Tagging

Standard Operating Procedure (SOP) for Walmart Support

|WF REST Request and Process

Purpose / Scope

To standardize the request process for offline activities (Coaching, Meetings, Training) and schedule adjustments. This process ensures the RTA has sufficient lead time to balance floor coverage and that no agent "misses" a break due to a leadership request.

The "1-Hour Rule" Policy

- **Standard Requests:** All tickets must be submitted a **minimum of 1-hour** prior to the requested start time.
 - **Late Requests:** Any ticket submitted less than 1 hours in advance is subject to denial if the capacity indicator is not in the "Green" zone on Workforce Rest, meaning the volume vs capacity is critical during the requested timeframe.
-

Procedure: Creating & Submitting Tickets

Step 1: Impact Assessment

Before submitting a ticket, the TL must check the agent's current schedule in **Workforce Rest**.

- **Identify Overlaps:** Check if the requested offline time (e.g., Coaching from 2:00 PM – 3:00 PM) overlaps with the agent's pre-plotted Break or Lunch.
- **Proactive Planning:** If an overlap exists, the TL **must** decide on a proposed new time for that break/lunch before sending the ticket.

Step 2: Ticket Creation Requirements

When filing the ticket, the following information is mandatory for approval:

1. **Activity Type:** (e.g., Coaching, Team Huddle, Meeting).
2. **Duration:** Specific Start and End times.
3. **Schedule Adjustment Note:** If the activity covers a pre-plotted break, the TL must include
 - *"This activity covers the 2:15 PM Break. Requesting to move this break to 3:00 PM."*

Note: Movement of break is still subject to approval and is still not guaranteed that requested break schedule will be granted.

Example Given:

Request

Date of Request	15-Jan-2026	Categories *	Offline Activity Request	Upload Documents:
Account	-Select-	Topic *	E.g. Calibration, Weekly Huddle, etc.	Document 1
Due Date *	dd-MMM-yyyy	Description	Duration: 00:00 - 01:00 EST Schedule Adjustment: Move Break to 1:15 EST due to conflict in meeting schedule	Select File
				Document 2
				Select File
				Document 3
				Select File
				Document 4
				Select File

Template:

Activity:
Time: From - To
Duration:
Note: Optional

Step 3: Submission & RTA Sync

- **Submit:** Send the ticket through the official ticketing portal.
- **Notify:** Send a quick "heads up" to the RTA via **Zoho Cliq** with the ticket number.
- **Confirmation:** The activity is **not** approved until the RTA moves the ticket to "In Progress" or "Approved." Do not pull the agent off until this status change occurs.

Handling Tool Maintenance (Contingency)

If **Workforce Rest** is under maintenance, the ticketing process remains the same, but the validation changes:

- **TL Action:** Submit the ticket as usual.
- **Validation:** The RTA will manually check the **IC (Interactive Center)** and the **Break Schedule Sheet**.
- **Expectation:** If approved, the RTA will keep the ticket **"In Progress"** with a note: *"Approved manually; will be plotted once tool is online."*
- **Agent Movement:** Once the RTA gives the "Go" via Zoho Cliq/Ticket note, the TL may proceed with the activity.

5. Expected Results & Effectiveness

Requirement	Result of Compliance
1-Hour Lead Time	Allows RTA to "Level Load" the floor, preventing sudden drops in service levels.
Break Movement Logic	Ensures agent well-being and labor law compliance by guaranteeing no break is "lost" to a coaching session.
Clear Ticket Notes	Reduces back-and-forth communication, speeding up the approval process.
Audit Readiness	Creates a clear history of why schedules were changed, protecting the TL during performance reviews.

Escalation Matrix

- **Urgent/Same-Day Needs:** If a "Critical Coaching/Meeting" is needed in less than 1 hour, an approval from **STL/OM** shall be **required** on the ticketing process for approval from the RTA's.
- **Missed Breaks:** If a TL fails to include the break movement in the ticket and the agent misses their slot, the TL is responsible for the resulting adherence hit.

WF REST REQUEST & PROCESS

WF REST Request & Process

SOP INFORMATION

- **SOP Title:** WF REST Request & Process
- **Department / Team:** RTA / Support

1. The "1-Hour Rule" Policy

- **Standard Requests:** All tickets must be submitted a minimum of **1-hour** prior to the requested start time.
- **Late Requests:** If any ticket submitted **less than 1 hours in advance** is subject to denial if the capacity indicator is not in the **"Green Zone"** on Workforce Rest, meaning the volume vs **capacity** is **critical** during the requested timeframe.

2. Impact Assessment

Before submitting ticket, TL must check agent's current schedule:

- **Identify Overlaps:** Check if the requested offtime (e.g. Coaching from 2:00 PM – 3:00 PM) overlaps a **Break / Lunch**
- **Proactive Planning:** If overlaps exist, propose a new time before sending ticket.

3. Ticket Creation Requirements

When filing the ticket the following information is mandatory for approval:

- **Activity Type:** (Coaching, Huddle, Meeting)
- **Duration:** Specific Start and End times.
- **Schedule Adjustment:** Note: If overlaps a Break / Lunch **ha**
Example: Requesting 3:00 PM Break.

4. Submission & RTA Sync

Submit ticket via official portal.

- **Notify RTA** via Zoho Cliq & include ticket #
- Wait for RTA to mark **"In Progress"** until tool is online.
- Don't pull agent off until status change.

5. Handling Tool Maintenance (Contingency)

If WF Rest is down |

- **TL Action:** Submit ticket as usual.
- **Validation:** RTA manually checks IC & Break Sheet.
- **Expectation:** RTA keeps ticket "In Progress" until tool is online.

6. Escalation Matrix

- **Urgent/Same-Day Needs:** Require STL/OM signature if <1 hour.
- **Missed Breaks:** TL accountable for adherence hit if break isn't rescheduled.

Expected Results & Effectiveness

- ▶ **1-Hour Lead Time:** Allows RTA to "Level Load" the floor, preventing sudden drops in service levels.
- ▶ **Clear Ticket Notes:** Reduces back-and-forth communication, speeding up the approval process.

Balanced staffing starts with proper request timing!

Meeting/Coaching/Clinic Ticketing For Rest

Standard Operating Procedure (SOP) for Walmart Support

|Meeting/Coaching/Clinic Ticketing For Rest

Purpose

To establish a standardized process for filing and processing rest adjustment tickets in Zoho when an employee attends a meeting, coaching, or clinic that overlaps with their scheduled rest period.

Scope

This SOP applies to all employees required to attend official meetings, coaching sessions, or clinics during their scheduled rest/break time and to the Support and Workforce team responsible for validation and approval.

Responsibility

Team Leaders: File rest tickets accurately and within the prescribed timeframe.

Workforce: Review, approve, and apply adjustments in REST

Definitions

- Rest Ticket: A Zoho ticket filed to request adjustment or replacement of a rest period affected by work-related activities.
-

Procedure

Step 1. Schedule Validation

- Confirm the date and time of the meeting, coaching, or clinic visit.
- Verify that the session overlaps or replaces the scheduled rest period based on the agent's shift schedule.

Step 2. Eligibility Check

A rest ticket may be filed if:

- The activity is official and work-related.
- The activity interrupts or consumes the employee's scheduled rest time.

Step 3. Access Zoho Ticketing & Ticket Creation

- Log in to Zoho
- Navigate and click RTA/WFM Ticketing
- Select the appropriate Category (Meeting/Coaching/Clinic)
- Select the Issue Type / Reason (Rest Adjustment/ Rest Ticket)
- Fill out description box with necessary information (Date & Time in EST, Name of Agents, Detailed information)
- Upload Documents (if needed)
- Click submit

Step 4. Ticket Details Entry

- Complete all required fields accurately
- Type of Activity: Meeting / Coaching / Clinic
- Date of Activity (EST)
- Actual Start and End Time (EST)
- Affected Rest Period
- Detailed Description

Step 5. Supporting Documentation

Attach applicable proof, if required:

- Calendar invitation
- Coaching or clinic schedule
- Official meeting notice or endorsement

Step 6. Ticket Submission

- Review all information for accuracy and completeness.
- Click Submit.
- Record the Zoho ticket reference number or ID number for tracking.
-

Step 7. Review and Approval

Workforce review the ticket for:

- Validity of activity
- Accuracy of time and rest impact
- Completeness of documentation
- Approved tickets are processed for adjustments in REST

Step 8. Rest Adjustment Implementation

- Once approved, the adjusted period is reflected in REST.
- The employee must ensure:
 - Proper IC tagging
 - No overlapping or incorrect entries

Turnaround Time

- Rest tickets must be filed within the prescribed filing period (e.g., 30 minutes or 1 hour before the requested meeting or coaching).
- Late submissions may result in non-approval.

Compliance

Failure to follow this SOP may lead to:

- Disapproval of rest adjustments
- Attendance discrepancies
- Possible attendance points or corrective action

Workforce Rest Filing

Standard Operating Procedure (SOP) for Walmart Support |WFM REST Tool Management

Purpose / Scope

The purpose of this procedure is to standardize how Real-Time Analysts (RTAs) manage agent schedules, optimize breaks, and track offline activities using **Workforce Rest**. This ensures optimal floor coverage, accurate shrinkage reporting, and data integrity by accounting for every agent's status in real-time. This SOP applies to all **RTAs** and covers daily operations from shift start to end-of-day (EOD) scrubbing.

Roles & Responsibilities

- **Role:** Real-Time Analyst (RTA)
 - **Responsibility:** Monitor capacity indicators, optimize breaks, tag absences (NCNS/VL/SL/LOA), plot offline activities (Coaching/Meetings), and scrub logs for data accuracy.
 - **Role:** Team Lead (TL) / Operations Manager
 - **Responsibility:** Request offline activities via the RTA ticketing system, provide clarification on agent attendance discrepancies, and ensure agents adhere to the schedules plotted.
-

Tools / Requirements

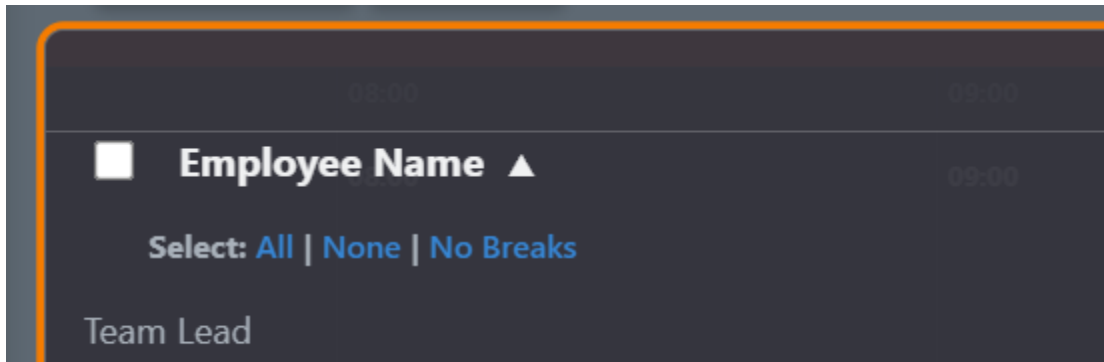

- **Workforce Rest:** Primary tool for real-time tracking and break optimization.
 - **Zoho Leave Requests:** Used to verify approved Vacation Leave (VL) and Sick Leave (SL).
 - **Communication Tool - Zoho Cliq :** For coordination with Operations.
-

Procedure (Steps)

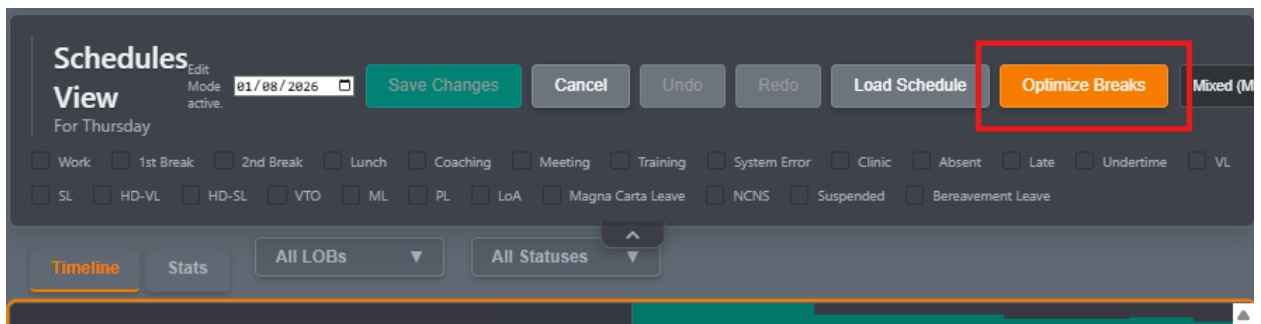

Step 1: Shift Start Break Audit & Optimization

Immediately at the start of the shift, the RTA must identify and assign breaks to agents missing them.

- Click the **"No Break"** button to filter for agents with empty break schedules.

- Tick the checkboxes for all agents in the filtered list.
- Click the **"Optimize Breaks"** button (top right of the control dashboard)

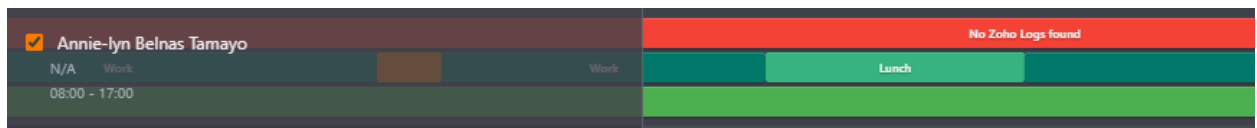

- Result:** The system automatically assigns breaks based on staffing needs to keep the capacity indicator **Green**.

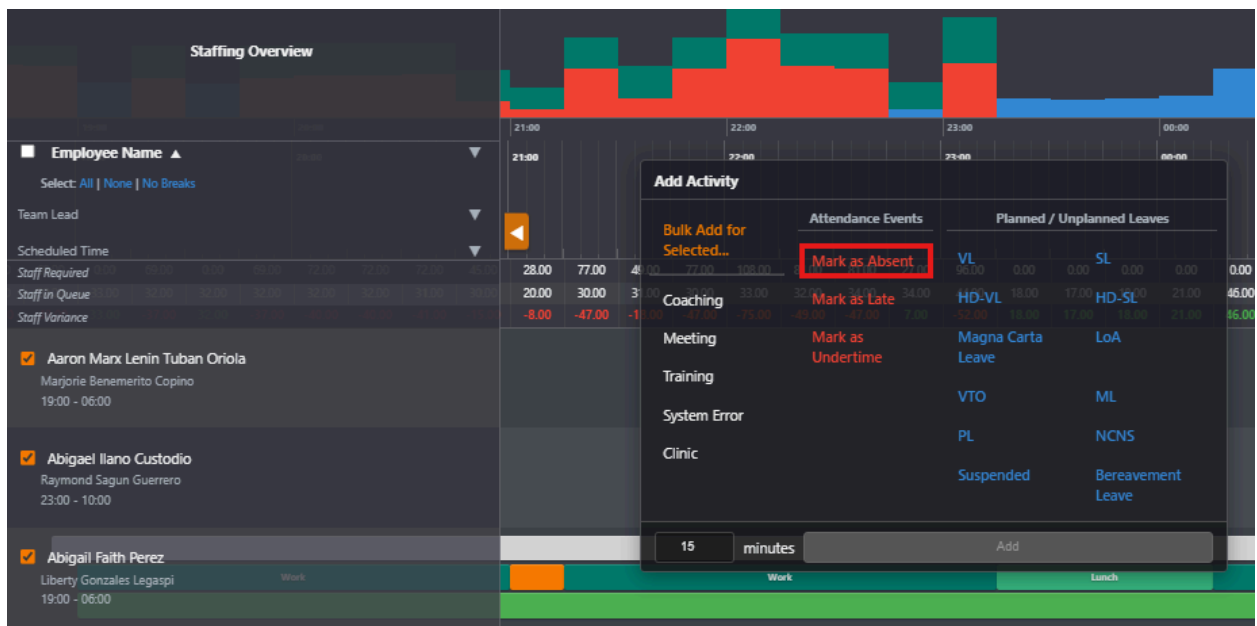

Step 2: Mandatory Absence Tagging

Account for all agents not present on the floor within the first 30–60 minutes of the shift.

- Tag missing agents as **Absent** if the associate is confirmed that there is no activity during the expected shift. Indication is marked on Workforce Rest whether the associate has logged in Zoho or has no logs during the shift.

- If Validated that agent is absent within the day. Mark the associate as absent in the tool by simply right clicking Edit Schedule then click the 2nd bar under the agent name.

- **Open Zoho Attendance/Leave:** Run a report or filter the calendar for the current shift date.
- **Identify Leaves:** List all agents marked for **Vacation Leave (VL)**, **Sick Leave (SL)**, or **Leave of Absence (LOA)**, etc.
- Mark the associates that are out of office as absent in Workforce Rest.

Step 3: Break Ticketing System

Monitor and review ticketing requests from operations regarding break and lunch movements.

- Upon receiving a ticket from the ticketing system, review the break movement request from operations. Validation is required using IC tool and/or Workforce Rest to identify if our shrinkage is manageable on the requested timeframe of the ticket.
- Once valid, RTA must plot the break schedule requested on the tool for documentation and real time monitoring on their break time.

- Monitoring adherence on all break schedules is mandatory for reporting. Employees failing to comply with punctuality on his/her adherence to break schedule shall be subject to corrective action.

Step 4: Schedule Scrubbing & Aux Adherence Enforcement

The RTA is responsible for performing a daily scrub to identify agents who did not adhere to their scheduled Aux tagging.

- Daily Scrubbing:** RTAs will go through the logs which could be found on the upper left part of the system (stats), this is to identify agents who used incorrect Aux codes or failed to follow the plotted schedule (Out of Adherence).

Timeline Stats All LOBs All Statuses								
	Name	Date	Scheduled Shift Start	Log In	Late (m)	Undertime (m)	Break Adherence	Absent
+	Abigail Faith Perez	2026-01-10	19:00	18:53:02	0	0	No	No
+	Alaine Calma Ecat	2026-01-10	19:00	18:45:23	0	0	No	No
+	Aljon Calo Arcilla	2026-01-10	21:00	20:52:06	0	0	No	No
+	Amelyn Ronia Castro	2026-01-10	08:00	07:37:57	0	0	Partial	No
+	Andrew Alburo Villegas	2026-01-10	23:00	22:33:02	0	0	Partial	No
+	Anthony Ortilano Dela Cruz	2026-01-10	00:00	00:00:26	0	0	Partial	No

- First & Second Violations:** Recorded for tracking and reporting in the daily adherence dump file.
- Third Violation:** If an agent fails to adhere to their schedule for the **3rd time**, the RTA shall officially send a **Workforce Log for Coaching** to the agent and their respective Team Lead.
- Fourth Violation:** If an agent is found out of adherence for the **4th time**, an **NTE (Notice to Explain)** shall be issued for the agent to initiate the formal disciplinary process.

Contingency Procedure: Tool Downtime & Maintenance

In the event that **Workforce Rest** is offline or undergoing maintenance, the RTA must transition to manual validation to ensure service continuity.

Step 1: Manual Validation of Requests When a ticket is received for a **Break Movement** during downtime:

- **Check IC (Incontact Tool):** Verify the agent's current live status and the current call queue/interval volume.
- **Consult Break Schedule Sheet:** Refer to the sheet to see if the requested movement conflicts with existing coverage requirements, checking on the break and lunch scheduled for the requested time ensures that we have our staffing capacity under control and manage our shrinkage appropriately.

Step 2: Ticket Management & Approval If the request is deemed **Valid** based on manual volume checks:

- **Update Ticket Status:** Set the ticket to **"In Progress"**.
- **Mandatory Internal Note:** Add a note to the ticket using the following template:
*"Workforce Rest is currently under maintenance. Request has been manually validated and is **APPROVED**. Activity will be plotted in the tool for data integrity once the system is back online."*
- **Communication:** Notify the requesting Team Lead via **Zoho Cliq** that they may proceed with the movement based on the manual approval.

Step 3: Post-Maintenance Reconciliation Once Workforce Rest is back online:

- The RTA must immediately plot all "In Progress" requests from the downtime period.
- Close the tickets once the data is reflected in the tool to ensure shrinkage reporting remains accurate.

Effectiveness of Procedure

- **Zero Operational Delay:** Prevents "bottlenecks" where TLs feel they cannot move agents because the tool is down.
- **Audit Trail Maintenance:** By keeping tickets "In Progress" with specific notes, there is a clear paper trail for WFM Managers to see why adherence might look "off" during maintenance windows.
- **Data Recovery:** Ensures that even if the tool is down, the *intent* to track data remains, leading to 100% data capture once the system is restored.

Expected Results & Effectiveness Indicators

The effectiveness of this SOP is measured by the stability of the floor and the accuracy of the data. Successful execution of these steps should result in:

- **Optimized Service Levels:** By using the "Optimize Breaks" function, the capacity indicator remains **Green**, ensuring we have the right number of people to handle incoming volume.
- **Reduced Unaccounted Shrinkage:** Mandatory tagging within the first 60 minutes ensures that agents that are absent are removed from capacity math immediately.
- **Data Integrity:** Daily scrubbing ensures that payroll and performance reports (derived from Zoho and Workforce Rest) match 100%, reducing manual corrections at the end of the month.
- **Improved Adherence:** The 3rd and 4th violation triggers (Coaching and NTE) hold agents accountable to the optimized schedule and reduce Aux misuse.

Line Assignment

Client Tool Management

Purpose

To define the proper use and management of **client tools** required for daily operations, monitoring, and workload assignment, ensuring uninterrupted access, accurate tracking, and compliance with client requirements.

Client Tools Overview

There are **three (3) primary client tools** used in operations:

1. **VDI (Virtual Desktop Infrastructure)**
 2. **InContact (IC)**
 3. **ServiceNow (SNow)**
-

Tool Descriptions and Usage

1. VDI (Virtual Desktop Infrastructure)

- VDI serves as the **primary access point** to all client tools
- Both **InContact (IC)** and **ServiceNow (SNow)** can only be accessed through VDI
- VDI functions as the **Walmart virtual desktop environment**

Without VDI access, agents and RTAs **cannot use IC or SNow**.

2. InContact (IC) **Add screenshot**

- IC is used to **monitor agent tagging and activity status**
- Tracks:
 - Productive work

- Offline activities (breaks, meetings, coaching, etc.)
- **Time in and time out** for the client side
- IC functions similarly to **Zoho**, but serves as the **client's official time tracking tool**

Supervisory Capabilities:

- RTAs can supervise agents in IC
- Agents may be **forcefully logged out** if system issues or events prevent them from logging out properly

3. ServiceNow (SNW) **Add screenshot**

- ServiceNow is Walmart's **primary operational tool**
- Used to:
 - Assign **lines and claims**
 - Track which agents worked on assigned lines or claims
 - Monitor **volume inflow**
 - Track **SLA performance**
 - Review data on **closed lines and claims**

ServiceNow serves as the **source of truth** for workload, productivity, and SLA compliance.

Issue Reporting and Escalation

If an agent encounters any issue that prevents access to **VDI, IC, or ServiceNow**, the agent must:

1. Report the issue in the **[VDI / PC Issue Tracker]**
2. Include the **Start of Issue (SOI)** with timestamp
3. Report again once resolved, including the **End of Issue (EOI)** with timestamp

This ensures:

- Accurate documentation
- Proper time tracking
- Visibility for operations and IT support

Key Reminders

- VDI access is mandatory for IC and SNow usage
- IC reflects client-side time and activity records
- ServiceNow is the primary tool for assignment and SLA monitoring
- All access issues must be logged with SOI and EOI to maintain accurate records

Line Assignment/Latte Management

Standard Operating Procedure (SOP) for Walmart Support

|Step-by-Step Process: Line Assignment (Manual) / LATTE Management

Objective

To ensure accurate and timely assignment of **US, CA, and Pre-Item lines** to properly trained agents by prioritizing **SLA urgency and real-time queue demand**. US and CA queues are treated with **equal importance**—priority is determined by which queue is most urgent or at risk of SLA breach.

SLA-Based Prioritization Guide

Use the following SLA tiers to decide which lines to prioritize:

Line Type	SLA Requirement	Training Required
High Priority	Within 6 hours	US-trained / CA-trained
P1 (US or CA)	Within 2 hours	US-trained / CA-trained
P2 (US or CA)	Within 12 hours	US-trained / CA-trained
P3 (US or CA)	Within 24 hours	US-trained / CA-trained
P4 (US or CA)	Within 48 hours	US-trained / CA-trained
Pre-Items	Within 24 hours	Pre-Items-trained agents

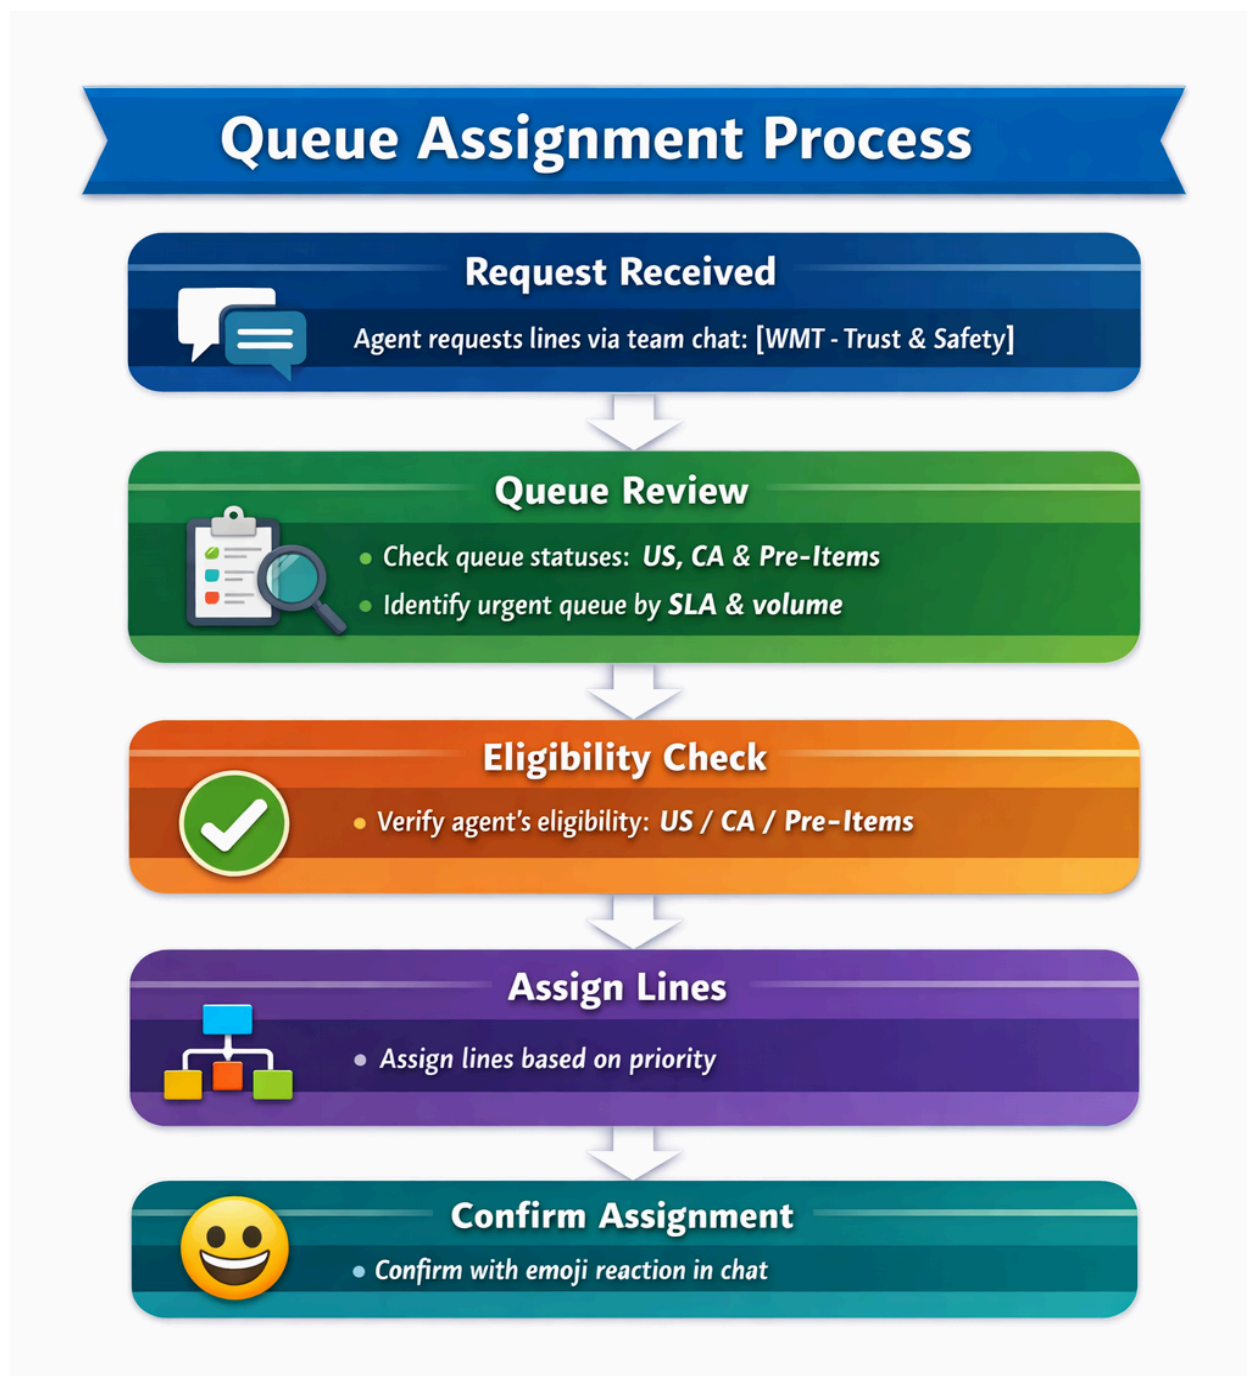

Dashboard Link

- [ServiceNow Dashboard](#) - Used to access updated links for each priority level and queue.

Agent Requests and Assignment Procedure (Manual) Workflow Procedure

1. Agents request lines via team chat: [\[WMT - Trust & Safety\]](#)
2. Review current queue statuses (**US, CA, and Pre-Items**)

3. Identify which queue is most urgent based on **SLA and volume**
4. Verify the agent's training eligibility (**US / CA / Pre-Items**)
5. Assign lines accordingly
6. Confirm assignment via **emoji reaction** in chat

Emoji Reactions to Confirm Assignment (Manual)

Once a line has been assigned, react to the agent's message using one of the following emojis:

Line Type	Emoji Reaction	Meaning
US Line		US line assigned
CA Line		CA line assigned
Pre-Items		Pre-item assigned

Assigning Lines (Manual Assignment)

Lines can be assigned using either of the following conditions:

Single Assignment

- Double-click the empty "Assigned To" field
- Type in the appropriate agent

Multiple Assignment

- Highlight all empty "Assigned To" fields to be assigned
- Double-click to bulk assign selected lines to an agent

Ensure assignments match:

- Agent training
- Priority level
- SLA urgency

Important Reminders

- *US and CA queues have equal priority—always decide based on urgency*
 - *Do not assign Pre-Items to non-Pre-Items-trained agents*
 - *Emoji reactions act as confirmation and prevent duplicate assignments*
 - *Always monitor SLA risk before assigning lower-priority queues*
-

LATTE Volume Upload

Purpose

To outline the standard process for uploading volume data into **LATTE**, ensuring **accuracy**, **timeliness**, and **proper queue monitoring** to support operational needs and SLA compliance.

Scope

This procedure applies to **RTAs and authorized personnel** responsible for:

- Uploading US and CA volumes into LATTE
 - Monitoring queue health
 - Ensuring agent availability and responsiveness
-

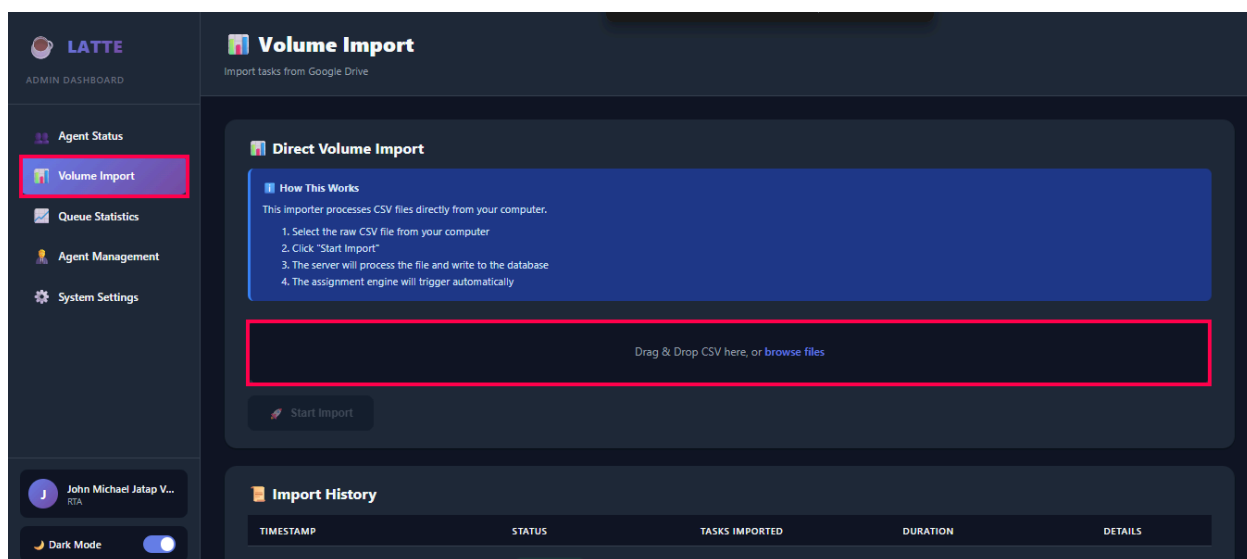

Procedure

1. Download ServiceNow Volume

- Access **ServiceNow**
- Download the required **volume file**
- Ensure the correct queue is selected:

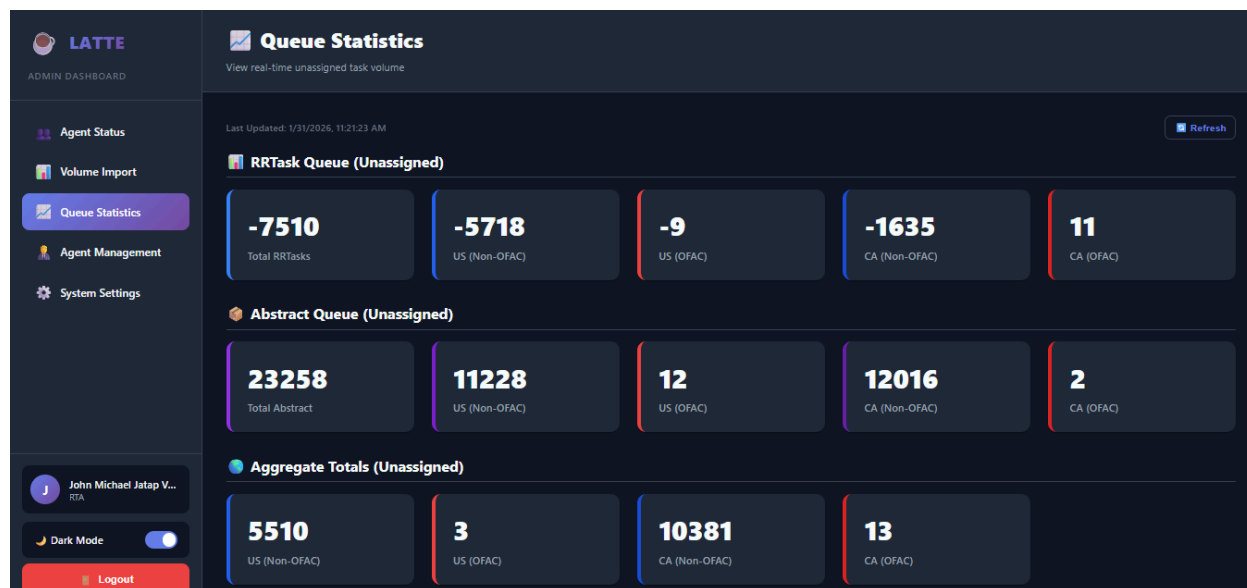

- US
- CA

2. Upload Volume in LATTE **Add screenshot**

- Open the **LATTE Admin Dashboard**
- Navigate to **Volume Import**
- Upload the downloaded ServiceNow volume file
- Confirm upload completion and check for errors

3. Monitor Queues and Agent Status

Queue Monitoring

- Go to **Queue Statistics** in the LATTE Admin Dashboard
- Monitor:
 - Queue volume
 - RRTask Queue
 - Abstract Queue

Agent Status Monitoring

- Verify that **all active agents are ONLINE** in LATTE
- If an agent is observed as **IDLE**:
 - Reach out to the agent via the **Shoutout Channel**
 - **CC the agent's Team Leader**
- If the agent is **unresponsive**:
 - File an entry in **WFM Logs** for proper documentation and follow-up

Upload Frequency Guidelines

Adjust upload frequency based on volume conditions:

- **Low Volume**
 - Upload every **30 minutes to 1 hour**
- **High Volume**
 - Upload every **1 to 2 hours**

Always consider current queue demand and SLA exposure when determining upload timing.

Troubleshooting: Failed Volume Import

If a volume upload fails, perform the following steps:

Access Firebase – LATTE Database

- Log in via **Chrome** using:
 - **Email:** wmt@ececontactcenters.com
 - **Password:** Walmart1234

Clear Failed Import Records

1. Open **Firebase**
 2. Navigate to:
 - **import_jobs** → latest upload → **Delete document fields**
 - **admin_notifications** → latest upload → **Delete document fields**
 3. Reattempt the volume upload in LATTE
-

Important Reminders

- *Always verify that the correct **US or CA file** is uploaded*
- *Ensure agents are actively monitored during and after uploads*
- *Prompt escalation helps prevent SLA breaches*
- *Document unresponsive agents through proper WFM channels*

RO Line Assignment

Standard Operating Procedure (SOP) for Walmart Support |Right Ownership (RO) Claim Assignment

Purpose

To ensure timely and accurate assignment of claims to appropriate agents by following **SLA requirements**, **claim hierarchy**, and **brand-specific routing rules**, while maintaining visibility of US and CA claim volumes.

A. Claim Types and SLA **Add screenshot**

All claim types share the same SLA, but prioritization rules still apply.

Claim Type	SLA
Counterfeit	8 hours
Copyright	8 hours
Trademark	8 hours
Patent	8 hours

Important Note:

While all claim types have an 8-hour SLA, Counterfeit claims are always treated as higher priority when assigning.

B. Start-of-Shift Responsibilities (RTA)

At the start of each shift, the RTA must:

- Check **RO claim volumes** for both **US and CA**
- Share the **current claim count** with the team
- If there is **no incoming volume**:
 - Remind agents to work on:
 - Their **pending claims**
 - Any **emails received**

This ensures productivity is maintained even during low-volume periods.

C. Brand-Specific Assignment Rules

- **Apple brand claims**
 - Must be assigned to **Apple Dedicated agents only**
- **StripeDevice claims**
 - Automatically assigned to **Teresa Lin (t0l013q)**

These rules override general claim assignment flow.

D. Agent Request and Compliance

- All **RO agents** must request claims via:
 - **For US - [Claim request Thread here ↓]**
 - **For CA - [CA Thread Claims]**
 - Agents working on **system-assigned claims** must be issued an **NTE** for proper tracking and documentation
-

E. Claim Assignment Prioritization

When both **US and CA queues** are ready for assignment:

- Treat US and CA as **equal priority**
 - Assign based on:
 - **Claim hierarchy** (Counterfeit first)
 - **Created date** (oldest first to prevent SLA breach)
-

F. Claim Assignment Procedure

To assign a claim to an agent:

1. Open the **claim**
2. Update the “**Locked To**” field with the agent’s name

3. Click **Save**
4. Select **Start Review**
5. React to the agent's request message with an **emoji** to notify them that a claim has been assigned

Key Reminders

- *Counterfeit claims take priority despite equal SLAs.*
- *Always consider the **Created Date** when assigning.*
- *Follow brand-specific routing without exception.*
- *Emoji reactions serve as confirmation of assignment.*
- *Ensure NTEs are issued when required for system-assigned claims.*

BULK

Standard Operating Procedure (SOP) for Walmart Support |Line Assignment (Bulk Process)

Purpose / Scope

The purpose of this SOP is to define the workflow for the Real-Time Analyst (RTA) team when the **CA Domain** experiences a surge in **Rule ID 3282** volume (ranging from thousands to 6-digit figures). This procedure ensures that bulk-authorized agents or automated tools are utilized correctly to prevent SLA breaches. This applies to all RTAs and Operations Leadership managing the CA Domain.

Roles & Responsibilities

- **Role: Real-Time Analyst (RTA)**
 - **Responsibility:** Monitor real-time volume, identify 3282 spikes, and trigger the initiation process by coordinating with the STL.
 - **Role: Senior Team Lead (STL)**
 - **Responsibility:** Approve the initiation of bulk processing and ensure the 2–3 specified agents are available and assigned.
 - **Role: Bulk-Authorized Agent**
 - **Responsibility:** Execute high-speed completion of 3282 tasks using specialized "bulk complete" system permissions.
-

Tools / Requirements

- **Item Risk Review Dashboard:** To identify Rule ID volume spikes.
 - **Latte Tool:** For automated bulk importing/completion (used when 3282 is isolated).
 - **Bulk Assignment Permission:** Special access granted to the 2–3 specific agents.
-

Procedure (Steps)

Step 1: Volume Detection

Identify that Rule ID 3282 has reached "Bulk" status (thousands+).

- **Action:** Analyze the current queue composition. Determine if the volume consists **exclusively** of 3282 or if there is a **mix** of other Rule IDs.

Step 2: Leadership Notification

Before taking action, the RTA must consult with the Senior Team Leader (STL).

- **Action:** Inform the STL of the volume surge.
- **Required Info:** Report the total volume and specify if it is "Pure 3282" or a "Mixed Rule ID" volume. If the volume only consist of 3282, ask for authorization to initiate bulk assignments to fasten completion.

Step 3: Execution Path Selection

Based on the STL's approval and volume type, follow the specific logic:

- **Scenario A (Mixed Volume):** If 3282 is mixed with other Rule IDs, assign the 3282 tasks specifically to the **2–3 bulk-authorized agents**.
- **Scenario B (Pure 3282 Volume):** If the volume contains **only** 3282 Rule IDs, do not assign them to agents. Use the **Latte Tool** to import and complete the tasks.

Step 4: Monitoring

- **Action:** Track the queue until the 3282 volume returns to manageable levels (below "bulk" threshold).

Note: *The Latte Tool is the priority for volumes that are non-3282 Rule ID's to ensure the 2-3 agents can remain focused on the 3282 bulk assignments.*

Extraction Process:

Step 1: Extract volume of pure 3282 Rule ID from CA P3 domain. Follow the Filter below:

[Risk Review Tasks](#)
[Created](#)
[Search](#)

[All](#) > [Active = true](#) > [Soft Delete = false](#) > [Tenant ID = Item-CA-1](#) > [Item is not empty](#) > [Rule Rule Priority = P3](#) > [State = Open](#) > [Decision = Review](#) > [Rule Rule ID = 3282](#)

Number	Assignment group	Assigned to	Updated by	Closed by	Rule Priority	Tenant ID	State	Item
--------	------------------	-------------	------------	-----------	---------------	-----------	-------	------

Step 2: After export, gather the names of the 2-3 agents provided by the STL for line assignment for the 3282 process.

Step 3: For the distributing process, we should assure that the RRtasks extracted will be distributed equally among the agents. By using this process of extraction we could distribute close to equal amounts of RRtasks to the assigned agents.

A	B	C	D	E	F	G
RRTaskNumber	OAIHFNONRISOIEN					
RRTaskNumber	OAIHFNONRISOIEN					
RRTaskNumber	OAIHFNONRISOIEN					
RRTaskNumber	OAIHFNONRISOIEN					
RRTaskNumber	OAIHFNONRISOIEN					
RRTaskNumber	OAIHFNONRISOIEN					
RRTaskNumber	OAIHFNONRISOIEN					
RRTaskNumber	OAIHFNONRISOIEN			Abstract	RRtasks Count under an abstract ID	Sum
RRTaskNumber	OAIHFNONRISOIEN			OAIHFNONRISOIEN	453	G10 453
RRTaskNumber	OAIHFNONRISOIEN			MFIQUESRLIRAWF	573	=F10+G9
RRTaskNumber	OAIHFNONRISOIEN			AWDTSRTHAEWRG	4567	5593
RRTaskNumber	OAIHFNONRISOIEN			RAETHSRYNDAEW	54	5647
RRTaskNumber	OAIHFNONRISOIEN			TASWRGSRBYBGYJ	354	6001
RRTaskNumber	OAIHFNONRISOIEN					
RRTaskNumber	OAIHFNONRISOIEN					
RRTaskNumber	OAIHFNONRISOIEN					

Step 4: After sum of RRtasks under an abstract, we should find the total of sum and divide it to how many agents that are assigned to the 3282 bulk completion.

5. Exceptions & Escalation

- **Issue:** Authorized agents are offline or at capacity.
 - **Action:** Request the STL to designate temporary backup agents with bulk permissions.
 - **Escalate To:** STL.

6. Quality Check / Expected Result

- **Expected Result:** The 3282 volume is cleared rapidly without impacting the SLA of other Rule IDs in the CA Domain.
 - **Verification:** Confirm via the monitoring tool that the 3282 count is decreasing at a rate faster than standard manual processing.
-

7. Records / Outputs

- **Volume Recovery Report:** Document the total 3282 volume cleared during the bulk session.

Daily Data Downloads

IR/Pre-Items Closed

Item Review Closed

1. Access ServiceNow

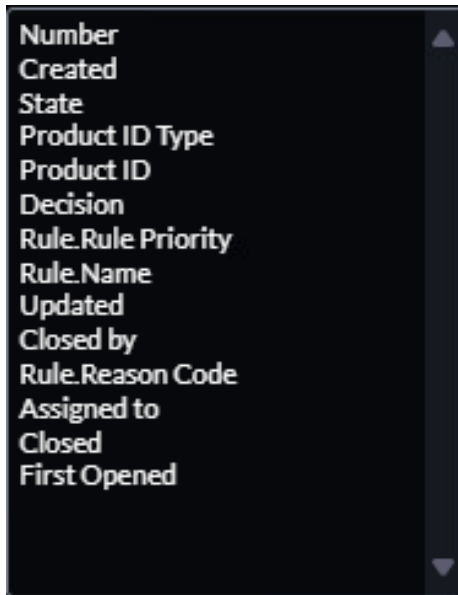

- Use the provided ServiceNow link to download daily closed tasks.
- Ensure the correct filters are applied:
 - "Closed by" field must not be empty.
 - "Closed at" must be set to yesterday's date.
- **Note:** Make sure that the time zone on ServiceNow is set to US Eastern.
- **Note:** If the file exceeds 300,000 rows, the download must be split into two separate files.

Service Now (SNOW / SNW)

Process: Setting Up ServiceNow

1. Open ServiceNow

Go to the dashboard using this [[Realtime Dashboard v2](#)].

Select the required priority.

High Priority (Custom)	P2 (US or CA)	P4 (US or CA)
P1 (US or CA)	P3 (US or CA)	Pre-Items

Confirm the correct priority to assign based on SLA (lines assigned must come from the RTA).

2. Organize the Tab

On the dashboard, click the box for the chosen priority to open the tab.

On the tab, right-click the Abstract Product Id column → select Group by Abstract Product Id.

Sort the Created column in ascending order (arrow up).

3. Check Requests in Cliq

Go to the Trust and Safety Channel using this [[#WMT - Trust & Safety](#)].

Find the latest request without any reaction.

React with a waiting emoji (or similar) to acknowledge you'll assign the line.

4. Verify Agent Training

Assign lines to the next capable / trained agent:

US-trained only: Assign lines from the US tenant (P1, P2, or P3 based on RTA's priority).

Cross-trained (US + CA): Can handle any tenant.

To confirm CA training:

Open the Allowed CA Trained Agents sheet [\[CA Trained\]](#).

Press Ctrl + F, type the agent's name.

If found → allowed for CA lines. If not → US only.

5. Assign Lines

In the tab, go to the Assign To column.

Click on a row marked "empty."

Hold Ctrl, drag down, and highlight the desired number of lines.

Press Enter, then type the agent's name or VNUSERNAME.

Tip: Use Ctrl + Shift + ↓ to quickly highlight multiple rows. Then press Enter and enter the agent's name or VNUSERNAME.

Press Enter or click the check button to confirm.

6. Confirm in Cliq

Return to the agent's request in Cliq.

Mark the request to show you've assigned a line.

Repeat for other agents as needed.

Important Notes

P1: Contains OFAC lines → new hires are not allowed to answer.

P3: Contains GLR → all agents may answer.

Assign at least 35 lines per agent.

If an Abstract Product ID has more than 35 lines, assign it to only one agent.

Support

If you have questions, contact any RTA on shift for assistance.

Daily Data Download

Step-by-Step Process: Data Downloads (Walmart Drive 2.0)

Purpose

To standardize the process of downloading and uploading operational data files into Walmart Drive 2.0 for accurate tracking and reporting.

Requirements

- Access to [Walmart Drive 2.0](#)
 - Access to source systems (IC, ServiceNow, etc.)
 - Access to [Walmart RTA - Links Directory](#)
-

DATA DOWNLOADS			
Dataset	Upload Path	Interval	Notes
US + CA New	03 > 005	3 hours	
SKU Volume	03 > 002	8 hours	
Pre-Items (Closed)	06 > 003	Daily	
Pre-Items Volume	06 > 002	Daily	
RO Closed	05 > 009	Daily	Grayz & Sheena
Rights Owner Volume	05 > 005	Daily	
Zoho vs. IC	02 > RAW IC & Trimmer	Daily	Divide in 2 parts, 12hrs each

Verification Steps (After Upload)

1. Open and confirm data integrity (spot-check a few rows).
2. Check naming format and folder placement.

Ongoing

Current Walmart week vs 30 Days Audit comparison

Standard Operating Procedure (SOP) for Walmart Support |Current Walmart week vs 30 Days Audit comparison

Purpose

The purpose of this analysis is to evaluate performance trends across Walmart Lines of Business (LOBs)—Item Risk Review, Rights Owner, Manual Site Sweep, Golden Gate, WERCs, Product Safety Incident, Product Safety CPC Review – 3P, and Product Safety Review – SNAP—by comparing each LOB's audited score for the current week against its average audited score from the previous 30 days.

This comparison aims to identify short-term improvements, declines, or consistency in performance across LOBs, enabling timely insights, targeted quality interventions, and data-driven decisions to sustain and improve audit quality standards. This analysis is also used for our **Weekly Business Report(WBR)**

Scope

This SOP applies to:

- RTA
- QAs

Roles & Responsibilities

List the key roles involved.

Role	Responsibilities
QA	Each Line of Business (LOB) has a dedicated QA Analyst responsible for entering and maintaining data within their assigned template per day.
RTA	RTA will consolidate data across all Lines of Business (LOBs) and

calculate the corresponding weekly averages.

3. Tools / Requirements

- Power BI
- Google Sheets
- Microsoft Excel

4. Procedure (Steps)

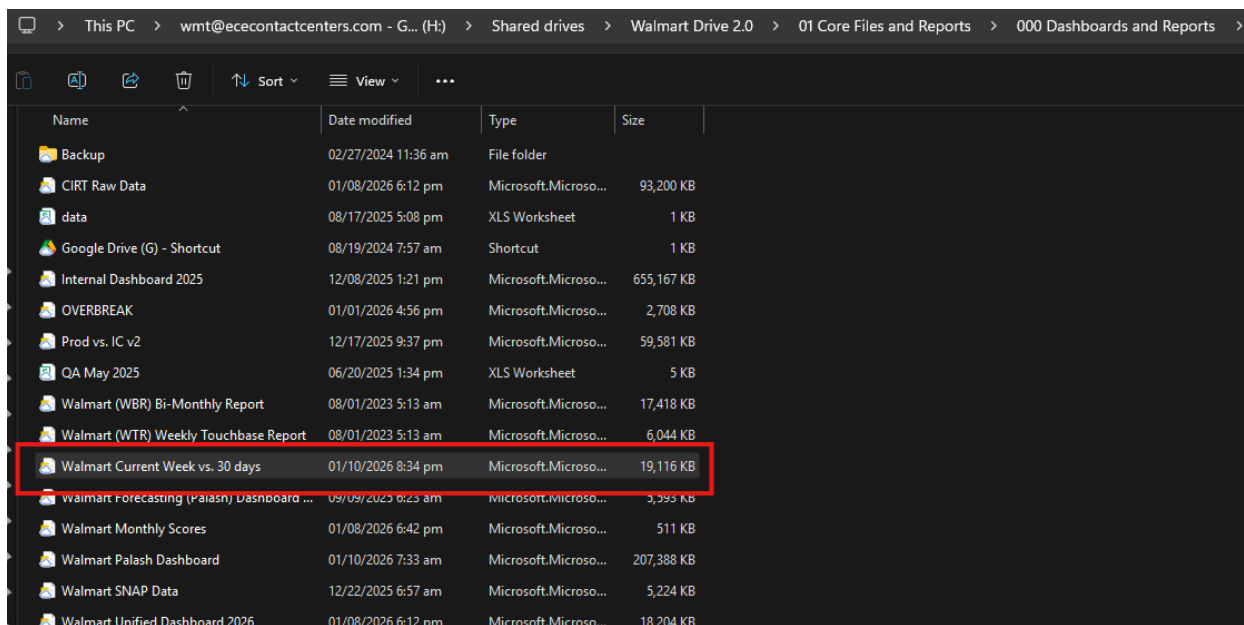

Step 1: Open the Current Week vs 30 days Dashboard

Open the Power BI dashboard that automatically consolidates QA audit data by Line of Business (LOB) along with the sheet where the performance comparisons are conducted

File name: Walmart Current Week vs. 30 days

File Directory: H:\Shared drives\Walmart Drive 2.0\01 Core Files and Reports\000 Dashboards and Reports

Report Sheet Link: [📄 Latest Week vs 30 Days prior QA Scores](#)

Intraday and Capacity Outlook

Standard Operating Procedure (SOP) for Walmart Support |Workforce Management – Intraday Updating & Capacity Outlook

Purpose/Scope

To monitor real-time staffing, track workforce capacity, and provide accurate reporting to the client. Intraday performance monitoring, capacity planning, variance tracking Tools Used: Google Sheets – “Walmart Intraday Template”

Outputs: Updated Intraday Summary, Capacity Outlook Report

Intraday Updating Process Objective: To provide accurate real-time staffing performance and intraday updates.

Procedure:

1. **Open the Walmart Intraday Template** in Google Sheets.
2. **Go to Agents List** sheet:
 - Verify all agent names and weekly LOB assignments are up to date.
 - This sheet serves as the reference for all calculations.
3. **Do not manually edit the Intraday** (Do Not Manually Edit) sheet — it is formula-driven.
4. **Check the Summary sheet:**
 - Validate total headcount per LOB
 - Compare staffing vs requirement
 - Identify anomalies or missing agents
5. **Once validated, export or share the Summary sheet** with the client.

Output: Updated Intraday Summary Report sent to the client.

Capacity Outlook Updating Process

Objective: To track workforce health per LOB and overall capacity.

Procedure:

1. Open the Capacity Outlook sheet.
 - a. Access the latest version of the Capacity Outlook sheet.
 - b. Confirm time zone alignment: **All tracking is in Eastern Standard Time (EST).**
2. For each LOB and the grand total, update the following fields:

Field	Description	Action Required
Required HC	Client-required headcount	Enter client-mandated staffing numbers
Planned IO Shrinkage	Planned shrinkage due to leave, training, etc.	Input forecasted shrinkage values
Planned Hours Post Shrinkage	Available hours after planned shrinkage	Calculate based on shrinkage impact
Planned AHT	Target AHT used for planning	Input client/operations target
New Hire Planned (Prod Start WK)	Planned new hires starting production	Record scheduled onboarding
Planned Move In	Agents transferring into the LOB	Add confirmed transfers
Planned Move Out	Agents transferring out of the LOB	Deduct confirmed transfers
Projected Shrinkage	Expected shrinkage based on trend	Update with latest forecast
Actual HC	Current active headcount	Pull from HR/operations data
Actual Attrition Count	Total attrition recorded	Update with latest attrition numbers

Expected Hours Post Actual Shrinkage	Available hours after actual shrinkage	Calculate based on actual shrinkage
Production HC O/U	Over or under production HC	Compare required vs. actual HC
New Hire Actual	Actual new hires onboarded	Record actual onboarding numbers
New Hire Planned vs Actual O/U	Variance of planned vs actual hires	Calculate difference
Min of Planned vs Expected Hrs	Minimum hours between planned & expected	Identify lowest available hours

3. Timeline & Change Management

- a. This sheet must be updated at least 3 weeks in advance to ensure proactive workforce planning.
- b. Update sudden changes immediately as they come in (e.g., attrition, transfers, new hire delays).

4. Validate variances (O/U) and flag critical gaps.

- a. Output: Updated Capacity Outlook Report for staffing decisions and client reporting.

5. Send an email notification of changes to Tania and Sanjay.

Palash Reports

Standard Operating Procedure (SOP) for Walmart Support

|Palash Report

Purpose/ Scope

- Predict workload volumes based on historical trends, seasonality, and known business changes.
- Support capacity planning and scheduling processes.
- Provide actionable insights for staffing, hiring, and budget planning.
- Reduce under- or over-staffing and improve service level performance.

Roles & Responsibilities

List the key roles involved.

Role	Responsibility
RTA	Manages the download on a weekly basis

Tools / Requirements

- VDI
- Power Bi
- Google Sheets
- Microsoft Excel

Procedure

Step 1: Download the Closed and Volume of the following Line of Business(LOBs)

- **SKU Volume (Palash Forecasting)**

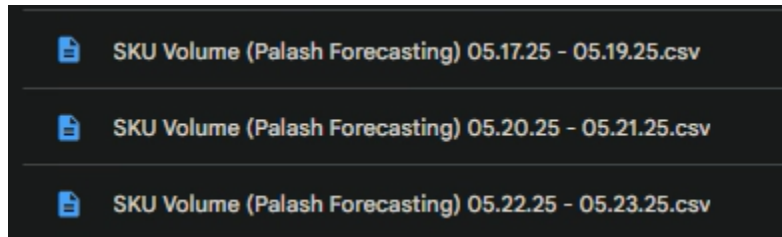

- Access ServiceNow
 - Use the provided ServiceNow link to download SKU Volume tasks.
 - Ensure the correct filters are applied:
 - "Created - between - dates" field must not be empty.
 - The date must be set to the needed week's date every **Monday EST**

covering the previous Walmart Week (Saturdays to Fridays).

- Note: Make sure that the time zone on ServiceNow is set to US Eastern.
- Note: If the file exceeds 300,000 rows, the download must be split into three separate files(Sat-Monday, Tue-Wed, Thur-Fri).

Ex:

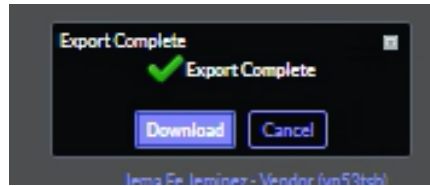

- Data Extraction
 - Extract the downloaded file from VDI.

– Right click the header, export and choose CSV:

- Click "Download"

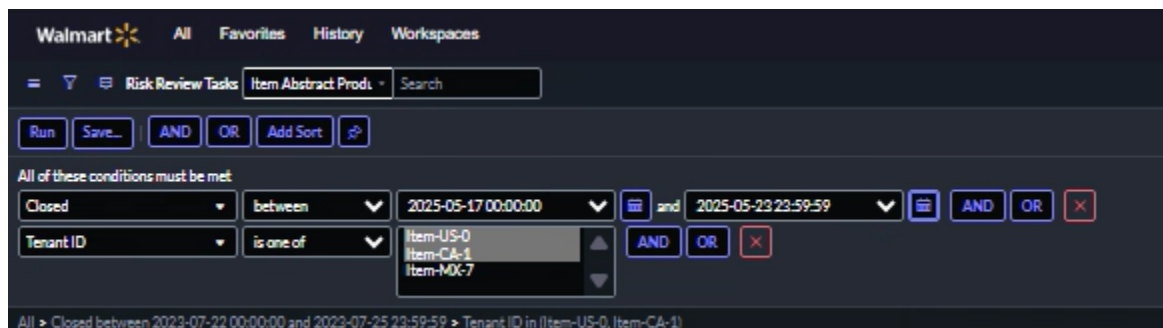

Save the file to Google Drive.

G:\Shared drives\Walmart Drive 2.0\01 Core Files and Reports\004
Palash Forecasting\Raw Data\SKU Volume

- When saving a file follow the file name format:
Ex: SKU Volume (Palash Forecasting) MM.DD.YYYY - MM.DD.YYYY

- **SKU Closed (Palash Forecasting)**

- Access ServiceNow
 - Use the provided ServiceNow link to download SKU Closed tasks.
 - Ensure the correct filters are applied:
 - "Closed - between - dates" field must not be empty.
 - The date must be set to the needed week's date every **Monday EST covering the previous Walmart Week (Saturdays to Fridays)**.

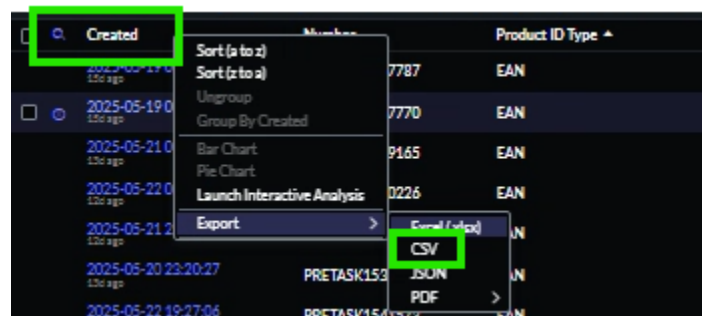

- Note: Make sure that the time zone on ServiceNow is set to US Eastern.
- Note: If the file exceeds 300,000 rows, the download must be split into three separate files(Sat-Monday, Tue-Wed, Thur-Fri).

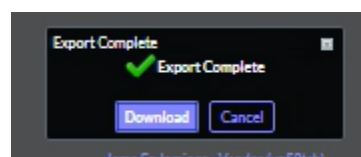

EX:

	SKU Closed (Palash Forecasting) 05.17.25 - 05.19.25.csv
	SKU Closed (Palash Forecasting) 05.20.25 - 05.21.25.csv
	SKU Closed (Palash Forecasting) 05.22.25 - 05.23.25.csv

- Data Extraction
 - Extract the downloaded file from VDI.
 - Right click the header, export and choose CSV:

- Click "Download"

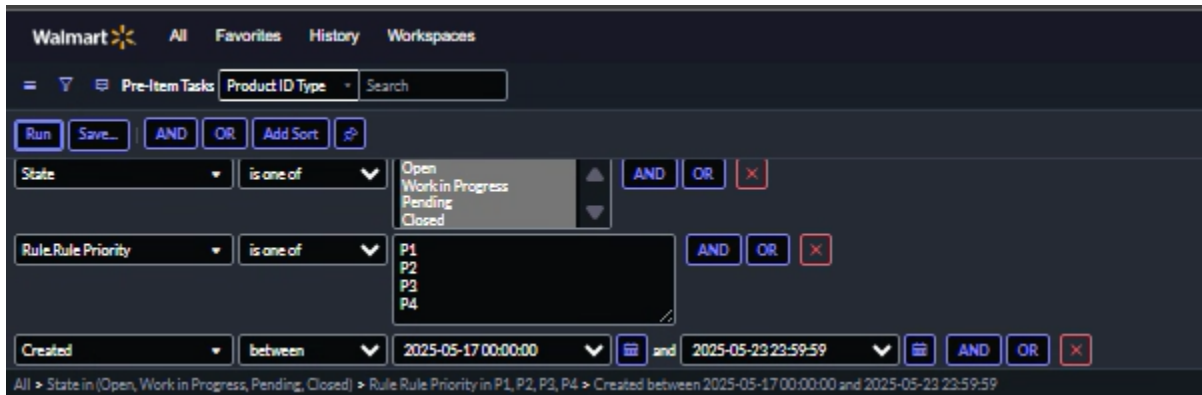

Save the file to Google Drive.

- G:\Shared drives\Walmart Drive 2.0\01 Core Files and Reports\004 Palash Forecasting\Raw Data\SKU Closed
- When saving a file follow the file name format:
SKU Closed (Palash Forecasting) MM.DD.YYYY - MM.DD.YYYY

-
- **Pre-Items Volume (Palash Forecasting)**
 - Access ServiceNow

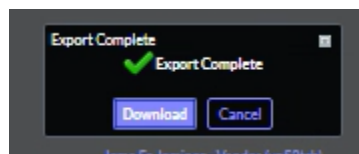

- Use the provided ServiceNow link to download Pre-Items Volume tasks.
- Ensure the correct filters are applied:
 - "Closed - between - dates" field must not be empty.
 - The date must be set to the needed week's date every **Monday EST covering the previous Walmart Week (Saturdays to Fridays)**.

- Note: Make sure that the time zone on ServiceNow is set to US Eastern.
- Data Extraction
 - Extract the downloaded file from VDI.
 - Right click the header, export and choose CSV:

→ **Data Extraction**

- Extract the downloaded file from VDI.

– Scroll down to the last graph then right click the 3 dots, and choose export data:

The screenshot shows a data table with columns: Company_Name, CATLG_ITEM_ID, Create_Date, Date_Found, Exact_Flag, Priority, Seller Country, and a URL. The first row contains data for 'WMT' with item ID '16630614052'. A context menu is open over the table, with the 'Export data' option highlighted in green.

Company_Name	CATLG_ITEM_ID	Create_Date	Date_Found	Exact_Flag	Priority	Seller Country	
WMT	16630614052	5/22/2025	5/25/2025	False	1	China	https://www.walmart.com/ip/ZZSP-Steel-Smoker-Sand-Urn-10-Dia-X-2

- Click **“Export”**

Which data do you want to export?

Export your data in the format that suits your needs. If you have a lot of data, the number of rows you export might be limited depending on the file type you select. [Learn more about exporting data](#)

☒ **Data with current layout**
Export this data in the same layout you see now, but without any icons, colors, or other formatting you added.

☐ **Summarized data**
Export the summarized data used to create your visual (for example, sums, averages, and medians).

☐ **Underlying data**
The report author turned off this option

File format:
.xlsx (Excel 150,000-row max) v

Export **Cancel**

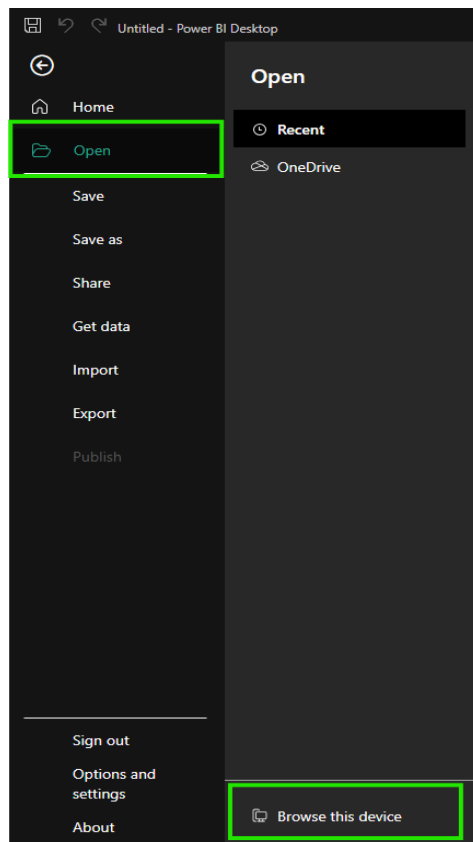

- Save the file to Google Drive.

G:\Shared drives\Walmart Drive 2.0\01 Core Files and Reports\004 Palash Forecasting\Raw Data\CIRT

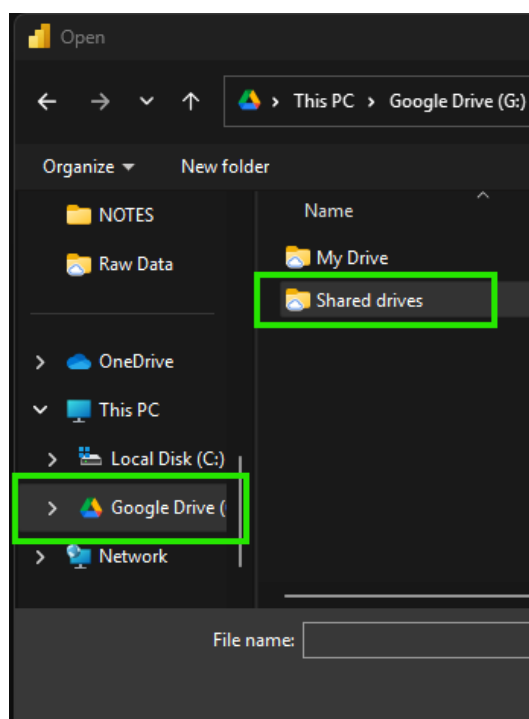

- When saving a file follow the file name format:
CIRT Volume (Phalash Forecasting) MM.DD.YYYY - MM.DD.YYYY

Step 2: - Update the Palash Dashboard in Power BI after downloading all the data on all LOBs

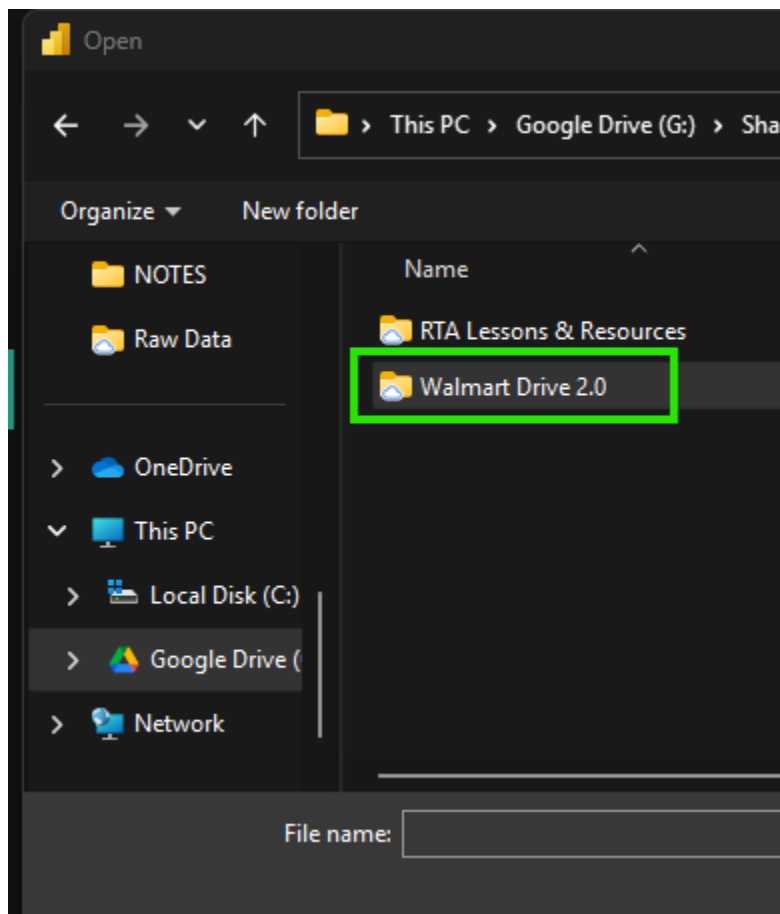

- Open or use **the outside PowerBI Desktop app** and open/search the “Walmart Forecasting (Palash) Dashboard” in our Google Drive.
 - Click Open and then go to Browse this device

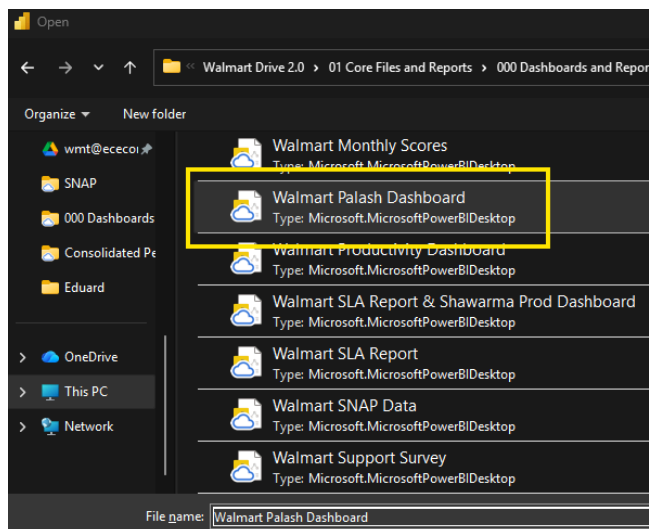

- Go directly to our Google Drive, click the Shared drives and Open.

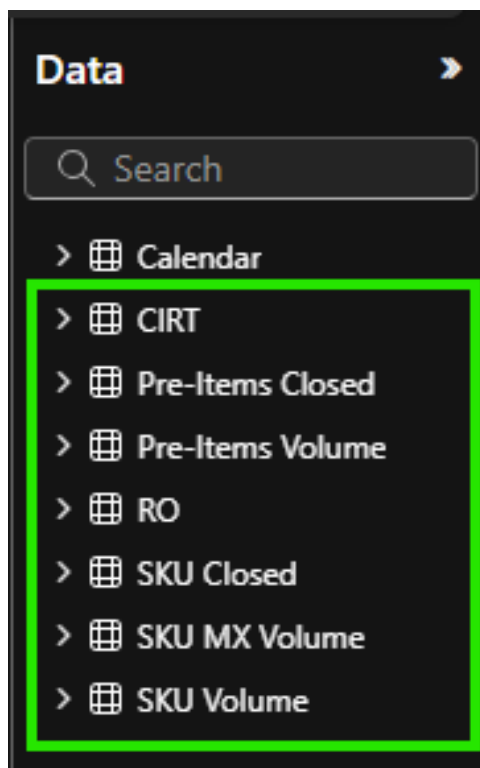

- Open the Walmart Drive 2.0

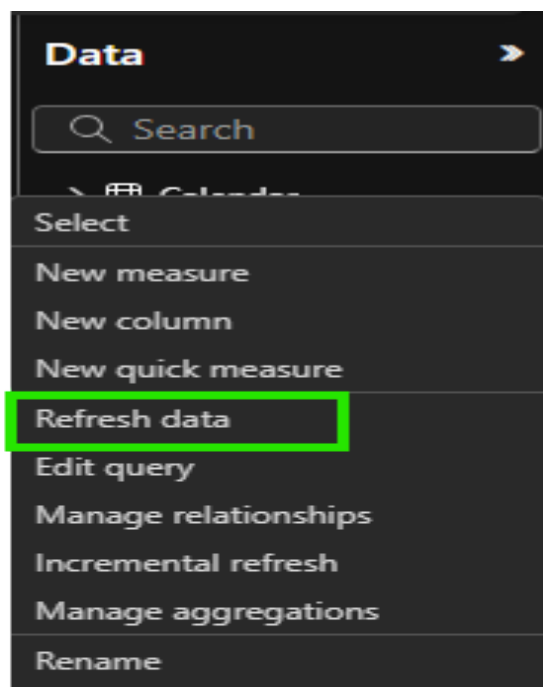

- Click “01 Core Files and Reports” go to “000 Dashboards and Reports” and Open “Walmart Palash Dashboard”

- Refresh Downloads

- Data per LOB's
- Hover to the right and click the 3 dots, and choose "Refresh Data"

- After all the data has been refreshed, select the appropriate Walmart week.

Walmart FORECASTING DASHBOARD Item SKU Volume & Closed									
Item SKU Volume					Walmart Week		Item SKU Closed Lines		
Date	Hour	Tenant	Priority	Sum of Count	11/29/2025		Date	Hour	Sum of Count
12/5/2025		0 Item-CA-1	P1	163			12/5/2025	0	48

Walmart FORECASTING DASHBOARD Pre-Items Volume & Closed									
Pre-Items Volume					Walmart Week		Pre-Items Closed Lines		
Date	Hour	Tenant	Priority	Count	11/29/2025		Date	Hour	Count
12/2/2025		0 Compliance - Consumer Protection	P1	118			11/29/2025	5	90

Walmart FORECASTING DASHBOARD Rights Owner									
Rights Owner CA					Walmart Week		Rights Owner US		
Start of Week	Date	Hour	Claim Type	Count	11/29/2025		Start of Week	Date	Count
12/01/2025	12/01/2025						12/01/2025	12/01/2025	

Walmart FORECAST DASHBOARD Item SKU Volume & Closed									
Walmart Week					Item SKU MX Volume				
11/29/2025					Date	Hour	Priority	Sum of Count	

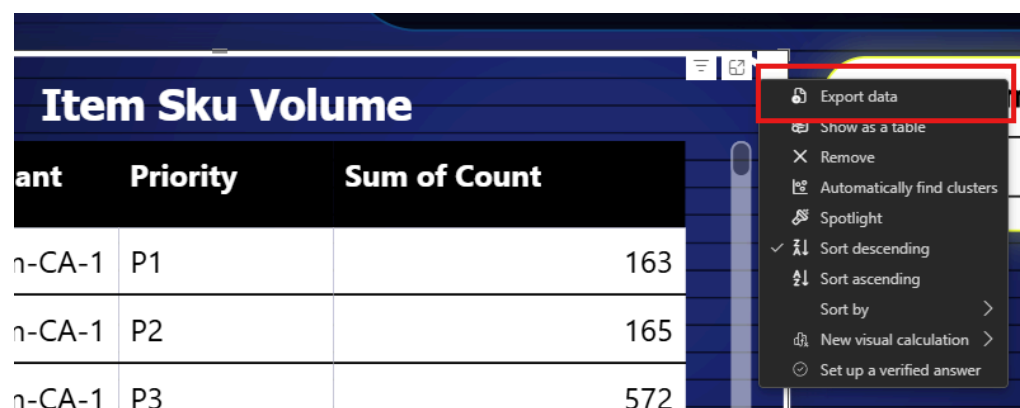

NOTE: Please double check every LOB's data per tab. And then "SAVE" the file.

SKU	Pre-items	CIRT	Item SKU MX	RO US and CA	+
-----	-----------	------	-------------	--------------	---

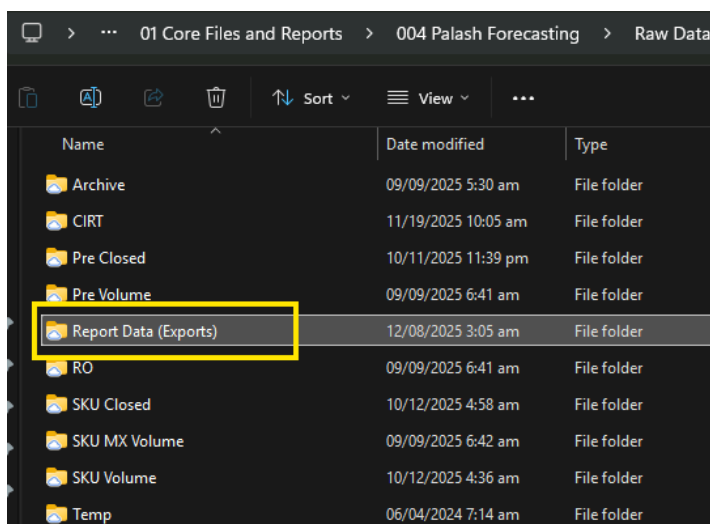

Step 3: - Export and Save

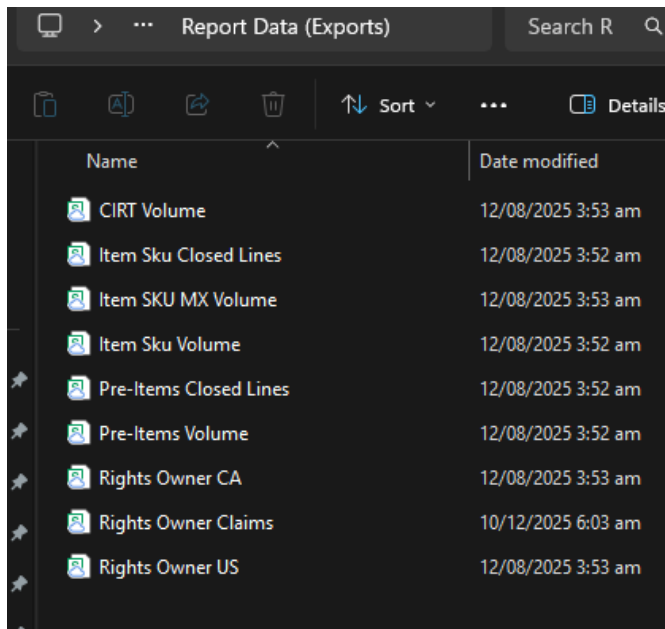

- After selecting the correct dates, hover your mouse over the data table. The 'More options' (. . .) button will appear in the top-right corner of the table. Click

on it, then select 'Export Data' and this file should be saved in the “Report Data (Exports)”

- Save each table to the “Report Data (Exports)” Folder. Just Replace the file directly. The default location should be:
G:\Shared drives\Walmart Drive 2.0\01 Core Files and Reports\004 Palash Forecasting\Raw Data\Report Data (Exports).

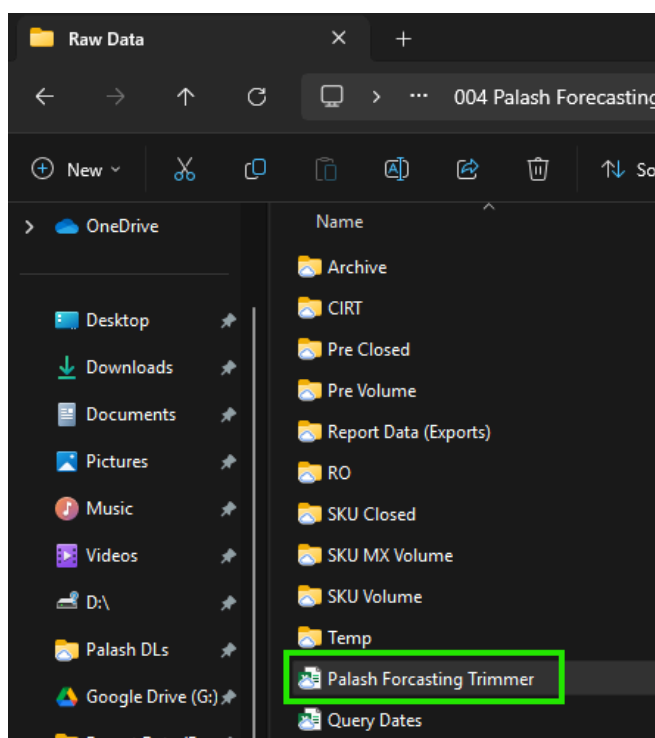

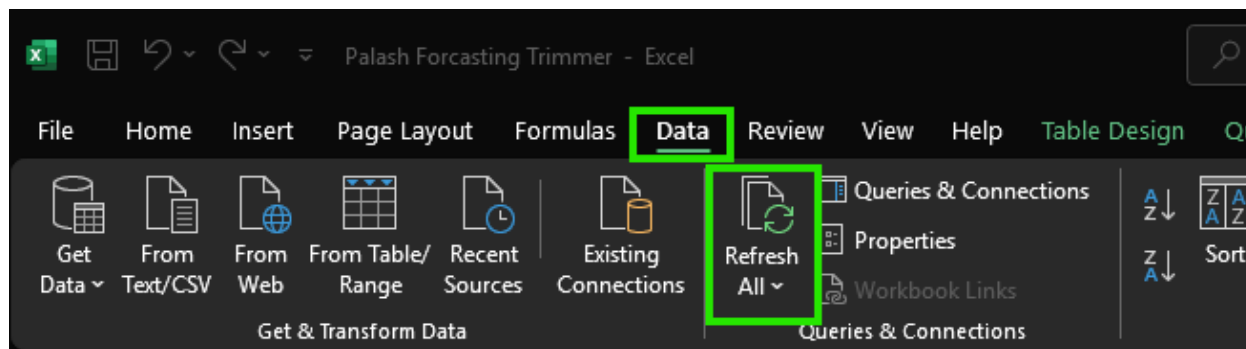

Name	Date modified
CIRT Volume	12/08/2025 3:53 am
Item Sku Closed Lines	12/08/2025 3:52 am
Item SKU MX Volume	12/08/2025 3:53 am
Item Sku Volume	12/08/2025 3:52 am
Pre-Items Closed Lines	12/08/2025 3:52 am
Pre-Items Volume	12/08/2025 3:52 am
Rights Owner CA	12/08/2025 3:53 am
Rights Owner Claims	10/12/2025 6:03 am
Rights Owner US	12/08/2025 3:53 am

- Next, double check the Palash Forecasting Trimmer file from the Raw Data Folder.

G:\Shared drives\Walmart Drive 2.0\01 Core Files and Reports\004 Palash Forecasting\Raw Data\Palash Forecasting Trimmer.xlsx

- In the Palash Forecasting Trimmer file, go to “Data” and click “Refresh All”.
- Once done, check each LOB on every tab to ensure that all downloaded data is up to date.

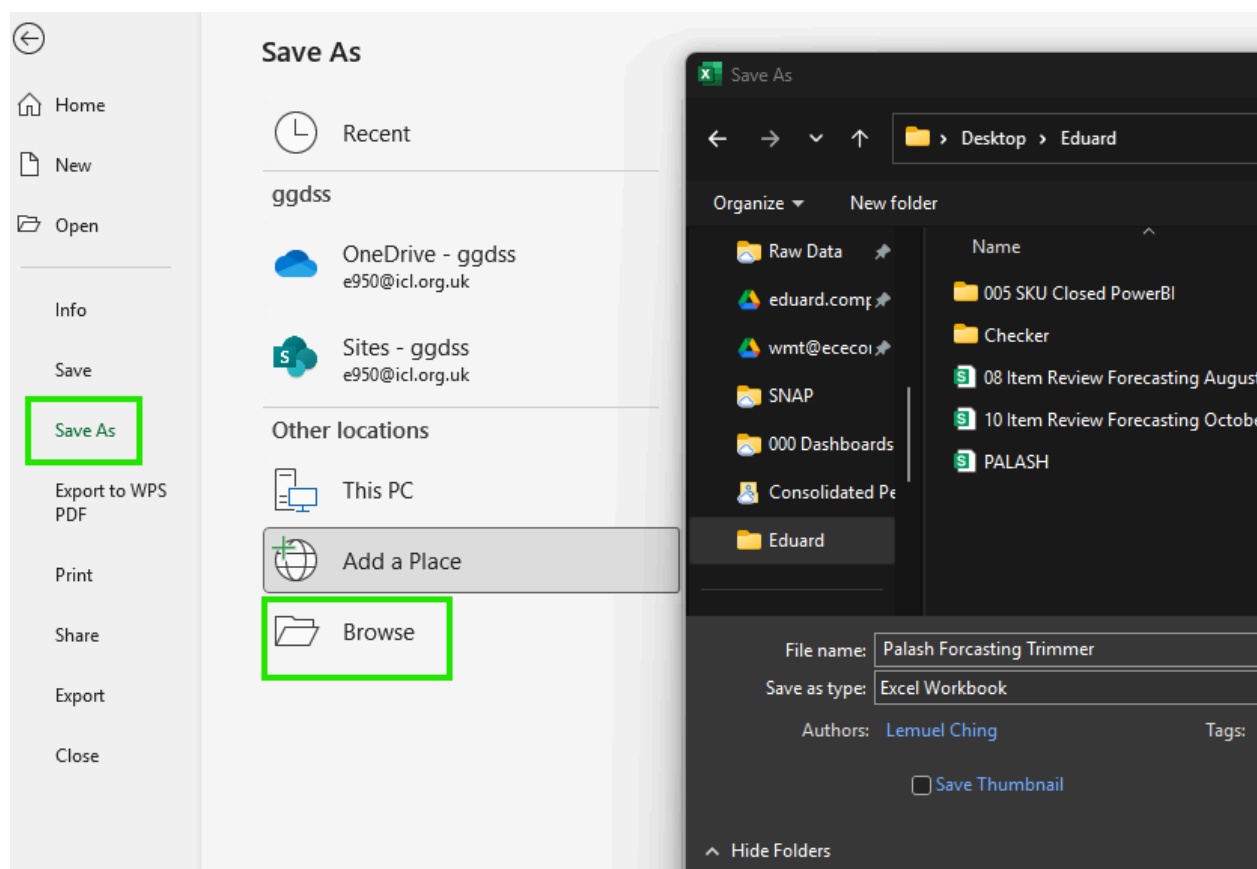

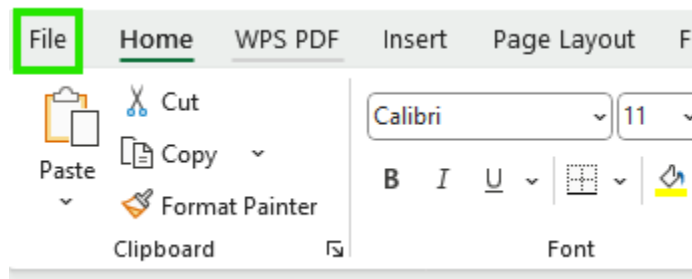

The screenshot shows the Microsoft Excel spreadsheet with the following data:

	A	B	C	D	E
	Date	Hour	Tenant	Priority	Sum of Count
1	5/24/2025	0	Item SKU CA	P1	69
2	5/24/2025	0	Item SKU CA	P2	66
3	5/24/2025	0	Item SKU CA	P3	67
4	5/24/2025	0	Item SKU US	P1	334
5	5/24/2025	0	Item SKU US	P2	1712
6	5/24/2025	0	Item SKU US	P3	1790
7	5/24/2025	0	Item SKU US	P4	186
8	5/24/2025	0	Item SKU US	P5	29
9	5/24/2025	0	Item SKU US	P7	58
10	5/24/2025	0	Item SKU US	P8	215
11	5/24/2025	1	Item SKU CA	P1	6
12	5/24/2025	1	Item SKU CA	P2	23
13	5/24/2025	1	Item SKU CA	P3	31
14	5/24/2025	1	Item SKU US	P1	110
15	5/24/2025	1	Item SKU US	P2	209
16	5/24/2025	1	Item SKU US	P3	167
17	5/24/2025	1	Item SKU US	P4	17
18	5/24/2025	1	Item SKU US	P5	53
19	5/24/2025	1	Item SKU US	P5	53

The bottom of the screenshot shows the worksheet tabs: 'Item SKU Volume Lines', 'Item SKU Closed Lines', 'Item SKU MX Volume', 'CIRT Volume', and 'Pre-Items Volume Lines'. The 'Item SKU Volume Lines' tab is selected and highlighted with a green box.

- Once all the data is set and updated, SAVE the file and create a personal copy for your own use.

Step 4: After verifying that all the downloaded data is correct, send the file via email.

- The recipients are as follows:

- Body of the message

Hi Palash,

Attached herewith is the file for Item Review Forecasting May 17 - May 23, 2025. I have separate tabs for item SKU (Volume & Closed), Pre-item (Volume & Closed) and Right Owner US and CA Volume. Please expand the tabs if not visible since it is sometimes hidden from Excel view.

Please note that the CIRT data is still truncated because the 150,000 download limit issue has not yet been resolved.

Note: PLEASE MAKE SURE TO ATTACH THE EXCEL FILE TO THE EMAIL BEFORE SENDING IT!

Scheduling management

Shift Bid / Swapping

Standard Operating Procedure (SOP) for Walmart Support |Workforce Management – Scheduling, Staffing, Shift Bid & Swapping

Scope

Schedule creation, shift bid, schedule swaps, final schedule release
Tools Used: Google Sheets – Schedule Shell / Shift Bid / Master Schedule files
Outputs: Approved Schedule Shell, Initial Shift Assignments, Updated Swaps, Final Official Schedule.

Purpose

To ensure accurate staffing coverage, fair shift allocation, and timely final schedule release.

- Schedule Shell Creation (Staffing Requirement) Responsible Team: Scheduling Department / WFM Objective: To create a schedule shell based on client-provided staffing requirements derived from forecasted volume.
 - Provide the forecasted volume to the client via WFM.
 - Convert volume into staffing requirements (agents per hour):
 - The client uses the forecasted volume to calculate required agents per hour.
 - The calculated staffing requirements are then given back to our RTAs/WFM team.
 - Create the Schedule Shell showing:
 - hourly headcount requirements
 - required shift patterns
 - Validate:
 - staffing matches the client-provided requirements
 - coverage is balanced across all hours
 - Endorse the completed Schedule Shell to WFM/Operations.
 - Output: Approved Schedule Shell ready for shift assignment and bidding.
-

Shift Bid Process Objective: To accommodate the changing volume and demand of the account, occasional team or schedule changes may occur, subject to client approval.

Procedure

1. Collect last 3 months Achieve Scores and latest PPH data. (Use YTD Ranking sheet)
 - i. Create a Stack Rank list:
 1. rank agents by Achieve Score
 2. use PPH as tie-breaker
 2. Open Shift Bid window for 1 week.
 3. Agents submit their top preferred schedules using the Shift Bidding Form.
 - a. Placing the same schedule across all slots results in forfeiture of the bid, and the agent is placed at the bottom of scheduling priority.
 - b. Failure to submit a bid within the allowable week results in assignment to a random open schedule slot after all other bids are addressed.
 4. Monitor bidding progress daily and resolve issues.
-

Rules

- Shift bidding priority is determined by the agent's 3-month average scorecard scores.
 - Secured bids guarantee the preferred schedule if not claimed by a higher-ranked agent. Output: Initial list of assigned shifts based on bid results.
 - Schedule Swap Process Timeline: Immediately after Shift Bid closes Responsible Team:
-

WFM Procedure:

1. Announce Swap Window.
2. Receive swap requests from both agents involved.
 - a. Validate that:
 - i. Staffing requirements are maintained
 - ii. No over/under-staffing occurs
3. Approve valid swap requests and update master schedule. Swap Request Rules:
 - a. Both agents must submit the official Swap Request Form.
4. Requests submitted by only one agent will not be processed.
5. Approval is based on availability and operational requirements. Output: Updated schedule with all approved swaps incorporated.

Note: *The Responsible Team for the final schedule release is the WFM*

Final Schedule Procedure

1. Lock final schedule after completion of swaps.
2. Revalidate hourly coverage and total headcount.
3. Release the final schedule to Operations and agents. Output: Official Final Schedule.
4. Schedule Adjustments for Specific Needs
 - a. Agents who require schedule adjustments due to education or medical conditions must provide proper documentation.
 - b. Adjustments are applied only to approved schedule options; creating personal schedules is not allowed.
 - c. Approval must come from Higher Operations (OM, AOM, STL).

Reminder: *All schedules, shift bids, and swaps are in Eastern Standard Time (EST).*

Full-Time Equivalent (FTE)

Standard Operating Procedure (SOP) for Walmart Support |Scheduling for Internal Calibration (Full-Time Equivalent)

Purpose / Scope

The purpose of this procedure is to identify the optimal time slots for internal calibration sessions based on agent headcount and production requirements. This ensures that LOB (Line of Business) specific calibration requests are met without compromising service levels or dropping production shrinkage below acceptable thresholds during peak occupancy.

Roles & Responsibilities

- **Role: RTA Analyst** Responsibility: The analyst extracts schedules, identifies peak occupancy intervals, and sets calibration times within the WFM tools.
 - **Role: Requestor** Responsibility: The requester submits the initial ticket identifying the specific LOB and/or agents needed for the session.
 - **Role: Team Leader** Responsibility: The Team Lead ensures agent adherence to the finalized calibration schedule
-

Tools / Requirements

- WFM Software (Transition Sheet, Workforce Rest) for schedule data.
 - Internal Ticketing System for request tracking, **Zoho**.
 - FTE Scheduling Template (Excel or Google Sheets).
-

Procedure (Steps)

Step 1: Process the Headcount Request Ticket The process begins when a ticket is received from a specific Line of Business (LOB) requesting headcount for an internal calibration. Review the ticket to confirm the requested date and the number of agents involved using the template made.

Step 2: Initialize the Schedule Extraction Template Open the FTE template. This step is critical for the filtering process, as it allows you to visualize the count of agents scheduled throughout the day. The template will serve as the primary tool to calculate the impact on production.

Step 3: Extract Active Agent Schedules Access Workforce Rest or the scheduling sheet and extract the full schedule for all agents active on the date requested.

Step 4: Identify Peak Occupancy and Maximum FTE Paste the extracted data into the template. Analyze the intervals to find the peak occupancy, which is the specific time of day when the highest number of agents are simultaneously on shift. Using the FTE template here is essential to see where the floor is most "padded" with staff.

Step 5: Set the Calibration Schedule Once the maximum peak time is identified, schedule the calibration during that window. Scheduling during peak occupancy ensures that pulling agents off the phones has the smallest possible impact on shrinkage and does not cause a service level drop.

Dumaguete	Tenured	Diego de la Cruz Nival	Defects Review				23:00	0	74	73	73	71	1	1	23:00	0	74	73	73	71	1	1	23:00	0	0	0	

Notes / Tips * Always ensure that the "Maximum Peak" does not conflict with pre-planned lunches or large-scale training sessions already in the system.

Exceptions & Escalation

- **Issue:** The requested headcount exceeds the available buffer during peak hours.
Action: Notify the LOB requestor that the headcount must be reduced.
Escalate: Operations
 - **Issue:** No clear "Peak" is visible due to high absenteeism.
Action: Deny the request for that specific date.
Escalate: Operations
-

Quality Check / Expected Result

The task is successful when the calibration is scheduled during the highest FTE interval of the day, resulting in a stable shrinkage rate and no negative impact on the queue.

Team Movement/Employee Movement

Standard Operating Procedure (SOP) for Walmart Support |WFM TeamMovement

Purpose

To ensure a standardized and organized approach in processing HR movements, the Workforce RTA team will be responsible for submitting HR Movement Forms to Zoho. This includes handling all employee transitions such as promotions, demotions, team leader and senior team leader movements, floating statuses, and other personnel changes within the operations team.

Please refer to this

 Standard Operating Procedure (SOP) for HR Movement Notification Form_9/19/2...

Process

Step 1: Operations Team Submission

- Any employee movement request must be formally submitted by the Operations Team via a Workforce Management (WFM) ticket.

RTA/WFM Ticketing System

Description

Upload Documents:

Document 1

Document 2

Document 3

Document 4

RTA Details

RTAs on Duty

Status

RTA/WFM Notes

- The WFM ticket must contain all necessary details, including employee name, ID, type of movement, effective date, and any required supporting documents.
- The ticket serves as an official record of the request, ensuring accountability and tracking.

Step 2: Verification by Workforce RTA

- The assigned RTA will review the submitted WFM ticket to verify completeness and accuracy.
- If any details are missing or unclear, the RTA will coordinate with the requestor to clarify and update the ticket before proceeding.
- If the movement request is invalid or does not align with company policies, the RTA will escalate to the Workforce Manager for further validation.

Step 3: Submission to HR Movement Form

- Once validated, the RTA will input the details into the HR Movement Form in Zoho following standard processes.
- After submission, the RTA must record the transaction and confirm with the Operations Team that the request has been processed.
 - i. **Specific Cases:**
 1. **Change of Account:** *The receiving program's RTA will process the movement. The Operations team must clearly indicate the new program and the effective date.*
 - a. **Wrong Account Assignment:** *If an employee is moved to the incorrect program, the RTA must correct the entry immediately and inform both the previous and receiving account teams.*
 2. **Change of Account (BENCH or Floating):** *The previous program's RTA will process the movement, indicating the start of floating status and its expected duration.*
 - a. **Floating Status Extended Beyond Expected Duration:** *If an employee remains on floating status longer than the indicated period, RTA should follow up with the Operations team for resolution.*

Step 4: Follow-Up & Confirmation

- The management team will process the movement request based on the submitted form.
 - RTAs are responsible for monitoring the status of each request and following up if processing delays occur.
 - Once the management team finalizes the movement, RTAs will update the WFM ticket and close it for record-keeping purposes.
-

Situational Events & Mitigations

1. Incomplete or Incorrect Ticket Submission

- If details in the WFM ticket are incomplete or inaccurate, the RTA will notify the Operations Team immediately.
- The movement request will not proceed until all required information is provided.

2. Urgent or Immediate Movements

- For time-sensitive changes (e.g., same-day promotions, demotions, or floating statuses), RTAs must escalate to Workforce Management for priority processing.
- The Operations Team must indicate urgency in the WFM ticket for faster turnaround.

3. Delayed Processing

- If the management team does not update the movement within the expected timeframe, the RTA must follow up within 48 hours.
- Persistent delays will be escalated to leadership for resolution.

4. Discrepancies in Movement Execution

- If an employee's movement does not reflect correctly in payroll or records, RTAs will coordinate with the management team for corrections.
- RTAs or operation teams must report discrepancies within 7 days of implementation for timely adjustments.

5. Employee Disputes on Movement

- If an employee contests their movement status, RTAs will refer them to the Operations Team for clarification.
- No adjustments will be made unless a new WFM ticket is submitted with approved corrections.

6. Mass or Multiple Employee Movements

- For batch movements (e.g., restructuring or large promotions), RTAs must prepare in advance and coordinate closely with the management team.
- A consolidated WFM ticket with all employees listed must be submitted to streamline processing.

Compliance & Accountability

- RTAs are responsible for ensuring all movements are properly documented and processed according to company policy.
- Operations Teams must adhere to the requirement of submitting a WFM ticket before any movement is processed.
- Any failure to comply with this process will be subject to review and corrective actions as necessary.

Notice to Explain

Return to Work

Standard Operating Procedure (SOP) for Walmart Support |Return To Work (RTWO)

Introduction

This Standard Operating Procedure (SOP) provides a comprehensive framework for monitoring employee attendance, identifying violations, and managing the preparation, review, and filing of disciplinary notices. It ensures a consistent and compliant approach to addressing No Call, No Show (NCNS) and other attendance-related issues, guiding the process from initial monitoring through final documentation and system submission. Serving as a central reference for Operations, Real-Time Analysts, and Human Resources, this SOP promotes accurate, fair, and timely handling of attendance concerns while maintaining proper records and supporting audit readiness.

Purpose

The purpose of this SOP is to standardize the monitoring of attendance, establish clear criteria for identifying NCNS and consecutive absences, ensure accurate and consistent preparation of NTE and NOD documents, and provide a structured process for administrative hearings and proper filing in Zoho. It promotes fairness, transparency, and compliance with company policies, ensuring that attendance-related disciplinary actions are timely, documented, and defensible.

A. Monitoring

This section outlines the process for monitoring agent time logs to ensure accurate tracking of time-in and time-out records. The primary objective is to identify agents with absences and determine whether those absences qualify as **No Call, No Show (NCNS)**.

	1 st Offense	2 nd Offense	3 rd Offense	4 th Offense
14. No call no show (NCNS) for three (3) or more consecutive working days is considered as Absence without leave (AWOL)	Dismissal			

Criteria:

- Employees who incur **NCNS absences for three (3) consecutive days** are subject to evaluation and possible sanctions if a violation is confirmed.

Manual Monitoring Procedure

- Access Zoho Time Logs**
 - Navigate to [Zoho Time Logs](#).
 - Search using the following criteria (code)
 - Account:** Walmart
 - Date Range:** Three (3) consecutive days
 - Absent:** Greater or equal to: 8

View Time Log Records ^{*} ▾

Save Changes

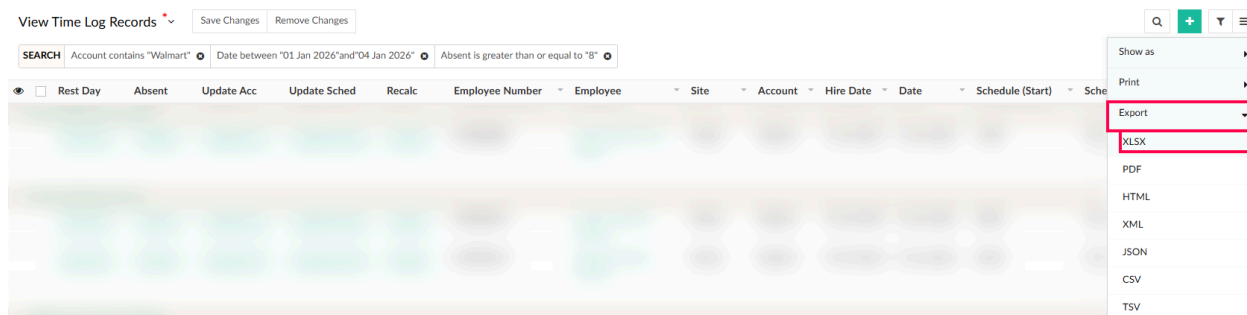

Remove Changes

SEARCH Account contains "Walmart" ✕ Date between "01 Jan 2026" and "04 Jan 2026" ✕ Absent is greater than or equal to "8" ✕

- For subsequent checks, include the previous three (3) days and the following three (3) days to ensure continuity.
 - Example:**
 - Initial check: January 1–3
 - After three days, recheck using: January 1–6
 - Continue the same rolling date range for succeeding

reviews.

- **Download Required Data**

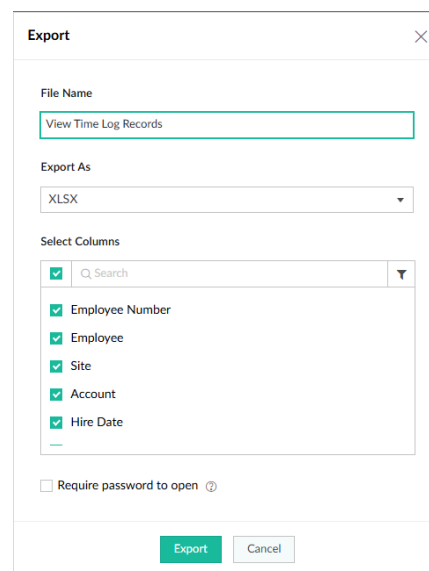

- Download the following columns:

- Employee Number
- Employee Name
- Date(s) of Absence
- Absence Value(s)

- **Update the Monitoring Sheet**

- Open the downloaded file.
- Copy the required columns and paste them into the [Monitoring Sheet](#).

- **Review in RTWO Pivot Monitoring**

- Go to the **RTWO PIVOT MONITORING** tab.
Identify employees with multiple consecutive absences.
- Filter employees with **two (2) or more consecutive absence counts**.
- These employees are subject to further review to determine the reason for their absences.

- **Absent Verification Process**

- The Absent Verification Process ensures that all employee absences are properly validated and documented before determining if they constitute a violation.
- Determine whether the employee has provided sufficient evidence to support the absence as valid.
- **Verification Steps**
 1. **Review Time Logs** – Confirm the employee's recorded time-in and time-out for the relevant dates.
 2. **Check APS (Admin)** – Verify administrative records for any approved leave or prior notifications.
 3. **Verify Attendance Notifications** – Ensure any formal notifications of absence have been submitted and recorded.
 4. **Review Emails** – Check for relevant email communications regarding the absence.
 5. **Line of Sight (LOS) Notifications** – Confirm any messaging app notifications under company systems that may provide context or justification for the absence.
- **Issuance of NTE**
 - If the absences are determined to be **intentional or unjustified**, the employee will be issued a **Notice to Explain (NTE)** for further clarification.

Important Reminder

*Consecutive absences are counted based on **actual business days missed**, regardless of whether they overlap with rest days, vacation leave (VL), or voluntary time off (VTO). If an employee is absent on consecutive business days, an **NTE must be issued**.*

B. NTE / NOD Document Preparation

BREW Tool

The **BREW Tool** is the system used for the preparation of **Notice to Explain (NTE)** and **Notice of Decision (NOD)** documents. The tool generates standardized documents by populating predefined placeholders with employee data, ensuring accuracy, consistency, and compliance with documentation standards.

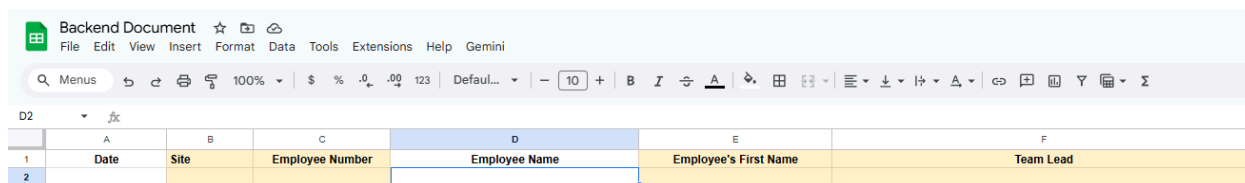

Related Article: [**Introducing BREW Tool**](#)

Process Integration

Once employees subject to disciplinary action have been identified, the BREW Tool must be used to generate the required documentation.

1. Employee Identification

- Confirm the list of employees who are required to receive an NTE.
- Encode the complete and accurate employee details into the [**BREW Tool backend sheet**](#).

	A	B	C	D	E	F
1	Date	Site	Employee Number	Employee Name	Employee's First Name	Team Lead
2						

2. Document Generation

- After all required fields in the backend sheet have been completed, proceed to **Step 2** of the [**BREW Tool**](#).
- Generate the NTE or NOD document.
- Download the generated file.
- Conduct a thorough **quality check** to verify accuracy, completeness, and proper formatting.

Generate Documents

Step 1: Select Sheet Tab

NTE.RTWO

Auto-Selected Template AUTO

Doc Type: NTE
Template: Return to Work Order - NCNS CWD Exc Absen
Description: For no-call no-show, CWD, and excused absences

Step 2: Generate Documents

Generated Documents
0 document(s)

3. Manual Review and Adjustments

- The BREW Tool is currently undergoing enhancements and does not yet operate at full capability.
- Required images are not automatically inserted, and certain information may not be fully consolidated.
- Manual editing is required, particularly in the **highlighted sections within the body of the document**, to ensure correctness and clarity.

Administrative Hearing Scheduling

1. Request for Administrative Hearing Details

- The **second page** of the NTE/NOD document must include the administrative hearing date and meeting link.
- To obtain this information, submit a scheduling request via the [HR/RTA Channel](#) on **Zoho Cliq**.

Request Format

Name of the Employee: (Name)

Current Shift: (e.g., 10 00 EST - 21 00 EST)

Rest Days: (e.g., Sat - Sun)

2. HR Notification

- Ensure the appropriate HR personnel are included in the request:
 - **Manila:** HR May Trianes

- **Dumaguete:** PR Glenn or PR Arleigh

3. Calendar Scheduling and System Upload

- Upon receipt of the administrative hearing schedule:
 - Create a meeting invitation in **Google Calendar**.
 - Include the following required participants:
 - Operations Manager (OM)
 - Assistant Operations Manager (AOM)
 - Site Team Lead (STL)
 - Human Resources (HR)
 - Real-Time Analysts (RTAs)
 - The concerned employee
 - The employee's Team Leader (TL)

Related Article: **[How to Plot Admin Hearing In Google Calendar](#)**

- After the meeting is scheduled, upload the calendar invitation to **Zoho** for record-keeping and compliance tracking.

C. Filing Procedure

1. Access the Zoho Sign Request Form

- Navigate to **Zoho**.
- From the **HR sidebar**, select [Zoho Sign Request Form](#).

2. Complete the Required Information

- Accurately fill in all required fields in the form.
- Ensure that the information provided matches the details in the finalized document.

3. Submit the Request

- Review all entries for accuracy and completeness.

Unauthorize Break Extension

Standard Operating Procedure (SOP) for Walmart Support |Unauthorized Break Extension

Monitoring

The **Monitoring of Unauthorized Break Extensions** ensures that all employees are accounted for and that any unauthorized extensions of non-productive auxiliary time are identified. Appropriate sanctions may be applied to correct unproductive behavior, in accordance with the guidelines outlined in the company handbook.

	1st Offense	2nd Offense	3rd Offense	4th Offense
20. Unauthorized break or extension of scheduled breaks for five (5) times or having an accumulated overbreak of sixty (60) minutes whichever comes first, incurred within one (1) month.	Written Warning	Final Written Warning	Suspension	Dismissal

To monitor, the employee behavior is compared against the established criteria to determine if any violations have occurred.

Criteria:

- Unauthorized breaks or extensions of scheduled breaks **five (5) times** within one (1) month, **or**
- Accumulated overbreaks totaling **sixty (60) minutes** within one (1) month, whichever occurs first.

Monitoring is typically conducted at the **end of each month**. However, to prevent delays in addressing infractions, checks should also be performed **weekly**. Employees who meet or exceed the criteria during these checks will be issued a **Notice to Explain (NTE)** in a timely manner.

A. Reviewing Process

To identify employees who have violated the criteria for unauthorized break extensions, the PBI Report Dashboard for Overbreak must be refreshed. This review should be conducted every Sunday.

Once the employees who meet the criteria are identified:

1. **Transfer Data** – Download the relevant data from the PBI Dashboard and transfer it to the Unauthorized Break Extension Monitoring Sheet. Copy the data into the designated tab for unauthorized break extensions.
 2. **Update Employee List** – Ensure that all employees who meet the criteria are listed in the monitoring sheet.
 3. **NTE/NOD Preparation** – Once the list is updated, begin the process of creating Notice to Explain (NTE) or Notice of Decision (NOD) documents for the identified employees.
-

B. NTE / NOD Document Preparation

Brew Tool

The **BREW Tool** is the system used for the preparation of **Notice to Explain (NTE)** and **Notice of Decision (NOD)** documents. The tool generates standardized documents by populating predefined placeholders with employee data, ensuring accuracy, consistency, and compliance with documentation standards.

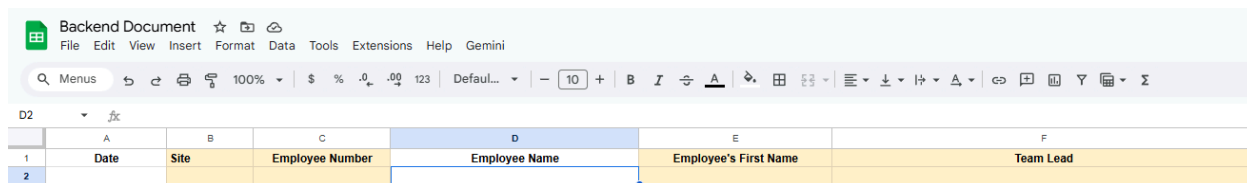

Related Article: [**Introducing BREW Tool**](#)

Process Integration

Once employees subject to disciplinary action have been identified, the BREW Tool must be used to generate the required documentation.

1. **Employee Identification**
 - Confirm the list of employees who are required to receive an NTE.

- Encode the complete and accurate employee details into the [BREW Tool backend sheet](#).

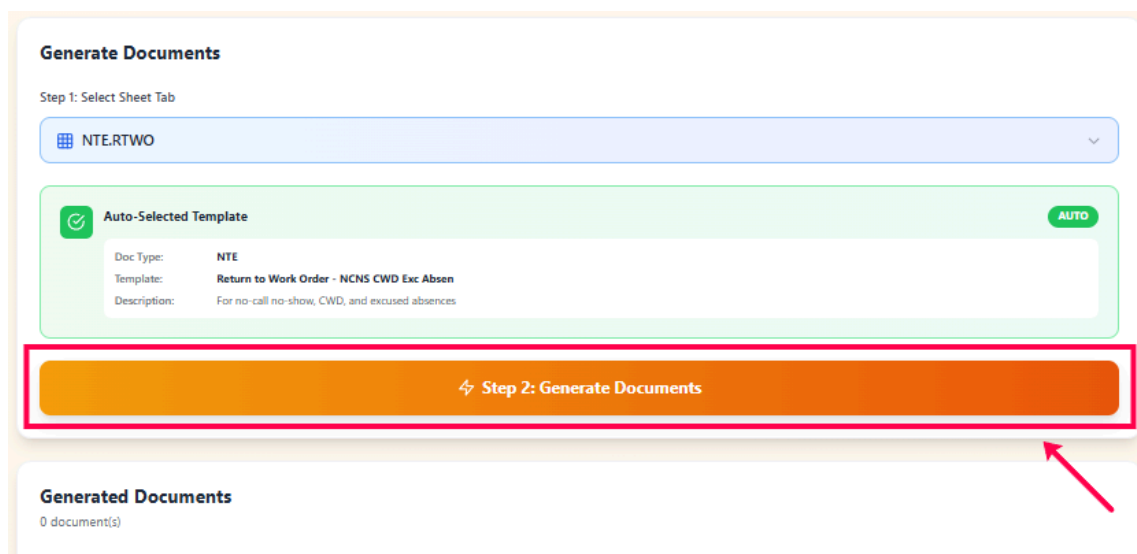

The screenshot shows a Google Sheets interface titled 'Backend Document'. The spreadsheet has columns A through F. Row 1 contains headers: A (Date), B (Site), C (Employee Number), D (Employee Name), E (Employee's First Name), and F (Team Lead). Row 2 is currently selected.

	A	B	C	D	E	F
1	Date	Site	Employee Number	Employee Name	Employee's First Name	Team Lead
2						

2. Document Generation

- After all required fields in the backend sheet have been completed, proceed to **Step 2** of the [BREW Tool](#).
- Generate the NTE or NOD document.
- Download the generated file.
- Conduct a thorough **quality check** to verify accuracy, completeness, and proper formatting.

The screenshot shows the 'Generate Documents' interface. It includes a dropdown menu for 'Step 1: Select Sheet Tab' with 'NTE.RTWO' selected. Below this is an 'Auto-Selected Template' section with a green checkmark icon and an 'AUTO' button. The template details are: Doc Type: NTE, Template: Return to Work Order - NCNS CWD Exc Absen, and Description: For no-call no-show, CWD, and excused absences. A large orange button labeled 'Step 2: Generate Documents' is highlighted with a red border and a red arrow pointing to it. At the bottom, there is a 'Generated Documents' section showing '0 document(s)'.

3. Manual Review and Adjustments

- The BREW Tool is currently undergoing enhancements and does not yet operate at full capability.
- Required images are not automatically inserted, and certain information may not be fully consolidated.
- Manual editing is required, particularly in the **highlighted sections within the body of the document**, to ensure correctness and clarity.

C. Filing Procedure

1. Access the Zoho Sign Request Form

- Navigate to **Zoho**.
- From the **HR sidebar**, select [Zoho Sign Request Form](#).

2. Complete the Required Information

- Accurately fill in all required fields in the form.
- Ensure that the information provided matches the details in the finalized document.

3. Submit the Request

- Review all entries for accuracy and completeness.

4. Notice of Decision

- All responses to **Notice to Explain (NTE)** must be carefully reviewed. Ensure that any decisions derived from the NTE responses and included in the **Notice of Decision (NOD)** are accurate, consistent, and in full compliance with company policies and established criteria. This step is critical to maintain fairness, transparency, and proper documentation of all disciplinary actions.

RTA Outside Task

IC request stamps

Standard Operating Procedure (SOP) for Walmart Support |IC Request Stamps

Procedure

Breaks/Timelogs - To ensure accurate recording, correction, and approval of employee **breaks and time logs** through a controlled **IC request stamp** process, maintaining compliance and audit readiness.

Scope: Applies to all employees ICs involved in timekeeping, including:

- Missed punches
- Incorrect break entries
- Manual time log adjustments

Step 1: Submit the Request

Agents must submit their request for an **IC timestamp** in the [IC SCREENSHOT REQUESTS](#) thread in **Cliq**. The request must follow the template below:

IC REQUEST TEMPLATE

Requesting IC Stamp:

Date:

Shift:

Reason:

Step 2: Access IC Data Download

Open **IC**, then navigate to **Data Download** if requesting a screenshot of break logs.

Step 3: Generate the Agent State Log

1. Search for **Agent State Log (350083)**.
2. Set the **Date Range** based on the date for which the agent is requesting the screenshot.
3. Set the **Start Time** to **12:00 AM** and the **End Time** to **11:59 PM**.
4. Select **“Comma Separated”** as the **Export Format**.

5. Ensure “**Include Field Names**” is checked.
6. Click **Download**.

Step 4: Export the File Outside VDI

To ensure file accessibility, the exported file must be downloaded **outside the VDI**. You may send the file to **TAZ Bot(Cliq)**, then download it outside the VDI, as the file is in Excel format.

The screenshot displays the CXone Mpower Reporting/Data Download interface. On the left, a sidebar lists navigation options: BI REPORTS, ACD CUSTOM REPORTS, and ACD DATA DOWNLOAD. The main content area is titled 'Reporting/Data Download' and features a 'Choose Report:' section with a search bar. Below the search bar, a table shows search results for ID 350083, with the report name 'Agent State Log'. To the right of the search results, there are configuration options: 'Select Report Option:' (set to Full Report List), 'Date Range:' (01/09/2026 - 01/09/2026), 'Start/End Time:' (12:00 AM - 11:59 PM), 'Export Format:' (Comma Separated), and checkboxes for 'Include Field Names' (checked) and 'Append date to file name (YYYYMMDD)' (unchecked). At the bottom right, there are buttons for 'Download', 'Generate cURL', and 'What is cURL?'. A watermark 'Activate Windows Go to Settings to activate' is visible in the bottom right corner.

Step 5: Clean and Format the File

Once the file is downloaded, open it and **remove or delete any unnecessary columns**. Ensure that the following columns are **retained**:

- **Agent Name**
- **Start Date**
- **Outstate**
- **End Date**

Note: Confirm that the **date and time format** is set to **m/d/yyyy h:mm:ss**.

Agent_Na	Start_Date	Outstate	End_Date
Hrithik Ro	1/9/2026 9:04:43		1/9/2026 9:04:47
Sanjeet Ki	1/9/2026 10:01:28		1/9/2026 10:01:28
Harish Ary	1/9/2026 10:01:28		1/9/2026 10:01:28
Rahul Pal	1/9/2026 10:06:36		1/9/2026 10:06:45
Melanie E	1/10/2026 10:06:36		1/9/2026 0:00:18
Gopalakri	1/11/2026 10:06:36	InboundP	1/9/2026 11:05:18
Gopalakri	1/12/2026 10:06:36	Refused	1/9/2026 11:05:25
Gopalakri	1/13/2026 10:06:36		1/9/2026 11:05:25
Gerald Tai	1/14/2026 10:06:36		1/9/2026 1:01:27
Jerri Picke	1/15/2026 10:06:36		1/9/2026 0:08:37
Austin Sar	1/16/2026 10:06:36	CIRT	1/9/2026 0:03:37
Austin Sar	1/17/2026 10:06:36	Brand Circ	1/9/2026 0:17:23
Austin Sar	1/18/2026 10:06:36		1/9/2026 0:17:23

Step 6: Filter the Data

Filter the data based on the **agent's timestamp request** to locate the relevant entries.

Login/Logout

Step 1: Submit the Request

Agents must submit their request for an IC timestamp in the **IC Screenshot Requests** thread in Cliq. The request must follow the template below:

Requesting IC Stamp:

Date:

Shift:

Reason:

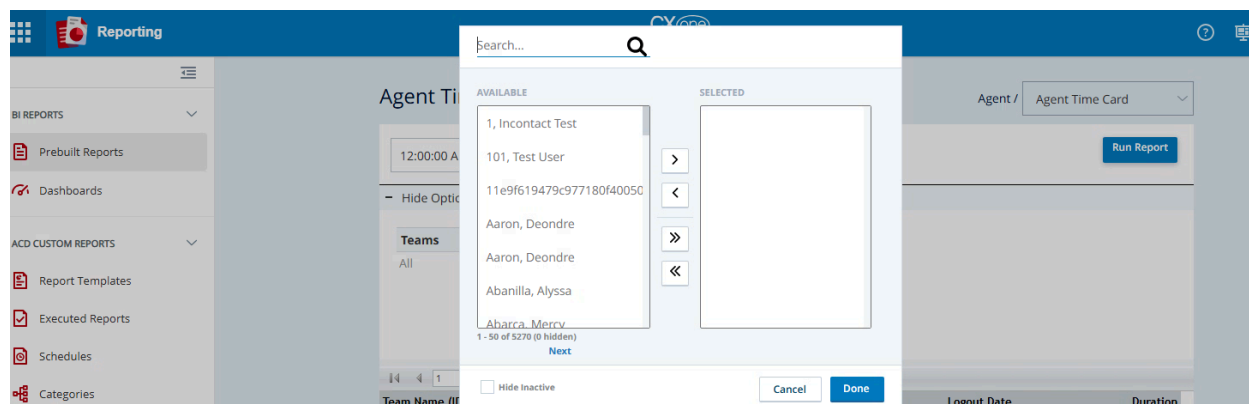

Step 2: Access IC Prebuilt Reports

- Open IC and navigate to Prebuilt Reports.
- Select Agent Time Card.

Step 3: Configure Report Parameters

- Set the Date Range based on the date for which the agent is requesting the screenshot.
- Set the Start Time to 12:00 AM and the End Time to 11:59 PM.

- Under Agents, click the + button to add the specific agent's name.
- After adding the agent, click Done, then Run Report.

Agent Time Card

Agent / Agent Time Card

12:00:00 AM 01/10/2026 - 01/10/2026 11:59:59 PM **Run Report**

Hide Options

Vacation Leave Slot Update

Standard Operating Procedure (SOP) for Walmart Support |VL Slot Update

Purpose

To determine the **number of available Vacation Leave (VL) slots per day** for the upcoming month, ensuring proper workforce coverage, timely filing by agents, and accurate application in Zoho.

Frequency

- Performed **two (2) weeks before next month.**
 - Completed **at least 1 week before the start of the next month**
-

Procedure

Step 1. Access Attendance Tracker

- Open the **current month's attendance tracker**
- Use it as a reference to generate or validate the **next month's attendance tracker**

Step 2. Validate Agent Schedules

- Review and track each agent's:
 - Scheduled workdays
 - Rest days
- Ensure all **Rest Days (RD)** schedules from the **Transition Sheet** are correctly reflected for the upcoming month.

Step 3. Calculate Available VL Slots

- Locate the **VL computation formula** below the attendance tracker
- The standard calculation is:
 - **5% of the total number of agents scheduled per day**
- The resulting value represents the **total VL slots available per day**

***Note:** While the baseline is 5%, **Operations leadership (STLs and higher)** may override the computed number of slots when necessary.*

Step 4. Consolidate VL Slot Data

- Extract daily VL slot availability for the entire upcoming month
- Copy the data into a **separate Excel file**
- Validate:
 - Date accuracy
 - Correct slot totals per day

Step 5. Submit for Zoho Application

- Send the finalized Excel file to **Imee Comprá**
 - This enables the **application of VL slot availability in Zoho**
-

Timeliness and Filing Considerations

- **Timely submission is critical** to prevent late VL filings by agents
 - VL requests must be filed:
 - **At least 7 days before** the intended leave date
 - **No more than 30 days in advance**
 - Delays in slot uploads may restrict agent filing eligibility and cause compliance issues
-

Key Notes and Reminders

- VL slots are primarily based on **5% daily workforce availability**
- Overrides may be applied by **Operations (STLs and above)**
- Accuracy and timeliness directly impact agent leave filing compliance
- Always double-check data prior to submission

SNW Issue Tracker

Standard Operating Procedure (SOP) for Walmart Support

|Reporting Issue on ServiceNow

Purpose / Scope

- Accurate reporting of system or workflow issues
 - Timely transfer of affected items to the appropriate RTA personnel
 - Clear accountability and traceability of reported issues
-

Roles & Responsibilities

Role	Responsibility
RTA (Reporting RTA)	Identify affected items, complete the reporting form, transfer items, and coordinate confirmation
Onshift RTA	Receive transferred items and validate successful handoff
RTA Lead / Supervisor	Escalation point for unresolved or repeated issues

3. Tools / Requirements

- **SNW (System Navigation Workspace)** – for item review and transfer
 - **Google Forms** – official reporting channel
 - **Internal Chat Tool** (e.g., Cliq, Slack, Teams, or equivalent) – for coordination and confirmation
 - **Valid System Access** – RTA-level permissions
-

4. Procedure (Steps)

Step 1: Identify Items to Be Reported

Continuously monitor assigned queues, dashboards, or task lists. Identify items that meet any of the following criteria:

- **Non-disappearing items**
Items that remain in the queue (Bucket) despite expected completion or resolution.
- **Erroring items**
Items showing system errors, failed processing, or abnormal behavior preventing action.
- **Already completed but non-actionable items**
Items marked as done or completed but still appearing and cannot be acted upon.

Ensure the item truly meets one of the above criteria before proceeding to reporting.

Step 2: Validate the Item Status

Before reporting:

- Recheck item details and timestamps
- Confirm the issue persists after refresh or basic troubleshooting
- Verify that the item is not pending action from another team or system delay

If the issue remains unresolved, proceed to reporting.

Step 3: Report the Item via Google Form

1. Access the official reporting form using the link below:
https://docs.google.com/forms/d/1obH5RtGQemSbomqD_n2pMJJeVFen1d7b_Ep_xcjrDe3M/viewform
2. Complete all required fields accurately, importantly;
 - Name of the agent reporting
 - Item identifier (ItemId)
 - Screenshot
 - Brief description of the issue
3. Review entries for accuracy.
4. Submit the form.

Step 4: Transfer the Item in SNW

1. Open the affected item in **SNW**.
2. Initiate a transfer action.
3. Transfer the item to **any On-shift RTA**.

- If no on-shift RTA is available, transfer to:
RTA Maykel VN Username: John Vergara – Vendor (vn5774u)
- 4. Ensure the transfer is completed successfully in the system.
- 5. In case the item is able to be transferred, please contact RTA immediately.

Step 5: Confirm Successful Transfer

1. Contact the receiving RTA via Cliq.
2. Confirm that:
 - The item is visible on their end
 - Ownership has been successfully transferred
3. Retain confirmation for reference if follow-up is required.

Notes / Tips

- Always submit the Google Form **before or immediately after** transferring the item.
 - Use clear and concise descriptions to avoid back-and-forth clarifications.
 - Do not transfer items without proper reporting unless instructed by an RTA Lead.
-

Exceptions & Escalation

Issue	Action	Escalate To
Problem with the items on SNW	Try to take action via Allowing or Blocking the Item, Issue persist	Team Lead First
Google Form is inaccessible	Take screenshots and document details	RTA
Item cannot be transferred in SNW	Attempt retry and document error	RTA / Team Lead
Receiving RTA cannot see the item	Reconfirm transfer details	RTA
Repeated occurrence of same issue	Log and flag as recurring	RTA
