

Walmart Support SOP

Walmart Support SOP: Table of contents

Subtab 1: Leaves SOP

Guidelines and filing procedures for planned time off, medical leaves, and emergency absences to ensure proper coverage.

Subtab 2: Overtime SOP

The end-to-end process for requesting, authorizing, and documenting additional work hours beyond the standard shift.

Subtab 3: Schedule Change SOP

Procedures for shift swaps, permanent schedule adjustments, and aligning Zoho schedules with the Master Transition Sheet.

Subtab 4: Attendance Notification SOP

Communication protocols for reporting late logins, early departures, or unscheduled absences to RTA and Management.

Subtab 5: Workforce Ticketing SOP

Instructions for submitting formal tickets to the WFM team regarding profile updates, headcount changes, or data corrections.

Subtab 6: Disputes SOP

The formal method for agents to contest errors in attendance logs, payroll hours, or performance metrics.

Subtab 7: Issue Logs SOP

Standardized steps for documenting daily operational challenges, workflow blockers, and real-time agent concerns.

Subtab 8: Suspension SOP

The administrative workflow for managing temporary suspension of duties or system access due to disciplinary or security reasons.

Subtab 9: REST SOP

Compliance guidelines regarding mandatory break intervals, rest periods, and maintaining login adherence during downtime.

Subtab 10: Client Tool SOP

A technical overview and troubleshooting guide for specific client-side platforms such as ServiceNow and the LATTE tool.

Subtab 11: System Issue Reporting

Critical escalation paths for reporting technical outages, hardware malfunctions, or software bugs that prevent production.

Leaves SOP

Standard Operating Procedure (SOP) for Walmart Support | Employee Leave Management

Objective: To define the responsibilities of Support Staff in managing leave requests for their direct reports and themselves, ensuring operational stability and policy compliance.

Click the “Leave Request” tab on the upper right tab to access the general view of the leave request dashboard.

Employee Leave Credits

Sick leaves must still be filed after the fact. Failure to complete a leave request after the fact through this form will be subject to a salary deduction for the applicable payout. As indicated in our handbook, employees' vacation leave should be filed at least seven (7) business days before the actual date of leave. It may still be filed after the fact but can be done by the upper management only. Your manager should have prior approval.

1. Vacation Leave (VL) Process:

Support focuses on workload balancing and advanced scheduling.

- **Lead Time:** Must be filed at least **7 days** in advance with a maximum range of 30 days before the target date. To remain equal on slot application, leave requests beyond 30 days of creation date shall be disapproved by the RTA's.
- **Support Action:**

1. **Quota Check:** Open the [Walmart VL Dashboard](#) on Zoho and fill in the dates that are planned for Vacation Leave. If the date is at capacity, Support must suggest alternative dates to the agent before filing.

The screenshot displays the 'Walmart VL Dashboard' interface. On the left is a sidebar with navigation options: Leave Request, My Records, Attendance Summary, View, Carry Over Leaves, Walmart Dashboard (selected), Walmart VL Dashboard, All Walmart VL Slots, and Employee Leave Credits. The main content area shows a date range from 01/29/2026 to 01/30/2026, with 49 Total Slots and 12 Remaining Slots. A 'File Leave' button is present. Below this, there are two tables: a list of employees with their VL counts and dates, and a summary table for the requested period.

Employee Name	VL Count	Date
Diego de la Cruz Nival	2	Jan 29, 2026, Jan 30, 2026
Jerson Gregana Ganaganag	2	Jan 29, 2026, Jan 30, 2026
Michelle Manalo Ledesma	2	Jan 29, 2026, Jan 30, 2026
Rodel Titong Portes	2	Jan 29, 2026, Jan 30, 2026
Naira Decipolo Alim	2	Jan 29, 2026, Jan 30, 2026
Loyd Daloyo Dela Peña	2	Jan 29, 2026, Jan 30, 2026
Eugene Jamo-ay Togonon	2	Jan 29, 2026, Jan 30, 2026
Gio Clem Lera Escala	2	Jan 29, 2026, Jan 30, 2026
Kathleen Claire Sumanoy Baga	2	Jan 29, 2026, Jan 30, 2026
Lucy Victoria Penales Futralan	2	Jan 29, 2026, Jan 30, 2026

Date	Total Slot	Manila	Dumaguete	Total Approved Slots	Remaining Slots
Jan 29, 2026	25	7.00	10.00	17.00	8.00
Jan 30, 2026	24	8.00	11.00	19.00	5.00

Leave Summary

Employee	Type of Request	Leave Date	Hours	Status	Added Time
Jan 29, 2026					
Arthur Jr Pajunar Sandigan	VL in Hours	Jan 29, 2026	8.00	Approved	Jan 27, 2026 09:51:57
Lucy Victoria Penales Futralan	VL in Hours	Jan 29, 2026	8.00	Approved	Jan 26, 2026 11:41:30

2. **Performance Review:** Support checks if the agent has any pending deliverables or "Critical Support" shifts during the requested period.
3. **Submission:** Support informs the agent that he/she may now apply for vacation leave.
4. **RTA Sync:** Once Support "Endorses," RTA will now review leave applications.
Note: After pre-qualifying for leaves with support, approval still remains on the decision with the RTA if slots are available on the date of request.

2. Sick Leave (SL) Process:

Support focuses on immediate communication and documentation.

- **Notification:** Agent must notify Support and/or via [attendance notification form](#) on Zoho at least **2 hours before** shift start or **2 hours after the scheduled start shift**. This is to

avoid being marked as NCNS which would prevent additional points on APS.

Attendance Notification Form

Employee *	-Select-	Employee ID

Type of Illness	-Select-		
If your illness isn't listed, select "type of sickness" field will appear for you to provide details.			
Reason *			

☐ WFH

Please check the WFH (Work From Home) box if you are a Work from Home employee. This will bypass the homepage notification for illnesses categorized as **Special, Moderate, or Severe**, since clinic visits for these cases are only mandatory for On-site employees.

Note: For WFH employees, once you return to work, make sure to submit your Medical Certificate for your APS Points under the My APS Report.

Kindly send your Fit-to-Work Certificate to the appropriate clinic email based on your site:

- Dumaguete: healthdumaguete@ececontactcenters.com
- Manila: healthmanila@ececontactcenters.com

- **Support Action:**

1. **Acknowledge:** Confirm receipt and tell the agent to "Rest well" (Empathy first).
2. **The "2-Day Rule":** If the SL exceeds 2 or more days, Support must remind the agent that a Medical Certificate is required upon return.
3. **System Entry:** After recovery of the agent, Support may advise the agent to file Sick Leave via leave requests form. Medical documents shall be required for SL application.

3. Bereavement Leave Process:

Support focuses on sensitivity and long-term coverage.

- **Eligibility:** Standard is 3–5 days (depending on company policy) for immediate family.
- **Support Action:**
 1. **Immediate Leave:** If the agent is currently on shift, Support should advise the agent to communicate with RTA and/or higher operations for an immediate "Emergency leave" via Email.
 2. **Document Grace Period:** Inform the agent that the Death Certificate should be submitted on Zoho for approval of bereavement leave by HR. Agent may also apply for BL on Zoho via the [Leave request](#) page.

Remarks

⚠ You can now upload a supporting document for your leave by clicking **Upload Supporting Document** button below.

3. **Team Handoff:** Support reassigns the agent's tasks to other team members if there are any, to ensure no "pings" reach the agent during their mourning.

4. Solo Parent Leave Process:

Support focuses on legal entitlement and validity.

- **Eligibility:** Usually 7 days per year, provided the agent has served for at least 6 months
- **Support Action:**
 1. **ID Validation:** Before filing, Support must verify the **Solo Parent ID** is not expired.
 2. **System Tagging:** Ensure the leave is tagged specifically as "Solo Parent Leave" and not "VL," as these are separate credits.
 3. **Planning:** Since these can be used for school events or child medical needs, Support should encourage agents to provide at least **48 hours notice** when possible, though RTA must prioritize these requests as a legal right.

If qualifications are valid, assist the agent in filing the leave via Zoho on the leave request page. Select SPL on the dropdown as follows and file the remaining information needed on the leave

request. RTA may now review and be subject for approval.

Name * Julie Ann Irene Gaviola Gumahad x

From * 01/31/2026

▲ You can now upload a supporting document for your leave by clicking Upload Supporting Document

Submit Upload Supporting Document Reset

5. Maternity Leave Process:

Support focuses on long-term resource planning and the "Return-to-Work" plan.

- **Duration:** Usually 60–105 days (depending on local law).
- **Support Action:**
 1. **Advance Notice:** Support should be notified at least **30–60 days** before the expected delivery date (EDD) to allow RTA to move resources.
 2. **HR Liaison:** Support ensures the agent has submitted the "Notification of Pregnancy" to HR via email for government/insurance benefit processing.
 3. **The "Hard Stop":** Coordinate with RTA for the agent's last day. Ensure login credentials are set to "Inactive" or "Maternity Leave" status during the leave.
 4. **Filing:** Agent must file the maternity leave notification form to proceed with the maternity leave. The form can be found under HR>Maternity Leave Notification

on zoho.

6. Paternity Leave Process:

Support focuses on flexibility, as the exact start date is often unpredictable.

- **Duration:** Usually 7–14 days.
- **Support Action:**
 1. **The "Window" Period:** Support notes the spouse's due date. Unlike VL, RTA must allow for a "floating start date." This would mean that there would be an estimation of the start date of leave.
 2. **Activation:** Once the child is born, the agent notifies Support and proceeds to file Paternity leave via Leave request form on Zoho.

Documentation: Support ensures the agent provides a copy of the **Birth Certificate** upon return to validate the paid leave.

Process Breakdown by Category

Leave Type	Support Action	RTA Visibility
VL	Check RTA View for slots.	High (Planning required)
SL	Notify RTA via "Urgent" chat immediately.	Immediate (Intraday)

7. Leave Retraction Process:

Support focuses on restoring headcount and updating the RTA Real-Time View.

A retraction occurs when a leave that was **already approved** needs to be cancelled. This is different from a "denial" because the schedule has already been adjusted.

Agent-Initiated Retraction

1. **Notification:** Agent must notify TL and RTA at least **24 hours before** the leave start date. *Same day retraction is not allowed and is subject to disapproval.*
2. **Support Action:**
 - **Verify Intent:** Confirm if the agent wants to retract the *entire* leave or just specific days.
 - **System Reversal:** Agent must go into the Leave Request System > My Records > For Approval and select **"Retract"** .
3. **RTA Action:** RTA approves retraction in a condition where the application of retraction is before the date of the requested date of leave.

Overtime SOP

Standard Operating Procedure (SOP) for Walmart Support | Client-Mandated Overtime (OT) Recruitment and Cascade

1. Purpose/ Scope

This procedure outlines the process for managing Overtime (OT) requests triggered by a **Client Mandate**. It is designed to address **spikes in volume** by ensuring a seamless flow of information from the Client to the Real-Time Analysts (RTA), through the Team Leads (TL), and finally to the Agents (OT Takers). This applies to all Lines of Business (LOB) under the Operations.

2. Roles & Responsibilities

Role:	Responsibility:
Client	Initiates the mandate based on volume spikes and SLA requirements.
RTA (Real-Time Analyst)	Monitors volume, validates the need for OT.
Team Lead (TL)	Cascades the OT requirement to their specific LOB and recruits "OT Takers."
Support Agent	Volunteers as an "OT Taker" and executes the additional hours.

3. Tools / Requirements

- **Workforce Management (WFM) Tool:** Incontact tool, ECE IRR Realtime Dashboard.
- **Internal Communication Tool:** Cliq, Email, MS Teams.

4. Procedure (Steps)

Step 1: Receipt of Client Mandate

- The Client or LOB Manager identifies a **spike in volume** that cannot be handled by the current headcount.
- They issue a mandate for OT.
- **Action:** RTA and higher Operations receives the notification and assesses the required headcount to stabilize the queue.

Step 2: Cascade to Team Leads (TLs)

- Higher operations send a priority notification to all TLs within the affected LOB.
- **Action:** The message must include the reason (Volume Spike) and the number of agents needed.

Step 3: Internal Team Cascade and Recruitment

- TLs immediately post the OT requirement in their respective team channels.
- **Action:** TLs solicit "OT Takers."

Step 4: Roster Collection and Validation

- TLs gather the names of the "OT Takers" and submit the list back to the RTA.
- **Action:** RTA and/or Operations updates the roster and informs the Client that the additional headcount is being deployed.

Step 5: Execution and Monitoring

- Agents begin their OT. RTA monitors Adherence to ensure OT takers are actually in production using the InContact Tool.
- **Action:** If the volume spike subsides, RTA notifies TLs to cease OT recruitment.

Notes / Tips:

- Always prioritize agents with high proficiency in the specific queue experiencing the spike.
- Ensure agents take their mandatory rest breaks if the OT extends their shift significantly.

5. Exceptions & Escalation

Volume Spike persists: OT is insufficient to clear the queue. Inform RTA to request "Cross-LOB" support.

Queue Monitoring: Monitor Agents that are still on shift and the OT takers to ensure 100% productivity within the day.

6. Records / Outputs

- **OT Tracker:** A log of all agents who worked the mandate.
- **Post-Shift Report:** A brief summary showing how the OT impacted the volume spike.
- **Payroll Export:** Adjusted timesheets reflecting the approved OT hours.

7. References

- Employee Handbook (Overtime Pay Policies).
- Client Service Level Agreement (SLA) Documentation.

Schedule Change SOP

Standard Operating Procedure (SOP) for Walmart Support | Operations Schedule Synchronization & Agent Assistance (Schedule Changes)

1. Purpose/ Scope

This procedure ensures that all schedule updates made in the **Transition Scheduling Sheet** are correctly updated in **Zoho**. Because the scheduling sheet does not automatically sync with Zoho, Team Leads must monitor for changes and prompt agents to manually request the shift update in Zoho to ensure time-tracking and payroll accuracy.

2. Roles & Responsibilities

Workforce/RTA: Updates the Master Transition Scheduling Sheet with new event-based shifts, meetings, or coverage requirements.

Team Lead (TL): Regularly monitors the Transition Scheduling Sheet for any updates and informs the affected agents to initiate the change in Zoho.

Agent: Responsible for submitting the "Shift Change Request" in Zoho once notified by their TL to ensure their check-in/out aligns with the new schedule.

3. Tools / Requirements

- **Transition Scheduling Sheet:** The source of truth for Schedules and shift view.
- **Zoho:** The official tool for time-tracking and attendance.
- **Communication Tool:** (Email/Cliq) For supervisory notifications.

4. Procedure (Steps)

Step 1: Monitor the Transition Scheduling Sheet

- Daily/Weekly, TLs must review the "Monthly Events/Meetings" tab in the Transition Scheduling Sheet.

- **Action:** Identify any agents under your supervision whose shift has been moved to cover for event attendees.

Step 2: Validate Against Zoho

- Open **Zoho** and check the agent's current assigned shift.
- **Action:** Confirm if the change from the Transition Sheet is reflected. If not (which is typical), take note of the variance to prevent "Late" or "Absent" tags in the system.

Step 3: Direct Agent Notification (The Cascade)

- Contact the affected agent immediately via cliq or any communication platform.
- **Action:** Inform them of the specific change (e.g., "Shift moved from 8 AM to 10 AM to cover").
- **Note:** This must be done as soon as the change is spotted to ensure the agent is aware before their next login.

Step 4: Manual Zoho Assistance

- **Pre-Shift Action:** Assist the agent in updating their schedule following "[Zoho> Daily Schedule> My Daily Schedule](#)" Click "**Request Sched change**" on the mismatched date to match the **Transition Sheet** *before* the start of their shift.

This pop up should show and TL must assist the agent to avoid further complications on review.

The screenshot displays the ECETrack system's 'My Daily Schedule' page. A 'Schedule Change Request' modal is open, showing details for Jomar Uffe Pompon Garces at Walmart. The modal includes a table of current shifts and a form to request a change. The 'Request Sched Change' button is highlighted in the table. The modal form includes fields for Employee, Account, Date, Working Hours per Day, Schedule Start, and Schedule End. It also has a 'Reason Note' field, a 'Rest Day' selection (Monday, Tuesday, Wednesday, Thursday, Friday, Saturday), and a 'Part-Time' checkbox. The 'Submit' button is highlighted.

Request Sched Change	Account	Date	Week Day	WHPD	Schedule Start	Schedule End	Request Swap	Zoho Email
Request Sched Change	Walmart	25 Jan 2026	Sunday	10:00	07:00	18:00	Request Swap	jomar.garcia@econtactcenters.com
Request Sched Change	Walmart	26 Jan 2026	Monday	0:00	0:00	0:00	Request Swap	jomar.garcia@econtactcenters.com
Request Sched Change	Walmart	27 Jan 2026	Tuesday	0:00	0:00	0:00	Request Swap	jomar.garcia@econtactcenters.com

- **Agent Action:** Instruct the agent to log their time based specifically on the **Transition Sheet** schedule.
- **RTA review:** RTA may review the schedule request and is subject for approval.
TL's are not authorized to approve schedule changes from their cluster.

Step 5: Confirmation and Log

- **Action:** Ensure the agent reacts or responds to the notification to confirm they have seen the new schedule.

5. Exceptions & Escalation

Issue: Zoho Schedule does not match transition schedule which causes confusion on the agent side. Due to this, agent may adhere to the official schedule without updating the zoho schedule causing undertime, login errors, RDOT pop ups on regular shift, and late logins.

Escalate: TL and RTA

6. Quality Check / Expected Result

Minimize Discrepancies: Minimal discrepancies during payroll, and lessen possible disputes.

Attendance notification SOP

Standard Operating Procedure (SOP) for Walmart Support | Operations Schedule Synchronization & Agent Assistance (Schedule Changes)

1. Purpose/ Scope

The purpose of this SOP is to establish a standardized process for documenting agent absences. Ensuring every absence is logged in Zoho allows for real-time visibility for the **Real-Time Analysts (RTA)** and accurate record-keeping for Operations. This procedure applies to all Team Leaders (TLs), Senior Team Leaders (STLs), and Operations Managers (OMs) when assisting agents with attendance reporting.

2. Roles & Responsibilities

- **Agent:** Responsible for notifying their TL immediately and filing the attendance notification in Zoho. If unable to file, they must provide all necessary details and documentation to their supervisor.
- **Team Leader (TL):** Responsible for guiding the agent through the process or filing on the agent's behalf if they face technical or personal issues. Ensures all data is accurate and visible to Ops.
- **STL / OM:** Responsible for overseeing compliance and stepping in if the TL is unavailable to ensure no gaps in attendance reporting.
- **RTA Team:** Responsible for monitoring Zoho entries to adjust staffing levels and manage real-time service levels.

3. Tools / Requirements

- [Zoho](#)
- Internal Communication Tool: Zoho Cliq, Batphone via Messenger, Email.
- Supporting Documentation (e.g., Medical Certificates, if applicable)

4. Procedure (Steps)

Step 1: Receipt of Absence Notification The process begins when an agent contacts the TL via any communication channel to report an absence.

- **Action:** Acknowledge the message and confirm the reason for the absence.

Step 2: Verification of Agent Access The TL must instruct the agent to log into **Zoho** to plot their attendance notification.

- **Action:** Ask the agent: *"Are you able to access Zoho right now to file your notification?"*
- **If Yes:** Provide the agent with the internal link and monitor for the entry.
- **If No:** Proceed to Step 3.

Step 3: Support Intervention (Filing on Behalf) If the agent cannot file due to technical issues, lack of internet, or medical emergency, the TL must take over.

- **Action:** Collect necessary details from the agent (Reason, Duration, Documentation/Screenshots).
- **Action:** Navigate to the [Zoho>Attendance Notification>Attendance Notification Form](#) and find the name of the agent on the list, and fill out the form for attendance notification. This serves as a visual for the absence of any employee.

Attendance Notification Form

Employee *	-Select-	Employee ID	
Date	30 Jan 2026	Account	
Channel of Notification	Cliq	Site	
Type of Notification *	Absent	Schedule Start	
Absence Category	Sick	Schedule End	
Type of Illness	-Select-		

If your illness isn't listed, search and select **Other** and a new field will appear for you to provide details.

Reason *

☐ WFH

Please check the **WFH (Work From Home)** box if you are a **Work from Home** employee. This will bypass the homepage notification for illnesses categorized as **Special, Moderate, or Severe**, since clinic visits for these cases are only mandatory for **On-site employees**.

Note: For **WFH** employees, once you return to work, make sure to submit your **Medical Certificate** for your APS Points under the **My APS Report**.

Kindly send your **Fit-to-Work Certificate** to the appropriate clinic email based on your site:

- **Dumaguete:** healthdumaguete@econtactcenters.com
- **Manila:** healthmanila@econtactcenters.com

Step 4: Confirmation and Visibility Once submitted, the notification is now visual for the Operations and Workforce Team.

Notes / Tips: > * **Documentation:** Always encourage agents to provide a Medical Certificate (MC) or screenshots of technical errors to strengthen the filing.

- **Timeliness:** Aim to have the Zoho notification completed within **2 hours before or after the expected shift** of the agent's initial notification to avoid being tagged as NCNS.

5. Exception and Escalation

Issue	Action	Escalate To
Zoho System is down for everyone.	Log the absence in a manual tracker (Excel/Google Sheets).	RTA
Agent is unreachable/AWOL.	Attempt contact; if no response by after 2 hours of schedule shift, file as NCNS.	RTA

6. Quality Check / Expected Result

- **Expected Result:** Every absent agent has a corresponding entry in Zoho for their absence.
- **Quality:** lessen NCNS tagging for agents.

7. Records / Outputs

- **Zoho Attendance Logs:** The primary source of truth for RTA and Payroll.
- **Support Documentation:** Digital copies of MCs or error screenshots attached to the Zoho entry.

Workforce Ticketing SOP

Standard Operating Procedure (SOP) for Walmart Support | Workforce Ticketing & Offline Activity Requests

1. Purpose/ Scope

This procedure outlines the process for Support Staff (TL/STL/OM) to request schedule adjustments and data reports from the Workforce/RTA team. This ensures all offline activities and capacity changes are documented, approved, and tracked to maintain service level targets.

2. Roles & Responsibilities

- **Team Leader (TL) / Support:** Responsible for submitting tickets at least **one hour** in advance and informing agents once approvals are received.
- **RTA Team:** Responsible for reviewing tickets, checking service level impact, and providing an "Approved" or "Denied" response.
- **Agent:** Responsible for plotting the approved activity in their schedule only after being notified by their TL.

3. Tools / Requirements

- [Zoho / WFM Ticketing System](#)
 - Workforce Rest
 - Other reporting tools, etc.
-

4. Procedure (Steps)

Step 1: Determine Requirement & Timeline Identify the need for an offline activity (Coaching, Huddle, Training) or a data request (FTE Capacity/Reports).

- **Action:** Ensure the request is being made at least **60 minutes (1 hour)** before the intended start time.

Step 2: Create a Workforce Ticket Access the Zoho Ticketing module to file the formal request.

- **Action:** Fill in the mandatory fields:

RTA/WFM Ticketing System

Requester's Details

Employee: Jomari Urfe Porpon Garces x Site: Dumaguete x

ECE ID: ECE007941

Request

Date of Request: 31-Jan-2026 Categories: -Select-

Account: -Select- Topic: (e.g., Offline Activity, Data Request, Break Adjustment)

Due Date: dd-MM-yyyy Description: Reason: Specify the activity (e.g., "Weekly Coaching," "Team Huddle," "System Issue").
Affected Staff: List the Name(s) of the Agent(s).
Timeframe: Start and End time of the activity.
eg. 00:00 - 01:00

Upload Documents:

Document 1: Select File

Document 2: Select File

Document 3: Select File

Document 4: Select File

Submit **Reset**

- **Topic:** (e.g., Offline Activity, Data Request, Break Adjustment).
- **Reason:** Specify the activity (e.g., "Weekly Coaching," "Team Huddle," "System Issue").
- **Affected Staff:** List the Name(s) of the Agent(s).
- **Timeframe:** Start and End time of the activity. *Using Military time is recommended in time format*
- **Duration:** *Total Minutes of the activity (for Offline Activity)*
- *Additional Documents to support requests but not mandatory.*

Step 3: Await RTA Review The RTA assigned to the ticket will analyze the current floor volume and FTE capacity.

- **Action:** Wait for a notification or comment on the ticket. **Do not** pull the agent offline until the ticket status is marked as **"Approved."**

Step 4: Agent Notification & Plotting Once the ticket is approved, the TL must close the loop with the agent.

- **Action:** Inform the agent that the request is granted and prepare for the planned offline activity.

Step 5: Ticket Closure

- **Action:** Ensure the ticket is closed or updated according to the final outcome for historical data tracking.

Notes / Tips

- **Advance Notice:** Tickets filed less than an hour before the activity are subject to immediate denial if the volume is high.
- **Specifics Matter:** Avoid vague reasons like "Meeting"; use "Q3 Performance Review" or "Process Update Huddle."

5. Exceptions & Escalation

Issue	Action	Escalate To
Ticket not responded to within 30 mins	Send a follow-up ping in the RTA Channel.	Available RTA
Ticket Denied but activity is critical	Provide business justification for the exception.	RTA Lead

6. Quality Check / Expected Result

- **Expected Result:** All offline activities are visible in the RTA dashboard with 0% "Unaccounted" time for agents.
- **Compliance:** Tickets are consistently filed 1 hour in advance.

7. Records / Outputs

- **Zoho Support Tickets:** Historical log of all offline requests.
- **Adherence Reports:** Generated by RTA to show scheduled vs. actual activity.

Disputes SOP

Standard Operating Procedure (SOP) for Walmart Support

| Attendance and Log Dispute Management

1. Purpose/ Scope

This SOP defines the process for handling agent disputes regarding attendance and shift logs. The goal is to ensure that all disputes filed in Zoho are verified through a hierarchy of evidence. This procedure clarifies when an agent can file independently and when a TL's "vouch" or mandatory approval is required to validate a claim.

2. Roles & Responsibilities

- **Agent:** Responsible for identifying discrepancies and filing the dispute in Zoho with the highest priority evidence available.
- **Team Leader (TL):** Responsible for reviewing and "vouching" for disputes only when the agent lacks primary visual evidence (Screenshots/Docs).
- **RTA Lead:** Acts as an escalation point for complex disputes or cases where evidence and TL vouching are both missing.
- **RTA / HR Team:** Responsible for the final processing of the Zoho dispute based on the evidence hierarchy provided.

3. Tools / Requirements

- [Zoho \(Dispute logs\)](#)
- **Evidence Hierarchy:**
 1. **IC Timestamp** (Primary Priority)
 2. **Work Stamp** (Activity logs/System docs)
 3. **Attendance Thread** (SOS/EOS posts)
 4. **TL Vouch** (Required only if options 1-3 are unavailable)

4. Procedure (Steps)

Step 1: Discrepancy Identification The agent identifies an error in their logs and prepares the necessary evidence for filing.

Step 2: Determining Evidence Priority (The "Vouch" Rule) Before filing in Zoho, the agent/TL must check for evidence in the following order of priority:

- **Priority 1: IC Timestamp** – A screenshot showing the Incontact timestamp of activity.

Request for IC stamps: Navigate on Cliq and find the specific thread for [IC screenshot request](#).

Format for request:

Requesting IC Stamp:

Date:

Shift:

Reason:

- **Priority 2: Work Stamp** – Any digital document or log validating the employee was active/working during the disputed time.
- **Priority 3: SOS/EOS Thread** – A screenshot of the agent's Start of Shift (SOS) or End of Shift (EOS) post in the official attendance thread.
- **Priority 4: TL Vouch** – Mandatory only if Priorities 1, 2, and 3 are missing. The TL must review the claim and provide a formal approval/statement to act as the validation.

Step 3: Filing the Dispute in Zoho

- **If Priority 1, 2, or 3 exists:** The agent may proceed with filing the dispute in Zoho, attaching the screenshot as proof. TL review is encouraged for the filing to proceed.
- **If No Evidence exists:** The agent **must** present the case to the TL. The TL must audit the shift and, if satisfied, provide a "vouch."

Step 4: Support Documentation Entry

- **Action:** When filing in Zoho, the evidence must be attached to the ticket.
- **Action:** If it is a "TL Vouch" case, the TL must add a comment or note in the filing: *"No visual evidence available; claim verified and vouched by TL [Name] based on [Reason/Internal Audit]."*

Step 5: Monitoring & Verification The TL monitors the Zoho dashboard to ensure the dispute is picked up by RTA.

- **Action:** Confirm that the dispute status moves from "Pending" to "Approved."

Notes / Tips

- **Screenshot Quality:** Ensure the full desktop clock/date is visible in IC or Work Stamp screenshots to avoid rejection.

- **The Vouch Limit:** A TL Vouch should be used as a last resort. Frequent "vouching" for the same agent without screenshots may be flagged for operational review and be subject to fraud.

5. Exceptions & Escalation

Issue	Action	Escalate To
Agent has no evidence and TL refuses to vouch.	Review shift activity logs via RTA tools for a final decision.	RTA
RTA rejects a "Vouched" dispute.	TL must provide further context on why the vouch was granted.	RTA Lead
Evidence is blurry or cropped.	Request a new, full-screen capture from the agent.	Agent

6. Quality Check / Expected Result

- **Expected Result:** Every dispute in Zoho contains either a high-priority screenshot (Priority 1-3) or a documented TL Vouch (Priority 4).
- **Outcome:** Accurate payroll and attendance records with minimal rejections and discrepancies

7. Records / Outputs

- **Zoho Dispute Entries:** The official audit trail for the adjustment.
- **Attendance Threads:** Secondary proof stored in communication channels (Cliq/Email).

Issue Logs SOP

Standard Operating Procedure (SOP) for Walmart Support

| Incident Logging (System, Power, & Internet)

1. Purpose/ Scope

This SOP provides guidelines for Team Leaders (TLs) and Support Staff on how to manage and document agent downtime caused by Power Outages, Internet Connectivity issues, or System Errors. It ensures that agents are moved to the correct Aux status in Zoho and that payroll impact is correctly applied based on the agent's work setup (Office vs. WFH).

2. Roles & Responsibilities

- **Agent:** Responsible for reporting the issue immediately to the TL and providing proof (ISP outage notice, photos of power loss, or IT ticket numbers).
- **Team Leader (TL):** Responsible for determining the "Resolvability" of the issue, directing WFH agents to report to the office if needed, and filing/verifying the Zoho Break Logs.
- **RTA Team:** Responsible for monitoring the floor's real-time capacity and ensuring the break logs match the actual downtime.

3. Tools / Requirements

- **Zoho Attendance (Break Logs Module)**
 - **WFM Ticketing System**
 - **Outage Aux Categories:**
 - **System Error:** Internal tool/PC issues (Non-deductible).
 - **Lost Power:** Electricity outage.
 - **Lost Internet:** Connectivity outage.
-

4. Procedure (Steps)

Step 1: Incident Reporting & Identification

When an agent encounters an issue, the TL must categorize the outage immediately to determine the next steps.

- **Action:** Identify if the issue is **System Error**, **Lost Power**, or **Lost Internet**.

Step 2: Processing Office-Based Employees

For agents working on-site, outages are considered company-controlled.

- **Action:** File the respective break log in Zoho.
- **Mandatory Requirement:** You **MUST TICK** the "**Not Payroll Deductible**" checkbox.
The agent should not lose pay for office-wide issues.

Step 3: Processing WFH Employees (Outage Management)

If a WFH agent reports an Internet or Power outage, follow the **1-Hour Rule**:

- **If resolved within 1 hour:** Log the duration in Zoho from start to finish.
- **If NOT resolved within 1 hour:** Instruct the agent to report to the Office.
 - **If Agent can report:** Log the outage from the start of the issue until they arrive at the office. **DO NOT tick** "Not Payroll Deductible" (this time is docked).
 - **If Agent cannot report:** Logout the agent and log the outage from the start of the issue until the End of Shift (EOS). **DO NOT tick** "Not Payroll Deductible."

Step 4: Processing WFH Employees (System Issues)

If the issue is a technical/tool error:

- **Action:** Direct the agent to IT Support.
- **If IT Resolvable:** Log the "System Error" for the duration of the fix.
- **If NOT Resolvable:** Instruct the agent to report to the office. Follow the same docking rules as Step 3 if they cannot/do not report to the office.

Step 5: Zoho Entry & Documentation

- **Action:** Navigate to the agent's Zoho profile → Add Break Log.
- **Action:** Select the correct Type. Ensure the "Not Payroll Deductible" box is handled correctly based on the rules above.

- **Action:** Add a note: "WFH Outage - Did not report to office" or "Office-wide Power Outage." Reference below:

Notes / Tips

- **The 1-Hour Threshold:** The decision to send an agent to the office must be made as soon as it is clear the outage is not a "flicker" or quick reset.
- **Double Check Checkbox:** The most common error is forgetting to uncheck/check the "Not Payroll Deductible" box. Always verify this before hitting save.

5. Exceptions & Escalation

Issue	Action	Escalate To
WFH agent claims "Total Area Blackout"	Verify via local news/power company maps; file as docked.	TL

System Issue is a "Global" Client outage.	Treat as "Not Payroll Deductible" for everyone.	RTA Lead
---	---	----------

6. Quality Check / Expected Result

- **Expected Result:** Break logs are accurately categorized and payroll settings (deductible vs. non-deductible) match the agent's work location and reporting status.
- **Audit:** RTA will cross-reference "Not Deductible" logs against known office outages.

7. Records / Outputs

- **Zoho Break Logs:** Updated daily.
- **IT Ticket Logs:** Reference for "System Error" validity.

Suspension SOP

Standard Operating Procedure (SOP) for Walmart Support

| Employee Suspension Management & Coordination

1. Purpose/ Scope

This procedure establishes the workflow for documenting and enforcing employee suspensions. It ensures that the Operations and RTA teams are aligned to maintain accurate staffing levels, restrict system access during disciplinary periods, and prevent the misuse of leave credits (SL/VL) to offset suspension dates.

2. Roles & Responsibilities

- **Operations (TL/STL/OM):** Files the suspension request via WFM ticket, provides the required Notice of Decision (NOD), and ensures the agent complies with the "no-work" directive.
- **APS POC:** Coordinates and logs suspensions specifically resulting from Attendance Pointing System violations.
- **RTA Team:** Reviews staffing impact, plots the dates in the specialized Zoho Suspension form, and monitors for unauthorized login attempts.

3. Tools / Requirements

- **Zoho Desk:** For WFM Ticketing and submission of suspension requests.
- **Zoho (Suspension Module):** The specific form used for plotting (distinct from the standard leave form).
- **Notice of Decision (NOD):** Documentation required to validate the disciplinary action.

4. Procedure (Steps)

Step 1: Submission of Request

Once a handbook violation or APS threshold is met, the Support Team must initiate the process.

- **Action:** Create a **Workforce Management (WFM) ticket** under "Suspension Request."
- **Details:** Include Agent Name, Reason for Suspension, Proposed Dates, and attach the NOD or supporting evidence.

Step 2: RTA Staffing Assessment

The RTA team evaluates the proposed dates against the program's capacity requirements.

- **Action:** RTA will either confirm the dates or suggest a shift in schedule to avoid service level gaps. Support must coordinate with RTA to find the balance between disciplinary timelines and floor needs.

Step 3: Formal Plotting in Zoho

Once dates are agreed upon, the official entry is made in Zoho.

- **Process:**
 - * **Handbook/General Violations:** The RTA logs the entry.
 - **APS Violations:** The APS POC logs the entry.
- **Requirement:** Entries **must** be filed using the **Zoho Suspension Form**, not the standard leave request tool, to ensure system access is restricted.

ECE Attendance	Leave Request (Suspension)	
Leave Request	Employee *	-Select-
Leave Request	Remaining VL	
Leave Request (Suspension)	Remaining SL	
My Records	From *	MM/dd/yyyy
Attendance Summary	To *	MM/dd/yyyy
View	Status *	-Select-
Carry Over Leaves	Reason *	
Walmart Dashboard	Remarks	
Employee Leave Credits		

Step 4: Compliance Enforcement

Support must communicate the suspension terms clearly to the agent.

- **Action:** Ensure the agent understands they are barred from logging in and cannot use VL/SL during these dates.

- **Action:** RTA monitors real-time logs. If an agent attempts to log in, RTA alerts the TL/OM immediately for corrective intervention.

Step 5: Completion & Archiving

- **Action:** RTA provides final confirmation to Support once the dates are secured. Support ensures the WFM ticket is closed and all documentation is retained for audit purposes.

5. Quality Check / Expected Result

- **Result:** All suspensions are visible in Zoho through the correct disciplinary category.
- **Success Metric:** Zero instances of agents bypassings suspensions via leave credits or unauthorized system use.

6. Records / Outputs

- **WFM Ticket History:** Records of the request and coordination.
- **Zoho Suspension Logs:** Official record for payroll and 201 file purposes.
- **NOD Documentation:** Evidence of the disciplinary process.

REST SOP

Standard Operating Procedure (SOP) for Walmart Support | Workforce Rest Adjustment and Ticket Filing

1. Purpose/ Scope

This SOP ensures that agents who sacrifice their scheduled breaks/rest periods for work-related activities (Coaching, Meetings, Clinic) are properly compensated with an adjusted rest period. This prevents labor violations and maintains accurate Real-Time Adherence (RTA) tracking.

2. Roles & Responsibilities

- **Team Leader (TL):** Validates the overlap, creates the Zoho ticket in **EST**, and assigns the new rest schedule to the agent.
- **Workforce (RTA):** Audits the request against the agent's actual shift and approves/denies the adjustment based on documentation.
- **Agent:** Attends the required activity and ensures they use the correct status/Aux code as instructed.

3. Tools / Requirements

- [Zoho WFM Ticketing](#)
 - **Communication Channels (Cliq/Email)**
 - **Required Evidence:** Calendar invites or Meeting endorsements.
-

4. Procedure (Steps)

Step 1: The "Overlap" Audit Before filing, the TL must verify that the activity (Coaching/Meeting) physically prevents the agent from taking their break at the scheduled time.

- **Note:** If the meeting ends *before* the break starts, no ticket is needed.

Step 2: Ticket Creation & Categorization Log into Zoho Desk → **RTA/WFM Ticketing**.

- **Category:** Select **Meeting, Coaching, or Clinic**.
- **Issue Type:** Select **Rest Adjustment / Rest Ticket**.

Step 3: Data Entry (The "Precision" Step) All times must be logged in **EST**. Use the following template in the description box to ensure 100% approval:

REST ADJUSTMENT REQUEST

- **Agent Name:** [Name]
- **Activity Type:** [Coaching/Meeting/Clinic]
- **Activity Time:** [Start Time] - [End Time] *EST Military Time*
- **Affected Break:** [e.g., 1st 15-min Break]
- **Requested New Break Time:** [Start Time] - [End Time] *EST Military Time*

Step 4: Evidence Attachment You must attach proof to the ticket based on the following priority:

1. **Calendar Invite:** Screenshot of the Outlook/Zoho calendar invite showing the time.
2. **Meeting Endorsement:** Screenshot of the Slack/Teams message from the OM or Client.
3. **Clinic Slip:** Digital endorsement from the Medical Team.

Evidences are required but not mandatory

Step 5: RTA Approval & Real-Time Tracking Once the ticket is submitted, the TL must monitor the status.

- **Approved:** Notify the agent of their new time schedules.
- **Action:** Instruct the agent to remain on the "Coaching" or "Meeting" Aux during the activity, then move to "Break" Aux during their **new** adjusted time.

5. Exceptions & Escalation

Issue	Action	Escalate To
Late Filing	If filed <30 mins before the activity, add a "Reason for Delay" in the description.	RTA
Overlap Conflict	If a meeting is extended, update the existing ticket instead of creating a new one.	RTA

System Downtime	Send the Rest Adjustment details via the Cliq/Email channel.	RTA Lead
------------------------	--	----------

6. Quality Check / Expected Result

- **Sync Check:** The agent's Zoho timeline should show the activity Aux (Coaching) followed by the Break Aux without any "Unaccounted" gaps.
- **Payroll Accuracy:** No deductions should occur for rest periods consumed by work activities.

7. Records / Outputs

- **Zoho Rest Ticket ID:** To be kept by the TL for end-of-week reporting.
- **RTA Adherence Report:** Shows the updated schedule.

TL Pro-Tips for Success:

- **EST Conversion:** Double-check your time conversion. 90% of rejections are due to PST/Local time errors in the description.
- **Don't Double-Plot:** Never tell an agent to plot their own break if a ticket is still "Pending." Wait for the RTA "Approved" status.

Client Tool SOP

Standard Operating Procedure (SOP) for Walmart Support

| Client Tool Management & Operational Access

1. Purpose/ Scope

To establish a standardized process for managing the primary client tools (VDI, IC, and ServiceNow). This SOP ensures that the Support Team can maintain uninterrupted operations, verify accurate agent tracking, and uphold client-specific workload compliance.

2. Roles & Responsibilities

- **Agent:** Must utilize VDI as the entry point for all work and report any tool-specific blockers immediately via the official tracker.
- **Team Leader (TL):** Responsible for verifying that agents are logged into all three tools, auditing IC status vs. Zoho status, and documenting technical downtime for their team.
- **RTA Team:** Monitors real-time status in IC and workload volume in ServiceNow; performs forced logouts during technical emergencies.
- **Operations Manager (OM):** Oversees tool compliance and reviews ServiceNow data to ensure SLA targets are met.

3. Tools / Requirements

- **VDI (Virtual Desktop Infrastructure)**
 - **InContact (IC)**
 - **ServiceNow (SNow)**
 - **Internal VDI/PC Issue Tracker**
-

4. Procedure (Steps)

Step 1: Access Verification (VDI)

Support must ensure all agents enter the "Virtual Environment" first.

- **Action:** Confirm the agent is logged into the VDI.
- **Critical Rule:** Without VDI, agents have zero access to the client network. If VDI fails, the agent is effectively "System Down."

Step 2: Time & Activity Synchronization (InContact)

Once in VDI, agents must launch InContact (IC).

- **Tracking:** TLs must check that agents are using the correct Aux codes for productive and offline work.
- **Comparison:** IC is the **Client's Source of Truth**. TLs should spot-check to ensure IC status matches the agent's Zoho status.
- **Supervisory Action:** If an agent is "stuck" in a status due to a crash, the TL must coordinate with the RTA to perform a forced logout.

Step 3: Workload & SLA Monitoring (ServiceNow)

SNow is the "Source of Truth" for production. Support uses this to monitor output.

- **Action:** Ensure agents are checking SNow for claim/line assignments.
- **Monitoring:** Support monitors SNow to track volume inflow and ensure claims are being closed within the agreed-upon SLA.

Step 4: Technical Issue Documentation (SOI/EOI)

In the event of a tool failure (VDI, IC, or SNow), Support must enforce the reporting protocol.

- **Action:** Direct the agent to log the incident in the **VDI/PC Issue Tracker Channel**.
- **Required Data:**
 - **SOI (Start of Issue):** The exact minute the access was lost.
 - **EOI (End of Issue):** The exact minute access was restored.
- **Verification:** TLs must review these logs daily to protect agent productivity metrics.

5. Exceptions & Escalation

Issue	Action	Escalate To
Total VDI Blackout	Move all affected agents to "System Down" in Zoho.	Client IT / RTA
IC/Zoho Mismatch	Inform TL to issue a corrective reminder to the agent to sync statuses.	TL

SNow Assignment Errors	Manually reassign claims or lines if the auto-assigner (Latte) fails.	RTA
-------------------------------	---	-----

6. Quality Check / Expected Result

- **Data Integrity:** All agents should show as "Active" in both IC and SNow simultaneously.
- **Productivity:** ServiceNow "Closed Claims" count should align with the agent's productive hours logged in InContact.

7. Records / Outputs

- **VDI/PC Issue Tracker Logs:** Used for uptime reporting.
- **InContact Activity Reports:** Used for client-side attendance auditing.
- **ServiceNow SLA Reports:** Used for performance reviews.

Support Pro-Tips:

- **VDI Priority:** Always troubleshoot the VDI first. If VDI is broken, agent remains unproductive since the majority of the client tools are inside VDI.
- **SOI/EOI Importance:** Without a documented SOI/EOI, the client will consider the downtime as "Unaccounted," which negatively impacts the program's performance score.

Remember, No evidence means it never happened.

System Issue Reporting

Standard Operating Procedure (SOP) for Walmart Support

| System Issue Reporting & Item Transfer Protocol

1. Purpose/ Scope

To establish a clear workflow for Support staff when agents encounter "stuck" or "erroring" items in ServiceNow (SNW). This SOP ensures that non-actionable items (Ghost items) are properly documented via Google Forms and transferred to the RTA team to prevent queue inflation and maintain accurate productivity reporting.

2. Roles & Responsibilities

- **Team Leader (TL):** Validates the agent's report, ensures the Google Form is submitted, and oversees the transfer of the item to an on-shift RTA.
- **Agent:** Identifies the error and provides the necessary item identifiers and screenshots to the TL.
- **On-shift RTA:** Receives the transferred items and validates that the handoff was successful in the system.
- **RTA Lead:** Serves as the escalation point for recurring system bugs or items that refuse to transfer.

3. Tools / Requirements

- **SNW (ServiceNow):** For item review and the actual transfer action.
 - **Google Reporting Form:** [Official Link](#)
 - **Internal Chat (Cliq/Slack):** For immediate coordination with the RTA.
-

4. Procedure (Steps)

Step 1: Item Identification & Categorization

Support must verify if the item reported by the agent meets the "Non-Actionable" criteria:

- **Ghost Items:** Items that stay in the bucket despite being completed.
- **Erroring Items:** Items displaying system failures or abnormal processing behavior.
- **Non-Actionable:** Items marked "Done" but still appearing in the agent's active queue.

Step 2: Technical Validation

Before escalating, the TL must perform a "Quick Audit":

- **Action:** Refresh the SNW workspace.
- **Action:** Verify if the item is simply pending a delay from another department.
- **Requirement:** If the issue persists after a refresh, proceed to Step 3.

Step 3: Filing the Official Report

Documentation must occur **before or during** the transfer.

- **Action:** Access the [Google Form](#).
- **Required Data:** Agent Name, Item ID, Screenshot of the error, and a brief description.
- **Critical:** Do not skip the form; this is the only way the RTA team can track system bugs for the client.

Step 4: Item Transfer in SNW

The TL or Agent (under TL supervision) must move the item out of the agent's queue.

- **Action:** Open the item in SNW and initiate the **Transfer** action.
- **Target:** Select an **On-shift RTA**.
- **Fallback:** If no RTA is online, transfer to **John Vergara – Vendor (vn5774u)**.
- **Warning:** If the system prevents a transfer, contact the RTA channel immediately.

Step 5: Coordination & Confirmation

- **Action:** Reach out to the receiving RTA via **Cliq**.
- **Confirmation:** "I have transferred Item ID [Number] to you; please confirm if visible."
- **Finality:** Ensure the agent's queue is now clear of the reported item.

5. Exceptions & Escalation

Issue	Support Action	Escalate To

Item cannot be transferred	Attempt to "Allow" or "Block" the item; if it fails, take a screenshot of the error.	RTA
Google Form is Down	Document all details (Item ID/Reason) in a manual log/email.	RTA Team
RTA cannot see item	Re-verify the Item ID and ensure the transfer was "Submitted" in SNW.	RTA Lead
Recurring Bug	Flag the specific Item IDs that repeatedly reappear.	RTA Lead

6. Quality Check / Expected Result

- **Successful Outcome:** The "Ghost" item is removed from the agent's view, and a corresponding Google Form entry exists for the RTA's audit.
- **Traceability:** Every transferred item has a documented "Ticket/Form" trail.

7. Records / Outputs

- **Google Form Responses:** Serves as the master log for system issues.
- **SNW Audit Trail:** Shows the transfer from Agent to RTA.
